THE
MASSACHUSETTS
DIRECTORY;

BEING THE

FIRST PART

OF THE

NEW-ENGLAND DIRECTORY,

BY JOHN HAYWARD.

BOSTON:

**PUBLISHED BY JOHN HAYWARD, CORNER OF COURT
AND TREMONT STREETS.**

1835.

M. S. T. S.

ENTERED according to Act of Congress, in the Year Eighteen Hundred and Thirty-Five, by JOHN HAYWARD, in the Clerk's Office of the District Court of Massachusetts.

BOSTON:
Samuel N. Dickinson, Printer,
22, Washington Street.

☞ Index, see page 197.

INTRODUCTION.

AN apology is due from the Editor to his numerous friends and the public, for the non-appearance of a complete *Directory of New England* at the present time. Notwithstanding a large and valuable mass of information has been acquired in regard to all the New England States; yet when it is considered how extremely difficult it is to obtain *all* the facts necessary for such a work, and the requisition of time and labor necessary for their arrangement in a clear and perspicuous manner, he trusts to be forgiven for the delay, and indulges the hope that the first part of the work—the MASSACHUSETTS DIRECTORY, will be accepted as a token of his faithfulness and zeal, and received as a pledge for the complete performance of his promise, at as early a period as unremitting labor, and constant devotion can accomplish.

How far the Editor has succeeded in his work, the specimen now offered to the candid and intelligent yeomanry of New England, will decide. In a work where such a multiplicity of facts is attempted to be stated, and as Gentlemen of the various professions and in official stations are not only mortal, but subject to change of location, it is utterly impossible to be precise in every particular. Every effort that ingenuity could devise, or industry apply, has been made subservient to render the work as accurate as possible. Of this fact, two hundred and eighty-eight members of the General Court of Massachusetts, from different towns, can attest; to whom, for their kind assistance in furnishing statements of their several towns, the Editor begs leave to tender his most grateful acknowledgments.

To those Gentlemen, in other States, who have aided him in his labors, he also expresses his unfeigned gratitude, and earnestly solicits a continuance of their valuable communications, without which, this work would fail of the purposes designed.

The Editor desires to have it fairly understood, that he considers himself merely as the compiler of a great variety of facts, stated to him by his friends, from various quarters, both oral and written; and that altho' he is seated in the centre of the country he wishes faithfully to describe, and annually visits all the States, most of the Counties, and many of the Towns;

yet it is impossible to be accurate without the aid of others. The river is not less dependent on the springs for its usefulness, than an Editor of a publication of this description, is on the kind co-operation of intelligent men in the several sections of the country to which the work refers.

It was the wish of the Editor to have given the names and location of the Methodist clergy, with an account of the academies, lyceums, publications, religious, literary and charitable societies, so numerous in the Commonwealth; but satisfactory lists could not be obtained in season. These, with several articles of a more general, geographical, and statistical character, will be given under the head of *New England*.

MASSACHUSETTS DIRECTORY.

THIS ancient commonwealth, the mother of New-England colonies, of free states, and of American liberty, was first permanently settled by Europeans, at Plymouth, on the 22d of December, 1620.

The history of this state is deeply interesting; it is interwoven with every political and moral event of important occurrence in the settlement and progress of the whole of North America, which preceded or was connected with the revolution of 1775.

This state furnished nearly a third part of the troops for the revolutionary contest, and paid more than a seventh part of its cost.

This state is bounded east, southeast, and south by the Atlantic ocean. It has, exclusive of the island counties of Dukes and Nantucket, a seacoast of about 250 miles. It is bounded south and west by the state of Rhode-Island, about 68 miles; south by the state of Connecticut, 87 miles; west by the state of New-York, 50 miles; north by the state of Vermont, 42 miles; and north by the state of New-Hampshire, 87 miles. It lies between $41^{\circ} 31'$, and $42^{\circ} 53'$ N. lat., and $69^{\circ} 48'$, and $73^{\circ} 17'$ W. lon. from Greenwich. Its area is about 7,800 square miles, or 4,992,000 acres. It comprises 14 counties, 1 city, and 304 towns, besides some districts and small unincorporated tracts.

The whole of *Massachusetts Bay* is within the limits of this state. The exterior bounds of this celebrated bay are Capes Cod and Ann. The former is in N. lat. $42^{\circ} 6'$, and W. lon.

70° 7'.—The latter in N. lat. 42° 45', and W. lon. 70° 17'. Cape Ann bears from Cape Cod, N.N.W. about 40 miles.

The length of this bay is about 62 miles, from N.W. to S.E.:—its breadth is about 25 miles. Numerous bays and rivers of various sizes set in from this bay, and its whole coast is lined with commodious harbors, and pleasant commercial towns.

Buzzard's Bay is also within the limits of this state. It lies N.W. of Dukes county, W. of Barnstable county, and S. by E. of the counties of Plymouth and Bristol. The length of this bay is about 30 miles, from N.E. to S.W., and its average breadth is about 7 miles. From the head of this bay, across Cape Cod to Massachusetts Bay, (the place proposed for a canal) is 5 miles.

Some account of the surface, soil, and general geographical characteristics of this state will be found under the heads of *counties* and *towns*.

The best map of Massachusetts, extant, is on Nathan Hale's Map of the New-England States. A trigonometrical and astronomical survey of the state, by order of the General Court, for the purpose of a new map, was commenced in 1830:—it will probably be completed in 1836. The cost of it will exceed \$30,000. About the same time, a report on the geology, mineralogy, botany, and zoology of the state was ordered by the government, and Professor Hitchcock, of Amherst College, was appointed to that service. His report was published in 1833, and is the best work of the kind in the United States.

The name of this state probably arose from the name of a tribe of Indians formerly at Barnstable; or from two Indian words—*Mos* and *Wetuset*; the former signifying an *Indian arrow's head*, the latter, *Hill*. It is stated that the Sachem who governed in this region about the time of the landing of our forefathers, lived on a hill in the form of an Indian arrow's head, a few miles south of Boston, and was called by the Indians—*Moswetuset*.

Previous to 1820, the District, now the state of Maine, had been connected with Massachusetts in all its political and so-

cial relations. The population of Massachusetts, including Maine, in 1701, was 70,000, in 1749, 220,000, and in 1776, 348,094. The population of Massachusetts, Proper, in 1790, was 378,787;—in 1800, 422,845;—in 1810, 472,040;—in 1820, 523,237; and in 1830, 610,408. If the population of the state has increased in the same ratio that it did from 1820 to 1830, (one and two-thirds per cent. per annum,) its present population is about 651,100. The number of rateable polls in this state in 1831, was 150,591. In 1830, there were in this state 294,685 white males, and 308,674 white females:—3,358 colored males, and 3,690 colored females. Of the white population, there were 150,702 under 10 years of age; 135,245 between 10 and 20; 33,464 between 50 and 60; and 4,813 over 80 years of age. There were 1,874 females more than males, between the ages of 20 and 30 years. There were also at that time within the state, 275 persons deaf and dumb, 245 blind, and 8,735 persons from foreign countries, not naturalized.* This state is more densely populated than any other in the Union. According to the last census, it contained 78 inhabitants to a square mile, or about 8 and a quarter acres to an inhabitant.

This state has 12 maritime districts, and a port of entry within each. It has 254,508 tons of shipping engaged in foreign commerce, and 141,415 tons employed in the coasting trade and fisheries. The exports of this state in 1833 amounted to \$9,683,122, and its imports to \$19,940,911.

