

# Wearing a Mask

# Wearing a Mask

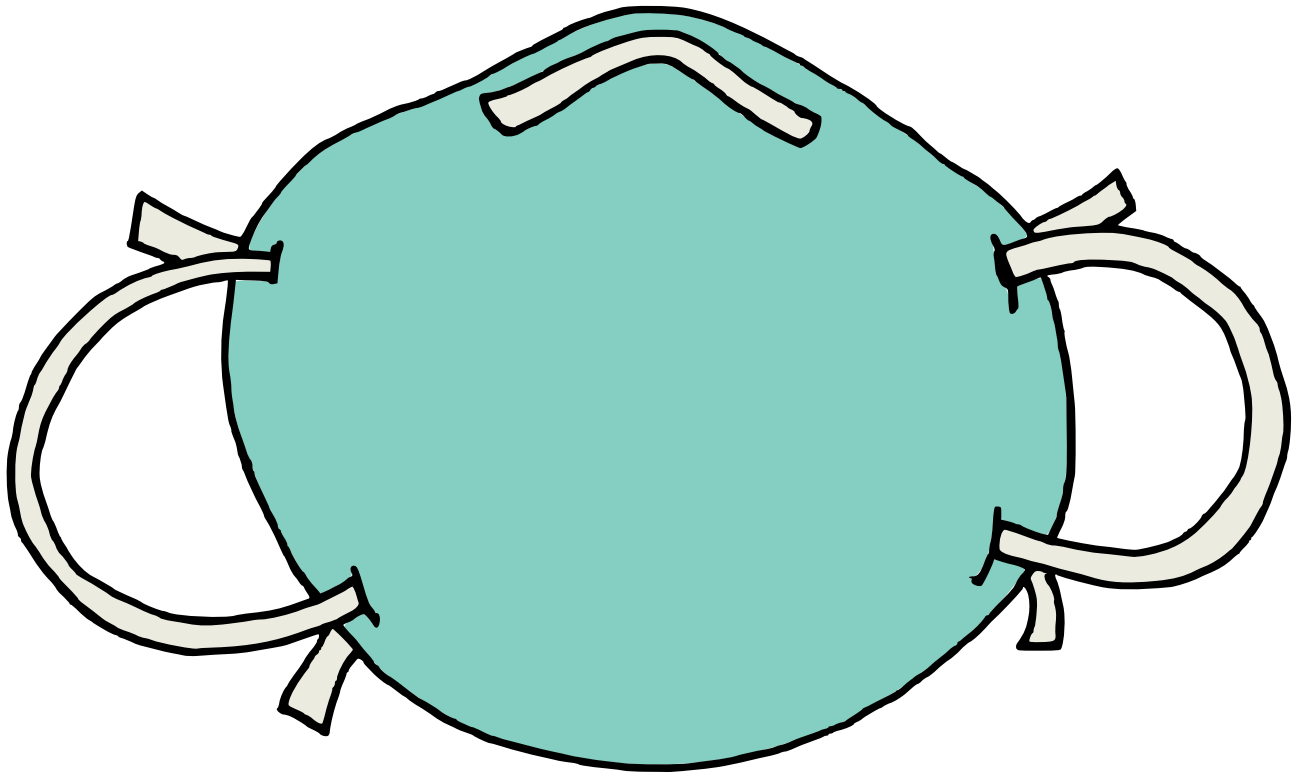

There's a new virus going around.  
It's called COVID-19 or CoronaVirus.

It's making people sick.

The virus spreads when people breathe, cough, or sneeze on each other.

To keep ourselves safe, we need to wear a mask when we go outside.

It's important that the mask covers  
our chin, nose, and mouth.

It's important that, even with the mask on, I can still breathe.

The mask is not a costume.

