OFFICE OF THE SECRETARY

Mr. Ben F. Waple
Secretary
Federal Communications Commission
Washington, D. C. 20054

In re: U. S. Communications of
California, Inc.
Licensee KEMO-TV

Dear Mr. Waple:

Permission is requested on behalf of the above-entitled licensee for KEMO-TV to cease telecasting effective March 31, 1971 and to remain dark for a period of six months. Similar action is being requested at this time on behalf of U. S. Communications of Georgia, Inc., permittee of Station WATL-TV.

The above-entitled request is made in order to permit U. S. Communications of California, Inc. to seek new or additional financing which may make it possible for KEMO-TV to resume telecasting. U. S. Communications of California, Inc. does not wish to surrender its license authority with respect to KEMO-TV because it is sincerely hoped that it will be able to make arrangements pursuant to which the station can resume telecasting.

The actions taken with respect to KEMO-TV and WATL-TV are deemed necessary at this time to permit continued funding of the operation of the other stations licensed to the other subsidiaries of U. S. Communications and its parent, A.V.C. Corporation.

If there are any questions with regard to this matter, please communicate directly with the undersigned.

Very truly yours,

PIERSON, BALL & DOWD

Thomas N. Dowd

About the History Cards ...

History Cards were first used by the Department of Commerce to keep track of applications filed by, and changes to, the earliest AM broadcast radio stations in the early 1920s. The records were subsequently transferred to the Federal Radio Commission in 1927, and after that to the Federal Communications Commission when that agency was created in 1934. These cards gradually grew into a large card file.

TV History Cards were initiated in the early 1940s, with the authorization of the earliest TV stations. History Cards remained in use until the creation of the first computerized database in 1980 to track broadcast applications, the Broadcast Application Processing System (BAPS). However, the Commission did not transfer the data from the History Cards to the new system. Instead, it retained the History Cards in their original form for reference.

In 1999, the Commission moved to a new location (445 12th Street SW), and also at that time created the successor database to BAPS, the Consolidated DataBase System (CDBS). Prior to that move, the History Cards were transferred to microfiche by a contractor (only a few sets of microfiche exist), and the original paper cards were destroyed. The History Cards were stored on the microfiche as negative images, like those you see above.

History Cards contain very brief entries and notes about station facilities, applications, and ownership. They are not, and never were intended to be, a comprehensive record of a station's operations. Nevertheless, they can be useful to help determine, for example, when a station first went on the air and its call letters at that time. History Card comments were generally typed onto the cards, and thus some records will show more faintly or with more smudging than others, depending on the quality of typewriter and ribbon then used. Occasional handwritten comments, corrections, and strikeouts may also be found. Cards may be incomplete, missing, or occasionally out of sequence.

The History Cards are presented here as they were copied to microfiche, to preserve this record for public use, and with the hope that they will be of value to future researchers of television station history.