In 1834, there were within this state (exclusive of the branch bank of the U. S.) 103 banks, with a capital of \$29,409,450; having \$7,650,147 amount of bills in circulation, and \$1,160,296 amount of gold, silver, and copper in their vaults.† These banks pay a tax to the state of 1 per cent. on the amount of their capital. Within this state about 14 millions of dollars are invested in insurance stock, and a vast amount in manufacturing operations.

* The number of insane (throughout New-England) is estimated at 1 to a 1000.

† See Report on Banks and Banking made to the Legislature, 1835.

There are 26 "Institutions for Savings" in operation in this commonwealth. The number of depositors, on the 27th of September, 1834, were 24,256. The amount of deposits, \$3,407,774. Dividends for the year, \$138,577. Annual expense of the institutions, \$10,969.—(The number of depositors in Boston was 11,767—amount of deposits, \$1,719,139.)

There are 3 colleges in this state, about 60 incorporated academies, and a great number of lyceums and high schools. Institutions for the promotion of philanthropic and pious objects pervade the community, and there is no town without a free school.

The amount of money raised by taxes in 261 towns, according to the school returns of 1834, made to the legislature in 1835, was \$310,179. The population of those 261 towns, in 1830, was 530,167. This gives to each individual in those towns, according to the *present* population, an average sum of 55 cents for school money, exclusive of local funds and sums raised by contribution.

The foundation of a school fund was laid by legislative enactment, in 1834, by appropriating "all moneys remaining in the treasury on the 1st day of January, 1835, arising from the sale of public lands, and from payments made to this commonwealth by the United States, on account of the claim for military services and disbursements during the late war, together with one half of all future proceeds of the sales of public lands, as a permanent fund for the encouragement and support of common schools, which fund is never to exceed one million of dollars." The amount in the treasury, as aforesaid, was \$281,000.

The valuation of the state in 1831, was \$208,236,250, of which \$80,244,261 was of property in the city of Boston. (Were this amount of property equally divided among the people of the state, each individual's share would be \$341 15 cents.)

The debt of the state, January 1, 1835, was \$67,488. Its resources consisted in cash \$96,429, and bonds, notes, &c., amounting to \$472,044. Balance in the treasury, \$500,985.

This state has also more than four millions of acres of land in the state of Maine which is rapidly increasing in value. There is also still due to this state from the government of the United States, a large amount on account of the claim for military services and disbursements during the late war. In 1834 the state derived a revenue from the tax on bank capital of \$294,452; and from a tax on auction sales of \$41,655. The whole expenditures of the state, the same year, were \$362,580.

The number of paupers, or poor supported by the several towns, in 212 towns, according to a report made to the legislature, February 5, 1835, was 5054. The population of those 212 towns, in 1830, was 458,499. According to the *present* population, the number of poor in the state would be about one per cent. Of this number of poor, 774 were foreigners, and 477 born in other states.

The average cost of supporting the poor in the several counties, by contract, was 85 1-2 cents a week.*

The Militia of this state consists of 6 Major-Generals, 15 Brigadier-Generals, 1 Adjutant-General, 2,221 other commissioned officers, and 42,730 non-commissioned officers, musicians, artificers and privates. Total—44,973. [F See App.

The Legislature of this state met at Boston, on the 7th of January, 1835. This body consists of 11 in the Executive department, 40 in the Senate, and 668 in the House of Representatives. Total constitutional number, 719. In consequence of some towns not sending their whole quota of representatives, and some not sending any, the General Court, the present year, consisted of only 661 members. This body rose on the 8th of April; to meet again (an extra session for the revision of the statutes,) on the 2d of September next. They were in session 79 days. A synopsis of the laws which were passed will be found in the Appendix.

* See an able report of the Commissioners, appointed by the Legislature, on "the Pauper System," made January 11, 1833.

The pay and travel of the counsellors, senators and representatives amounted to \$111,402, or \$1,410 a day.

For descriptions of the Courts of Law, the times of their sessions, the names of the Judges and other law officers in all the New-England States and New-York, the reader is referred to the *Law-Register*.

BARNSTABLE COUNTY.

THIS county was incorporated, 1685. Pop. 1820, 24,046—1830, 28,525; r. ps. 6,862; val. \$22 21; area, about 330 sq. miles; central lat. $41^{\circ} 45' N.$; lon. $70^{\circ} 10' W.$ This county includes the whole of Cape Cod, extending E. and N. into the Atlantic ocean, and which Gosnold discovered in 1602. It is bounded N.W. by Plymouth county, and W. by Buzzard's Bay. Cape Cod lies in the form of an arm, half open; the elbow is at Chatham, 20 miles E. of Barnstable; the hand, the wrist inclining inward, is at Race Point, 33 miles N. by W. of Chatham. The whole length of the Cape is 65 miles, and the average breadth about 5. This county is principally diluvium. Below the town of Barnstable the country is quite sandy, so much so, that the people are generally dependant on Boston and other towns for a large proportion of their meats and bread-stuffs. This deficit is amply compensated by the unrivalled privileges enjoyed, and well improved by them, in the cod, mackerel and other fisheries. The tonnage of Barnstable district is 28,153 tons. This county has but little wood, but it is well stored with peat. About two millions of dollars are invested in this county in the manufacture of salt. It is noted for its fine sailors and men of superior nautical talents. The ladies are celebrated for their fair complexions and good housewifery.—13 towns; 86 inhabitants to a square mile.

Barnstable.

County town and a port of entry, extending across Cape Cod. *Sandy Neck*, on the N. side, forms a good harbor for vessels of 8 feet of water. *Hyannis*, on the S. side, 6 miles S.E. of Barnstable C. H., is now a good harbor; but by an expensive *Breakwater*, constructing at that place by the U. S. government, it will soon become perfectly safe from all winds, for all classes of vessels navigating the Sound, and passing round the Cape. The "Pilgrim Fathers" landed here, Nov. 11, 1620, and borrowed some corn of the *Mattacheeset* Indians. The celebrated patriot, James Otis, was born here, Feb. 5, 1725. He died at Andover, May 23, 1783. The manufacture

of salt was commenced here as early as 1779. It then sold for \$6 a bushel. 2,200 hogsheads of salt were made in this town in 1834. Between 50 and 60 sail of fishing and coasting vessels belong to this place. This town has numerous ponds, a considerable water power, and extensive salt marshes. The Mutual Insurance Company has a capital of \$50,000. Z. D. Bassett, Pres., Amos Otis, Jr., Sec. Inc. 1639; pop. 3975; r. ps. 914; val. \$327; s. m. \$1600. 65 miles S.E. of Boston, 50 S.W. of Provincetown, 30 S.E. of Plymouth, and 466 from Washington. *Cl*—Enoch Pratt, and 1 v. soc. c; Daniel Chesman, b; John M. Spear, u; a soc. m. *Phs*—Oliver Ford, Ezra Stephenson, Joseph F. Hill, Henry Tuck. *Att*—Nymphas Marston. *Pms*—Matthew Cobb; *West*, Albert Howland; *Marston's Mills*, N. Hinckley; *Centreville*, W. Marchant; *Cocuit*, R. T. Crocker; *Hyannis*, Otis Loring; *Hyannis Port*, F. Scudder; *Oysterville*, J. Scudder, Jr. *Collector of the Customs*—Isaiah L. Green.