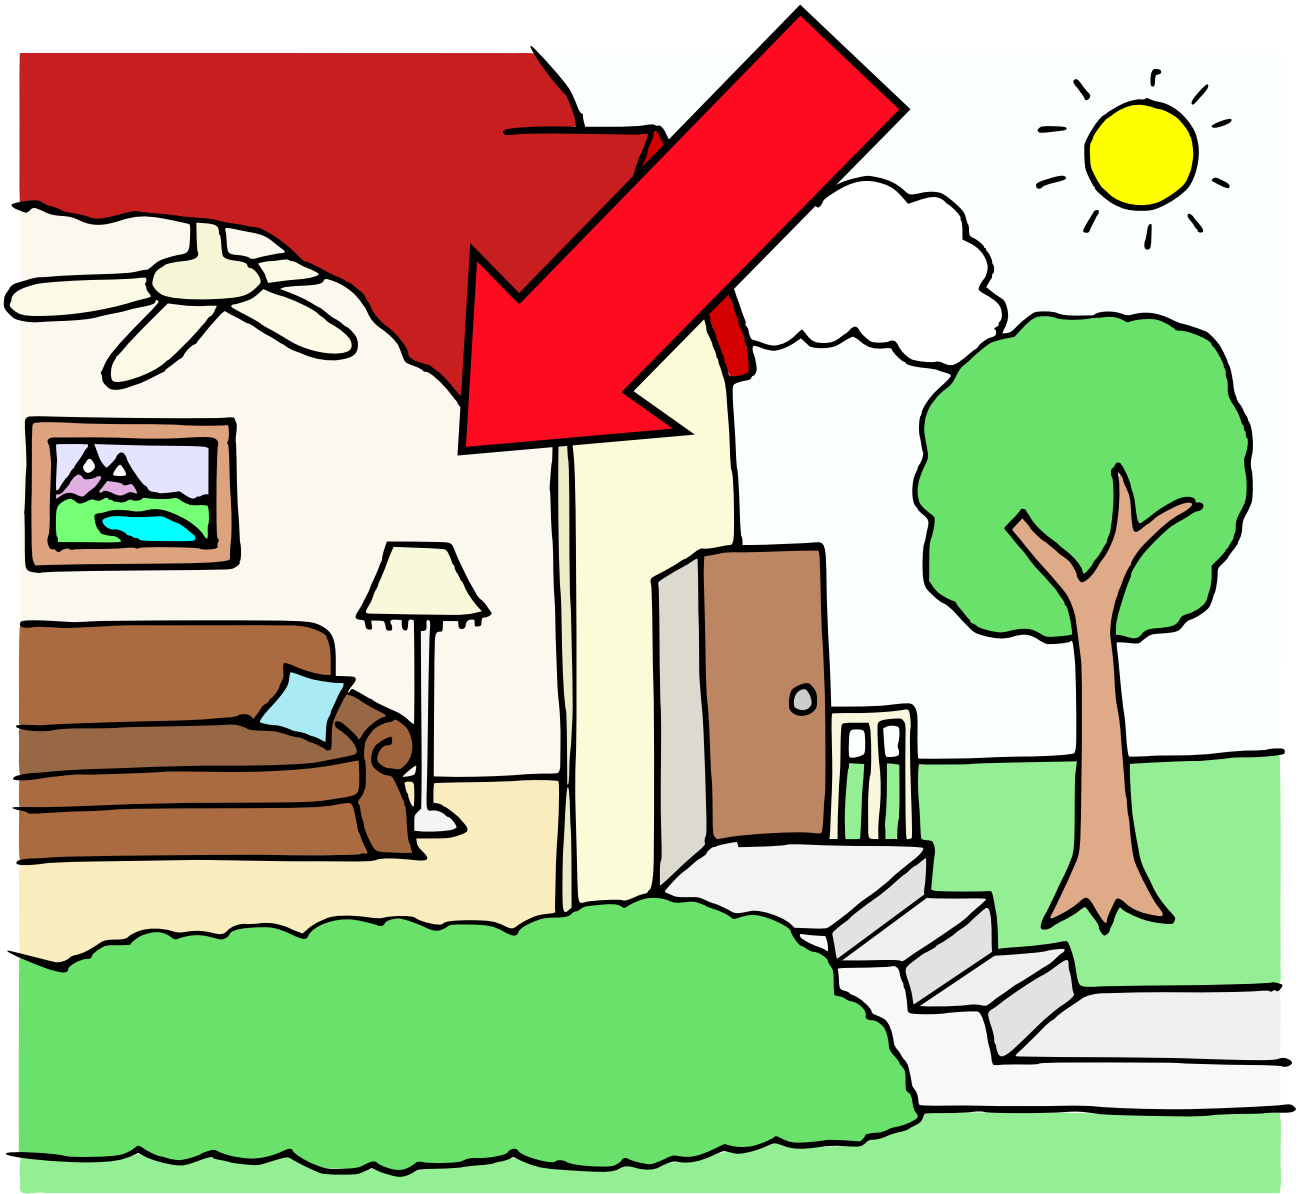

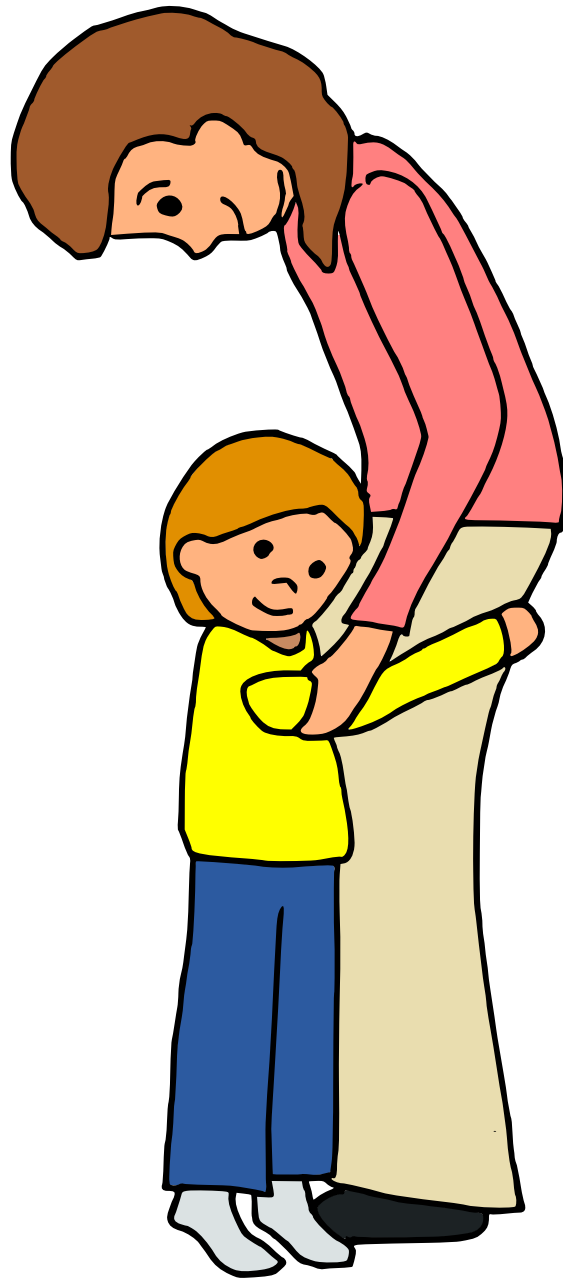

Even though the mask is covering their mouth, people can still talk.

I can wave at people in masks. They aren't scary.

When we get home, we can take the mask off.

We'll have to wear masks in public for a while. Mom and Dad will let me know when we can stop.