Brewster.

This town was inc. 1803; pop. 1418; r. ps. 327; val. \$108; s. m. \$400. On the N. side of Cape Cod, 16 miles E. by N. of Barnstable, and 6 N.N.W. of Chatham. Six or eight fishing and coasting vessels: 375 hhds. of salt, and about 300 barrels of Glauber and Epsom salts were made here in 1834. In common with all the towns on Cape Cod, a large number of ship-masters, sailing to foreign ports, belong here. From three ponds in this town, covering about 1000 acres, a never-failing stream of water is produced, on which are a cotton mill, carding mill, machine shop and other smaller mills. *Cl*—Samuel Williams, c; 1 soc. m; Henry Merchant, b; Abraham Norwood, u. *Ph*—Joseph Sampson. *Att*—George Copeland. *Pms*—Jeremiah Mayo; *West*, Joshua Winslow; *East*, George W. Higgins.

Chatham.

On the elbow of the cape, south side. *Pleasant Bay*, inside of Chatham beach, forms a good harbor. This place has about 20 sail of fishermen and 30 coasters. 2,300 hogsheads of salt were made here in 1834. Inc. 1712; pop. 2134; r. ps. 490; val. \$143; s. m. \$600. 20 miles E. of Barnstable, and 32 S.S.E. of Provincetown. *Cl*—Isaac Briggs, c; D. Lothrop, b; 1 soc. m. *Phs*—Franklin Seabury, Daniel P. Clifford. *J.P.*—Joshua Nickerson, Isaiah Nye. *Pms*—Josiah Mayhew; *North*, S. N. Howland; *West*, Levi Eldredge; *South*, (new office.) *Commissioner of Wrecks*—Isaac Hardy.

Dennis.

This town crosses the cape, and was taken from Yarmouth in 1793. Pop. 2317; r. ps. 579; val. \$170; s. m. \$400. 8 miles E. by N. of Barnstable, and 7 W. of Harwich. The first salt produced by solar evaporation in this country, was made in this town, by John Sears and others, in 1776. About 7000 tons of shipping belong to this town, principally engaged in fishing and coasting, and all manned by natives of the town. *Bass river*, rising from a pond, affords a small water power. 150 ship-masters belong to this town, sailing from various ports in the union. About 60,000 bushels of salt, and 500 bbls. of Epsom salts, are annually made here. *Scargo Hill* is the highest land in the county. Large quantities of salt hay and some English. 60 miles S.E. of Boston (by water.) *Cl*—John Sanford, D. M. Stearns, c; 2 socs. m. *Phs*—Drs. Pool and Swift. *J. P*—Stephen Homer, Nathan Stone, &c. *Pms*—Nathan Stone; *South*, E. Nickerson; *East*, T. Clark; *West*, L. Childs.

Eastham.

On a narrow part of the cape, 23 miles E. by N. of Barnstable. Pop. 966; r. ps. 222; val. 60 cents; s. m. \$391. First settled, 1644; inc. 1646. *Cl*—Philander Shaw, c; 1 soc. u; 1 soc. m. *J. P*—Samuel Freemann, Joshua P. Atwood, Jesse Collins. *Pm*—E. Cobb. *Comm. of Wrecks*—O. Doane.

Falmouth.

A pleasant town on Vineyard Sound; inc. 1686; pop. 2547; r. ps. 634; val. \$299; s. m. \$700. 71 miles S E. by S. of Boston, 22 S.W. of Barnstable, 4 E. of "Woods' Hole," and 6 N. of Holmes's Hole harbor, on Martha's Vineyard. "Falmouth Bank" has a capital of \$100,000. Elijah Swift, Pt; Samuel P. Crowell, Cr. There are belonging to this town, 7 whale-ships, and about 40 sail in the coasting trade and fishery. Two streams afford a water power, on which are one woolen factory and two carding machines. There are about 40 ponds in this town. *Cl*—Josiah Bent, Jr., and 2 v. c; 1 soc. friends; 1 soc. b; 1 soc. m. *Phs*—Aaron Cornish, and Dr. Sherman. *Att*—Z. Bennett. *J. P*—Ward M. Parker, S. P. Crowell, Elijah Swift. *Pms*—S. P. Crowell; *West*, S. Dillingham; *North*, Ebenezer Nye; *East*, J. Robinson. *Commissioner of Wrecks*, Thomas Fish.

Harwich.

On the S. side of the cape, 14 miles E. of Barnstable. Inc. 1694; pop. 2464; r. ps. 566; val. \$133; s. m. \$945. 12

miles N.E. by E. of Hyannis harbor. This place has about 40 sail of fishing and 12 coasting vessels. 450 hogsheads of salt and some Glauber salts were made here in 1834. On *Herring river*, the outlet of Long Pond, are a cotton mill and carding machine. *Cl*—Seth Ewer, b; 1 soc. m; 1 v. soc. c. *Phs*—G. J. Pratt, James L. Mayo. *J. P*—James Long, Obed Brooks. *Pms*—Obed Brooks; *South*, J. P. Nickerson; *East*, David Snow; *West*, Elijah Chase. *Commissioner of Wrecks*—Anthony Kelley.

Marshpee.

An ancient Indian territory, and an incorporated district of the commonwealth, of 10,500 acres, or about 16 square miles. It lies 12 miles S.E. of Barnstable, 8 S.S.E. of Sandwich, and 8 E. of Falmouth. It is bounded on the S. by the ocean. There are 350 colored inhabitants on this territory, and some whites. There now remain only seven inhabitants of pure blood of the Fathers of the forest. Their land is good for grain of all sorts, and is well wooded. The territory is pleasant, and some parts of it afford beautiful scenery. The Marshpee and Quashmet are considerable streams, which, with numerous ponds and the ocean, afford an abundant supply of fish of various kinds. These people live by agricultural pursuits, the manufacture of various articles of Indian ware, by the sale of their wood, and by fishing, fowling, and taking deer. They are docile and hospitable;—they appear to relish moral and religious instruction, and under the superintendance of a humane and intelligent commissioner, appointed by the state, they are prosperous and happy. This is the largest remnant of all the tribes of red men, who, 215 years ago, were fee simple proprietors of the whole territory of Massachusetts! *Cl*—Phineas Fish, c (a white man); Joseph Amos, b (a colored man, blind from his birth.) Their medical aid is derived from the neighboring towns. *State Commissioner*, Charles Marston, of Barnstable.  *Herring Pond Indians*—see Plymouth county.

Orleans.

Taken from Eastham, 1797. Pop. 1799; r. ps. 442; val. \$1 08. 20 miles E. of Barnstable. This town extends across the Cape, and has about a dozen coasting and fishing vessels. Several islands in Pleasant Bay belong to this town. 2000 hogsheads of salt were made here in 1834. *Cl*—Enoch E. Chase, b; Ezekiel Vose, u; M. Pratt, c. *Ph*—Benjamin Seabury. *Att*—John Doane. *Pms*—Elijah Knowles; *East*, (new office.) *South*, S. Sparrow, 3d. *Comm. of Wrecks*—Daniel Comings.

Provincetown.

A noted fishing town on the *thumb* of Cape Cod, 3 miles S. E. of Race Point. It forms Cape Harbor, in Cape Cod bay, 50 miles N.E. of Barnstable, and 50 S.E. of Boston, by water. The harbor opens on the S.E., is excellent for the largest ships, and was the first harbor the "Mayflower" touched at on her passage to Plymouth, in 1620. This place has about 6000 tons of fishing, and 400 tons of coasting vessels, besides one whaling ship. The fares of fish, in 1834, amounted to about 45,000 quintals of cod, and 17,000 barrels of mackerel. 5000 hogsheads of salt were made here the same year. This place gives employment to about 1000 men and boys. One sperm candle factory. The "Fishing Ins. Co." has a capital of \$40,000; John Adams, Pt., D. Fairbanks, Sec. Inc. 1727; pop. 1710; r. ps. 457; val. \$132; s. m. \$1000. *Cl*—Nathaniel Stone, c; A. B. Cleverly, u; 1 soc. m. *Att*—Jason Reed. *J. P*—John Atkins, Solomon Rich. *Phs*—Josiah Whitney, Henry Willard, John L. Lothrop. *Deputy Collector*—Thomas Lothrop. *Pm*—T. Lothrop. *Commissioner of Wrecks*—John Adams.

Sandwich.

This town lies on the *shoulder* of Cape Cod, and extends across the cape. It is watered by a number of streams, which afford a good water power, on which are a cotton mill, a woolen factory, a furnace, a nail factory, three carding machines, &c. Here is also an extensive manufactory of glass. In this town are numerous ponds, and some of them very large, which afford fine fishing and fowling. An abundance of deer is found in this vicinity. To the lovers of rural sport, this place and Barnstable have become justly popular. It is 12 miles S.W. of Barnstable, 30 E. of New-Bedford, and 53 S.E. of Boston. Inc. 1639; pop. 3367; r. ps. 774; val. \$346; s. m. \$1000. This place has a good harbor on Massachusetts bay. It has 15 or 20 sail of coasting and fishing vessels; and there is annually made here a considerable quantity of salt. It is proposed to unite Massachusetts and Buzzard's bays by a ship canal through this town. The distance is five miles, and the route level. The advantages to be derived from a work of this kind need not be told; they are seen at a glance. *Cl*—J. M. Merrick, A. Yarmouth.

This town extends across Cape Cod, and has a harbor on each side. There are about 25 sail of fishermen belonging to this place, and about 50 coasting vessels. In 1834, 7,500 hhds. of salt were made in this town, and 800 bbls. of Glauber and Epsom salts. Considerable cordage is manufactured here. *Bass river*, issuing from several ponds, furnishes a small water power. “Barnstable Bank,” in this town, has a capital of \$150,000; David Crocker, Pt., Timothy Reed, Cr. 72 miles S. BERKSHIRE COUNTY.

THIS County was incorporated in 1770. Pop. 1820, 35,666, 1830, 37,825; r. ps. 9,375; val. \$38 00; area, 860 sq. miles; central lat. 42° 25' N.; lon. 72° 55' W. Bounded N. by Bennington Co. Vt.; W. by Rensselaer and Columbia Cos. N. Y.; S. by Litchfield Co. Ct.; and E. by Franklin, Hampshire and Hampden Cos. Mss. This county is rough and hilly in many parts, but it affords considerable very fine land, and produces much wool, and all sorts of grain, and exports great quantities of beef, pork, butter, &c. It is the most elevated county in the state. The Green and Taconick Mountains cross it from N. to S.; the average height of which is about 1200 feet above the level of the sea. The Housatonick and Hoosick are its chief rivers;—the former empties into Long Island Sound; the latter into the Hudson.—30 towns; 42 inhabitants to a sq. mile. “This county possesses in rich and inexhaustible abundance, three of the most important articles of the commerce of the world, *Iron, Marble and Lime*, and its wood and water power are fully sufficient to enable it to fit them for the purposes of life.” The tonnage of this county to its marts of trade, principally on the Hudson, amounted, in 1834, to no less than 34,075 tons. This fact was elicited by an inquiry into the probable amount of transportation a railroad from West-Stockbridge to Albany would annually receive. The enterprize of a railroad from Boston to Albany will probably soon be accomplished, and cannot fail of being exceedingly beneficial, not only to this county, but to the commonwealth at large. In 1833, 445,335 bbls. of flour were imported into Boston, round Cape Cod. The freight, insurance, detention and damage could not average less than 50 cents a barrel. 967,813 barrels of flour passed Utica for Albany, the same year. Allowing all the flour annually imported into Boston was to pass from the Hudson on the railroad, (*in 14 hours fresh from Albany,*) at 50 cents a barrel, an interest of 6 per cent. would accrue, by that single article, on a capital of nearly 4 million dollars.*

Adams.

This is a flourishing agricultural and manufacturing township, comprising two villages, north and south, whose trade goes to New-York. It is 40 miles E. of Troy, 120 W.N.W. of Boston, 29 N. of Lenox, and 7 miles S.E. of Williamstown college. The Hoosick river passes through this town, and affords a great water power. There are in this town 20 cotton mills, making annually about 4,000,000 yards of cloth, 4 sateen factories, making about 150,000 yards; and 2 calico printing establishments, producing about 100,000 pieces annually. Besides these, which produce, by estimation, an annual value of between 6 and 700,000 dollars, there are 4 cotton and woolen machine shops, 4 small furnaces, 2 tin and sheet iron works, and 4 large tanneries. Between 1746 and 1756, this town was the scene of much Indian warfare. Traces of old *Fort Massachusetts* are still found. *Saddle Mountain*, the summit of which is called *Gray lock*, the highest of Massachusetts mountains, lies chiefly in this town, and, although it is 3,600 feet above the level of the sea, is of easy ascent. A view from *Gray lock* probably gives "an idea of vastness and even of immensity" better than any other landscape in New-England. Mt. Washington, in N. H. excepted. The natural bridge on *Hudson's Brook*, in this town, is a curiosity worthy the notice of travellers. The waters of this brook have worn a fissure from 30 to 60 feet deep and 30 rods in length, through a body of white marble, or limestone, and formed a bridge of that material, 50 feet above the surface of the water. There is a cavern in this town, 30 feet long, 20 high, and 20 wide. The "Adams Bank" has a capital of \$100,000; Caleb B. Turner, Pt. William E. Brayton, Cr. Inc. 1778; pop. 1820, 1836—1830, 2648—1834, 3000; r. ps. 693; val. \$2 67. *Atts*—N. Putnam, Thomas Robinson, Daniel Parish, C. B. Penniman. *Phs*—Drs. As we are so near the beautiful valley of New-Lebanon and its tepid spring, we will step over into the "emporium state" and point out some of the roads and distances.

New-Lebanon, N. Y. is in the county of Columbia, and situated in a delightful valley, surrounded by cultivated hills, which present scenery greatly variegated and peculiarly pleasing. A community of shakers, of between 500 and 600, own about 3000 acres of excellent land in this township, which is highly improved by this industrious, hospitable, and curious people. Their village is about two miles southeast of the springs. The springs are on the side of a hill, and are so abundant as to supply a small water power. The waters are tasteless, pure as crystal, and appear to differ in no respect from other pure mountain waters, except in temperature, which is always at 72° of Fahrenheit. This is a great resort for visitors from all directions;—some to enjoy the romantic scenery with which this region abounds, and others the benign influence of the waters. The public resorts are well located, and afford excellent accommodations. This place is 134 miles W. of Boston, 24 E. of Albany, 25 N.E. of Hudson, 7 W. of Pittsfield, 23 S. by W. of Williamstown, 156 N. by E. of New-York, and 68 N.W. by W. of Hartford.

[] The falls of Montmorency, of 246 feet perpendicular, are 9 miles below Quebec. The sheet of water is about 100 feet in width, and in full view from the St. Lawrence river. This cataract derives its celebrity more from its height, than from the quantity of water.

From Albany to Saratoga.

From Albany to Schenectady, (by railroad,) 16 miles—to Ballston Spa, 29—Saratoga Springs, 36 miles. The village of Saratoga is about 90 miles E. of Utica, and 37 S.W. of

Whitehall, at the junction of Lake Champlain and the northern canal.

The mineral springs at Ballston and Saratoga are numerous, but generally contain the same substances, only in a greater or less quantity. The most celebrated of these springs is the *Congress*, at Saratoga, which has given, in analysis, 471,5 grains muriate of soda; 178,4 3-4 carbonate of lime; 16,5 car. of soda; 3,3 1-1 car. of magnesia, and 6,1 3-4 car. of iron, to one gallon of water: carbonic acid gas, 343 cubic inches. Temperature through the year, 50° of Fahrenheit.

☞ *Trenton Falls*, on West Canada Creek, 70 ms. W.N.W. of Saratoga, and 12 N. of Utica, are much visited on account of the beauty and grandeur of the scenery. A considerable stream passes through a narrow chasm, between three and four miles, in some places 150 feet deep, forming a succession of very beautiful cataracts. The largest is about 50 feet. This chasm is formed of limestone, and the walls are so regular that they have the appearance of mason work. A variety of marine shells and petrified animals are found embeded in the rocks.

☞ *Cohoes Falls*, on the Mohawk river, 25 miles S. of Saratoga, and 10 N. of Albany, are worthy the notice of travellers. The river at this place is about 350 feet wide, and, at high water, presents a perpendicular fall of 70 feet.

This place is mountainous: it has much wild scenery, and a good water power.

BRISTOL COUNTY.

THE surface of this county is somewhat broken, but generally level. Its soil in many parts is of an inferior quality. Area, 600 sq. miles. It has a maritime coast of considerable extent, and its people are extensively engaged in navigation. The tonnage of the two districts in this county (New-Bedford and Dighton) is 75,188 tons. This county gives rise to many important streams that fall into Massachusetts and Narraganset bays, and its water power is abundant in almost every town. It abounds in excellent iron ore, and in no section of our country, of its extent, are more extensive manufactures of that material, for almost all the uses of man. This county is bounded N. by Norfolk Co.; E. by Plymouth Co.; S.E. by Buzzard's Bay; and W. by the counties of Providence, Bristol, and Newport, R. I. In King Philip's time this part of the country was called *Pawcunnaucutt*. It was inc. 1685; pop. 1820, 40,908—1830, 49,474; r. ps. 11,527; val. \$58 62. Cent. lat. 41° 15' N., lon. 70° 55' W. The Taunton and Pawtucket, both emptying into Narraganset bay, are its chief rivers.—19 towns; 82 inhabitants to a square mile.

Attleborough.

This town is at the N.W. corner of the county; 12 miles N. of Providence, 8 N.W. of Taunton, and 28 S. of Boston. A branch of the Pawtucket rises here, and several other rivers pass through the town. Fine water power. It was inc. 1694; pop. 3215; r. ps. 748; val. \$3 07. In this town are 8 cotton mills, with about 13,000 spindles, and 350 looms, employing 420 hands. There are also an extensive metal button factory, employing 75 hands, and considerable manufactories of jewelry, glass buttons, shuttles, and straw hats. *Cl*—John Furgerson, Charles Simmons, and S. Fall River.

This town took the name of *Troy* in 1803. In 1834, the name was changed to that of the river within its borders, at the junction of which and Taunton river the town is very pleasantly situated. This town is without a parallel on the continent of America in regard to the union of hydraulic powers and navigable facilities. Fall river rises in *Wattuppa Ponds*; one of which is 11 miles in length and 1 in breadth. These ponds are produced by perpetual springs, and lie about two miles east of the town. The descent of this river is 136 feet. The volume of water is constant, not liable to excess, and of sufficient power for the largest manufactories. In this town are 9 cotton factories, with 31,000 spindles, and 1,100 looms; 2 printing establishments, furnishing 5,000,000 yards of calico annually; 1 satinet factory, making 250,000 yards annually; 1 rolling and slitting mill, making annually 700 tons of nails. There are also one iron foundry, and two machine shops. The number of operatives in the manufacturing establishments is 1,768. The price paid for labor is \$316,175, and the cost of stock and materials manufactured is \$1,122,583, annually. The "Fall River Bank" has a capital of \$200,000—David Anthony Pt.; M. C. Durfee, Cr. The "Fall River Insurance Company" has a capital of \$100,000—John Eddy, Pt. The harbor on Taunton river is safe and easy of access, and of sufficient depth of water for the largest ships. Two ships from this port are engaged in the whale fishery. It has also some merchant and coasting vessels. A marine railway was constructed here in 1834. Population, 1830, 4159—1834, 5,500; r. ps. 956; val. \$4 82. 18 miles N.E. of Newport, 12 E. by N. of Bristol, 18 S.E. of Providence, 14 W. of New-Bedford, 17 S. of Taunton, 49 S. of Boston, and 190 E. N.E. of New-York. This town has an abundance of fine granite, equal to the Quincy. A railroad is in progress, to meet

the Boston and Providence, at Seekonk, 13 miles. The *Pocasset Hotel*, belonging to a company of gentlemen, is a splendid building, constructed in 1833. No house in the country affords better accommodations. A regular steamboat line is established between this place and Providence:—Distance, by water, 28 miles. *Cl*—Orin Fowler, G. W. Briggs, c; Simeon Clough, c.n; Asa Brunson, b. There is a large society of friends in this town, and a society of methodists. *Phs*—E. Glazier, J. H. Archer, F. Hooper, Thomas Wilbour, N. Durfee, B. New-Bedford.

This is a half shire town of Bristol County, and port of entry, pleasantly situated on the west side of the Acushnet, a river, or more properly an estuary, connected with Buzzard's Bay. The ground on which the town stands rises rapidly from the river, and affords an interesting view from the opposite side.

This harbor, though not easy of access, is capacious and well secured from winds. A wooden bridge, near the centre of the town, connects it with the village of Fairhaven. A ferry has also been established, on which it is proposed to run a steamboat.

New-Bedford was incorporated in 1787, previous to which it constituted a part of the town of Dartmouth. In 1812, the eastern part was set off as a separate township by the name of Fairhaven.

The almost exclusive business of the place is the whale fishery, which commenced before the war of the revolution, and has gradually grown to its present importance. The increase, however, within the last ten years has been more rapid than during any former period. The number of ships and brigs now employed is 141. Tonnage of the district, 70,550 tons.

There are ten oil manufactories, at which a large amount of oil and candles is made. A considerable quantity of the oil imported is, however, sold in the crude state to other places.

Few places in Massachusetts have increased in population more rapidly than this. By the census of 1790, the population of the village was about 700. In 1830, the township contained 7592—in 1833, 9,200 ; r. ps. 1746 ; val. \$14 85 ; s. m. \$8,250. Within a few years, the inhabitants of this town have manifested a commendable liberality in providing the means of education. There are in the town an academy, 16 public and a number of private schools,—some of them of high rank. This town has 4 banks, with a capital of \$1,300,000, and an insurance capital of \$400,000. It lies 52 miles S. of Boston, 52 N.W. of Nantucket, and 214 N.E. by E. of New-York. *Cl*—Sylvester Holmes, James A. Roberts, Daniel C. Burt, c ; John O. Pawtucket.

An important manufacturing village, below the falls on a powerful river of that name. The *village* of Pawtucket lies on both sides of the river—and including the North Providence side, in R. I., contains about 6000 inhabitants. The first manufacture of cotton cloth in this country, by water power machinery, was commenced at this place. The water power is immense, and the fall of the river within a short distance is 50 feet. There are now in the village of Pawtucket 12 cotton factories with 35,000 spindles and 1000 looms. The Franklin calico printing works do a great business. There are also 5 machine shops and a number of iron works. About 2000 operatives are employed in these establishments. The river is navigable to the village for vessels of considerable burthen. It runs 4 miles S. by W. to Providence river, at India Point—one mile below the centre of the city of Providence. The river, *above* Pawtucket, takes the name of *Blackstone*. This place is 4 miles N. of Providence, 36 S. of Boston, 16 W. by S. of Taunton, and 38 S.E. of Worcester. The *town* lies on the east side of the river, is two miles square, and was taken from Seekonk, in 1828. Pop. 1458; r. ps. 335; val. \$140; s. m. \$300. "Pawtucket Bank" has a capital of \$100,000—A. Raynham.

This town lies on Taunton river, and was taken from Taunton in 1731. Pop. 1209; r. ps. 278; val. \$117. It is 30 miles S. of Boston, 3 N.E. of Taunton, and 24 E. of Providence. There are a number of large ponds in this town producing a good water power, and to which vast quantities of herring (alewives) resort. On the banks of one of these ponds the celebrated King Philip had a hunting house. The first forge in America was erected in this town, by James and Henry Leonard, in 1652. The house of the Leonards, an old Gothic building, is now standing, and owned by the 7th generation. Here are a large shovel factory, a wire mill, and a furnace; also a nail factory, which has produced eleven tons of nails daily. Good iron ore. *Cl*—Enoch Sanford, Simeon Daggett, c; 1 v. soc. b. *Ph*—Elisha Hayward. *J. P*—G. Robinson, Amos Hall, E. B. Dean, John Gilmore.

Taunton.

This beautiful place, a shire town of the county, is at the head of sloop navigation, on the river whose name it bears. It lies 32 miles S. of Boston, 20 E.N.E. of Providence, 32 N. N.E. of Newport, and 415 miles from Washington. This place has an abundant water power, by the junction of Canoe and Rumsford rivers with the Taunton, which is well improved for manufacturing purposes. In this town are 8 cotton factories, a large establishment for printing calico, a large forge, and factories for making nails, wire, hoop iron, tacks, brads, sheet zink, for the covering of houses; coaches and chaises, &c. &c. There are about 30 sail of coasters, of considerable burthen, which ply between this and the neighboring ports. A railroad is in progress between this place and Boston. When this is accomplished and the improvements on Taunton river are completed, another safe and easy route, by steam, between the capitals of New-England and New-York will be effected. This place has three banks:—"Taunton," capital \$250,000—Samuel Crocker, Pt.; Samuel B. King, Cr. "Bristol County," capital \$100,000—Wm. A. Crocker, Pt. "Cohannet," capital \$100,000—D. DUKES COUNTY.

THIS county is formed of the islands of Martha's Vineyard, Clappequiddick, Elizabeth Islands, and No Man's Land—the latter of which is the southern extremity of Massachusetts. These islands lie off and south of Barnstable county and Buzzard's bay, and contain about 120 square miles. The principal island, Martha's Vineyard, the Indian *Nope*, or *Capawock*, was first settled by the whites, at Edgarton, in 1641, and is 21 miles in length and 6 in breadth. Although a large portion of this county is woodland, and many of the people engaged in the fisheries and coasting trade, yet considerable exports are annually made of wool, woollen cloth, salt and grain. This county suffered much during the revolutionary war. In 1778, the people were compelled to surrender their fire arms and 2,300 head of cattle to the British. Inc. 1695; pop. 1820, 3,292—1830, 3,518; r. ps. 1822; val. \$336. Central lat. 41° 25' N.; lon. 70° 25' W.—3 towns; 30 inhabitants to a square mile.

CHilmark.

This town lies on the S. and W. part of Martha's Vineyard. *Gay Head*, in this town, is the south point of the island; it is 150 feet above the sea, and is crowned with one of the five light-houses in this county. *Gay Head* is about 60 miles E.N. E. of Montauk, on Long Island, and bears marks of having been subject to volcanic eruptions. This place abounds in specimens of minerals worthy the notice of geologists. This part of the island is inhabited by some descendants of the native Indians, who own part of the lands. Inc. 1714; pop. 691; r. ps. 185; val. 95 cents; s. n. §325. 92 miles S.E. of Boston, 33 W. of Nantucket, 23 S.E. by S. of New-Bedford, and 12 S.W. by S. of Edgarton. *Cl*—1 v. soc. c; 1 soc. m. *J. ESSEX COUNTY.

THIS county is bounded N.W. by Rockingham county, N.H., S.W. by Middlesex county, E. and N.E. by the Atlantic ocean, and S.E. by Massachusetts Bay. There is much good land in this county, but its surface is rocky and uneven. It has an extensive sea coast, indented with numerous bays, inlets, and capacious harbors. It is more densely populated than any county of its size in the United States. It has great wealth, and its commerce and fisheries are unrivalled by any section of country, of its extent, on the globe. Inc. 1643; pop. 1820, 73,930—1830, 82,887; r. ps. 20,664; val. \$120 64; area, 360 sq. miles. Cent. lat. 42° 40' N.; lon. 70° 45' W. The tonnage of the five districts in this county is 72,653 tons. Its bank and insurance capital amounts to six million of dollars. Its chief rivers are the Merrimack and Shawsheen.—26 towns; 230 inhabitants to a square mile.

Amesbury.

On the N. side of the Merrimack river. Taken from Salisbury in 1668, and separated from it by Powow river. Pop. 2,445; r. ps. 653; val. \$2 64; s. m. \$1,200. 40 miles N.E. of Boston, 6 N.W. of Newburyport, 7 N.E. of Haverhill, and 27 N.E. of Salem. A pond, covering about 1000 acres, back of the town, 90 feet above the sea, serves as a reservoir for a constant and extensive water power. There are in this town 2 large flannel factories, a satinet factory, an extensive establishment for building coaches and chaises, and considerable ship building. About half of the population of this town is engaged in mechanical labor. Josiah Bartlett, M.D. one of the signers of the declaration of independence, was born here Nov. 1729. He died May 19, 1795. *Cl*—Benjamin Sawyer, Peter S. Eaton, Joseph H. Danvers.

This town is 2 miles N.W. of Salem, to which it was attached until 1757, and called "Salem village." It has some water power:—a rolling and slitting mill, 14 nail machines, a foundry, and other mechanical operations by water. The manufacture of leather and shoes is carried on at this place to a large extent. There are 32 tanneries in this town, and it is estimated that the annual sales of leather and shoes exceed \$750,000. This place affords good clay, and large quantities of bricks and pottery ware are annually made. Good granite. The "Danvers Bank" has a capital of \$150,000—William Sutton, Pt.; L. Lakeman, Cr. The "Warren Bank" has a capital of \$120,000—Jonathan Shove, Pt.; A. K. Osborne, Cr. The "Mutual Fire Insurance Company" has a capital of \$100,000—Ebenezer Shillaber, Pt.; J. G. Essex.

At the head of Chebacco river, running into Squam Bay, 5 miles N.W. of Gloucester. This town was taken from Ipswich in 1819, from which it lies 5 miles S.E. This place has some concern in the fisheries, and many vessels of from 50 to 120 tons are built here. Considerable manufacture of bricks and cod lines. 13 miles N.E. of Salem. Pop. 1345; r. ps. 336; val. \$1 67; s. m. \$600. *Cl*—Robert Crowell, c; 1 soc. b; 1 soc. u. *Ph*—Josiah Lamson. *J. P*—Jonathan Story, John Dexter, David Choate. *Pm*—Amos Burnham.

Gloucester.

A maritime township, comprising the whole of Cape Ann, and celebrated for the enterprize of its people in the fisheries and commercial pursuits. It is the oldest fishing establishment in the state. This cape extends about 8 miles into the sea, and forms the northern boundary of Massachusetts Bay. Its harbor is capacious, easy of access at any season, and of sufficient water for ships of great burthen. Gloucester harbor and the chief settlement are on the south side. Sandy and Squam bays lie on the north side, about 4 miles from the south harbor, and afford harbors for small vessels. The lights on Thatcher's Island bear about northeast 6 miles from East Point, the eastern boundary of Gloucester harbor. (The Isles of Shoals bear from Thatcher's Island, N. by W. about 25 miles.) As early as 1794 the exports from this place, in one year, amounted to \$230,000. The present tonnage of the district is about 14,000 tons. Here are immense quarries of light and grayish granite, which is split with great ease, and in large, regularly formed blocks. This stone is of a fine grain, is easily dressed, and can be put on board of vessels with little expense. The demand for this stone is rapidly increasing, and the quarrying, hammering, and transporting it gives employment to many men and vessels. The canal across the neck of the cape, has failed of that success which was anticipated. "Gloucester Bank" has a capital of \$200,000—William W. Parrott, Pt.; Henry Smith, Cr. The "Gloucester Marine Insurance Company" has a capital of \$100,000—William Pearce, Pt.; William Saville, Sec'y. Hamilton.

This town is 4 miles S. of Ipswich, 8 N. by E. of Salem, and 20 N. by E. of Boston. A veneering saw mill and linseed oil factory. The people are principally engaged in farming. Taken from Ipswich, 1793; pop. 743; r. ps. 175; val. \$1 04; s. m. \$400. *Cl*—G. W. Kelley, c; 1 soc. u. *Ph*—Oliver Creasey. *J. P*—Dr. Creasey and M. Whipple. *Pm*—J. D. Brown.

Haverhill.

This town lies on the north side of Merrimack river, at the head of navigation, and is united to Bradford and West-Newbury by two beautiful bridges. It is 28 miles N. of Boston, 20 N.N.W. of Salem, 12 W. by S. of Newburyport, 18 N.E. of Lowell, and 27 S.W. of Portsmouth, N. H. *Little river* affords a water power on which is a flannel factory in successful operation. The "Merrimack Bank" has a capital of \$270,000—David Marsh, Jr. Pt.; L. White, Cr. *Pms*—James Gale; *Eust*, John Johnson, Jr. This beautiful town has considerable commerce, navigation, ship building, and large manufactories of shoes and hats. First settled, 1641; inc. 1645; pop. 3,912; r. ps. 962; val. \$4 81; s. m. \$2,000. A railroad is in progress to meet the Boston and Lowell railroad at Wilmington, via Andover—18 miles. *Cl*—Nathaniel Gage, Joseph Whittlesey, A. Cross, S. H. Ipswich.

A port of entry and shire town—the *Agawam* of the Indians.—12 miles N. by E. of Salem, 10 S. of Newburyport, and 26 N.E. by N. of Boston. This place has about 20 sail of fishing and coasting vessels. "Ipswich Bank" has a capital of \$100,000—Thomas Manning, Pt. *Pm*—Stephen Coburn. In 1790, 42,000 yards of thread and silk lace were made, by hand, in this town. Since that time, some has been made by machinery. *Cl*—David T. Kimball, Daniel Fitz. and 1 v. soc. c; 1 soc. m. *Phs*—Thomas Manning, George Chadwick, S. Strong. *Atts*—Asa Andrews, E. F. Miller. *Collector*—Timothy Southey. First settled, 1633; inc. 1634; pop. 2,951; r. ps. 678; val. \$3 10; s. m. \$1,400.

Lynn.

This town has a small and convenient harbor on Massachusetts Bay, and is watered by the *Saugus*, a river, by which name the town was formerly called by the Indians. This town has long been celebrated for its manufactures of various kinds, particularly of shoes, of which there is probably a larger amount made than in any other town of its population in the United States. It lies 9 miles N.E. of Boston, and 5 S.W. of Salem. It was first settled, 1629; inc. 1637; pop. 6,138; r. ps. 1639; val. \$5; s. m. \$3,800. The "Lynn Mechanics' Bank" has a capital of \$150,000—Isaiah Breed, Pt.; Isaac Story, Cr. The "Nahant Bank" has a capital of \$150,000—Hezekiah Chase, Pt. The "Lynn Mechanics' Insurance Company" has a capital of \$50,000—Isaiah Breed, Pt. The "Union Insurance Company" has a capital of \$100,000—Henry A. Breed, Pt. *Cl*—David Peabody, S. D. Coffin, Richard Hazeltine, John Lummus, William Prescott, N. C. Towle. *Atts*—See *Law-Register*. *Pm*—Jeremiah C. Stickney.

☞ *Nahant*, the celebrated watering place, is a part of this town. It is a peninsula, jutting out about five miles into Massachusetts Bay, and forms Lynn Bay on the south. From Boston to Nahant Hotel, on the eastern point of the peninsula, by land, is 14 miles; from the centre of Lynn, 5; and from Salem, 10 miles. On the northeast side of this peninsula is a beach of great length and smoothness. It is so hard that a horse's foot-steps are scarcely visible; and, from half-tide to low water, it affords a ride of superior excellence. Much may be said in praise of Nahant without exaggeration. Our limits will only permit us to remind the traveller that such a place exists;—that it is only 10 miles northeast of Boston by the steamboats continually plying in summer months;—that at this place are good fishing and fowling—excellent accommodations;—and that the ocean scenery is exceedingly beautiful in fair weather, and truly sublime in a storm.

Lynnfield.

Pop. 617; r. ps. 158; val. 65 cents; s. m. \$400; inc. 1782. 12 miles N. of Boston, 9 W. by N. of Salem, and 22 S.S.W. of Newburyport. On *Bates's Brook* is a woollen factory. Considerable quantities of shoes are manufactured here. *Cl*—Josiah Hill and 1 v. soc. c; 1 soc. m. *J. P*—Daniel Needham, Asa T. Newhall, Bowman Viles.

Manchester.

A fishing town on Massachusetts Bay, with about 1000 tons of shipping. There are in this town 9 cabinet shops, and a mahogany veneering mill, giving employment to 120 hands, assisted by a small water power. Taken from Salem, 1645; pop. 1238; r. ps. 328; val. \$142; s. m. \$560. The Magnolia, a beautiful flowering tree, is indigenous. *Cl*—S. M. Emerson, c; 1 soc. u. This town was without a regularly organized church for 70 years. *Ph*—Asa Story. *J. P*—David Colby. *Pm*—D. L. Bingham. 26 miles N.E. of Boston, and 5 S.W. of Gloucester.

Marblehead.

A noted fishing town, on a rocky point of land extending into Massachusetts Bay, with a hardy and intrepid crew of fishermen and sailors. The harbor is commodious and easy of access. The quantity of fish exported from this place in 1794, amounted to \$164,532. Since that time the fishing business has greatly increased, and this place has now become one of the largest fishing ports on the American coast. There belong to this place from 90 to 100 sail of fishing, coasting and merchant vessels. Tonnage of the district, 7,200 tons. First settled, 1631; inc. 1649; pop. 5,150; r. ps. 1,376; val. \$656; s. m. \$2,500. The "Marblehead Bank" has a capital of \$120,000—John Hooper, Pt.; Samuel S. Trefry, Cr. The "Grand Bank" has a capital of \$100,000—Joseph W. Green, Pt.; John Sparhawk, Cr. The "Marblehead Insurance Company" has a capital of \$100,000—N. L. Hooper, Pt.; S. S. Trefry, Sec'y. The "Fire and Marine Insurance Company" was incorporated in 1835—capital, \$100,000. *Cl*—Samuel Dana, John Bartlett, c; William H. Lewis, e; Mr. Hervey, b; 1 soc. m. *Phs*—Calvin Briggs, Chandler Flagg, John S. Bartlett. *Att*—Nicholas Devereaux. *Collector*—Franklin Knight. *Pm*—F. Robinson. It lies 14 miles N.E. of Boston, and 4 S.E. of Salem.

Methuen.

This town lies on the north bank of Merrimack river, 9 ms. N.E. of Lowell, 18 W.S.W. of Newburyport, 20 N.W. by N. of Salem, and 25 N. by W. of Boston. In this town is a beautiful water-fall on *Spicket river*, of 80 feet, which furnishes a good water power. It has two large cotton factories and a paper mill. Large business is done here in the manufacture of tin ware and shoes. *Cl*—Charles O. Kimball, b; S. G. Pierce and 1 v. soc. c; 1 soc. e; 1 soc. u; 1 soc. m. *Phs*—John M. Grosvenor, Stephen Huse, A. Middleton.

A pleasant town on both sides of Ipswich river, 7 miles N. W. of Salem, 19 N. of Boston, and 18 S.S.W. of Newburyport. In this place is probably the largest and most expensive paper mill in the country. Pop. 607; r. ps. 170; val. 78 cts; s. m. \$340; inc. 1728. *Cl*—Forest Jefferds and 1 v. soc. c. *Ph*—Ezra Nichols. *J. P*—Daniel Fuller, Pelatiah Wilkins.

Newbury.

This ancient town is on Merrimack river, opposite to Salisbury. A part of Plum Island is attached to it. It is of excellent soil and highly cultivated. Its high grounds present some very beautiful scenery. It is the birth-place of many eminent men. Theophilus Parsons, the celebrated jurist, was born in this town, Feb. 24, 1750. He died in Boston, Oct. 6, 1813. The parish called "Byfield," is in this town and Rowley. "Dummer Academy," founded in 1756, is in good standing. This town is watered by *Parker* and *Artichoke* rivers, on which are one cotton factory and two snuff mills. Considerable ship and chaise building. Serpentine and limestone. In a curious cave, called the "Devil's Den," asbestos is found. Inc. 1635; pop. 3803; r. ps. 841; val. \$4 35. 31 miles N. by E. of Boston, 17 N. of Salem, and 3 miles S. of Newburyport. *Cl*—James Miltimore, John C. March, Henry Durant, Leonard Withington, c; some friends; 1 soc. m; 1 v. soc. b. *Ph*—M. Root. *J. P*—John Merrill, and others.

Newburyport.

This is considered one of the most beautiful towns in New-England. It lies on a gentle acclivity, on the south bank of the Merrimack, at the union of that river with the ocean. In point of territory, it is the smallest town in the commonwealth, being only one mile square. It was taken from Newbury in 1764; pop. 6,388; r. ps. 1469; val. \$10 28; s. m. \$4,000. It is a county town and port of entry. The "Mechanics Bank" has a capital of \$200,000—E. S. Rand, Pt.; J. Andrews, Jr., Cr. The "Merchants Bank" has a capital of \$300,000—Henry Johnson, Pt.; Samuel Mulliken, Cr. The "Ocean Bank" has a capital of \$200,000—H. Frothingham, Pt.; E. Plummer, Cr. The "Merchants Insurance Company" has a capital of \$200,000—John Porter, Pt.; Samuel Carr, Sec'y. Jeremiah Nelson, Pt. of the "Mutual Insurance Company," John Harrod, Sec'y. This place has been considerably noted for its commerce and ship building. Some of the old continental frigates were built here; and in 1790 the tonnage of

the port was 11,870 tons. Of late years the foreign commerce of the place has diminished, in consequence of a sand bar at the mouth of the harbor. This place has considerable inland and foreign commerce. It has four whale ships, and a large amount of tonnage engaged in the freighting business and the cod and mackerel fisheries. Tonnage of the district, 20,132 tons. Large quantities of combs are manufactured in this town. It lies 34 miles N. by E. of Boston, 20 N. of Salem, 24 S. by W. of Portsmouth, N.H., and 2 miles S.E. of Essex bridge. Lat. $42^{\circ} 47' N.$; lon. $70^{\circ} 47' W.$ From the mouth of this harbor, *Plum Island*, about a mile in width, extends 9 miles S. to the mouth of Ipswich river. *Cl*—Thomas B. Fox, C. W. Rowley.

On an arm of the sea, on the coast between Ipswich and Newbury. A part of Plum Island belongs to this town. It was incorporated in 1639, and, the same year, the first fulling mill in New-England was erected. The highest land in the county is "Bald Pate Hill"—392 feet above the sea. From this hill a fine view is presented. Pears are much cultivated here. 1000 barrels of Perry are annually made. The tanning and shoe business in this town amounts, annually, to \$500,000. 13 tanneries. Peat. Large tracts of salt marsh. *Cl*—Willard Holbrook, Isaac Braman, c; Jeremiah Chaplin and 1 v. soc. b; 1 soc. u. *Phs*—Benjamin Proctor, Charles Proctor, Richard Herbert, David Mighill, D. Salem.

The *Naumkeag* of the Indians. The chief town in the county, and the second in size and wealth in the state. Port of entry. This town was first settled in 1626. It lies between two small arms of the sea, called North and South rivers. The harbor is excellent, and vessels of 12 feet draft of water may approach the wharves. This is one of the oldest and most respectable marts of commerce in the United States. Its people are noted for their industry, sober habits, and com-

mercial spirit. No sea on the globe has been left unexplored by them. For some years after the settlement of Massachusetts Bay commenced, it was doubtful which would become the capital of the colony—Salem or Boston. The peculiar facilities afforded to Boston harbor, decided the question. This is the birth-place of many eminent patriots, statesmen and jurists. When the cradle of independence was rocked in Boston, the people of *Naunkeag* had the *witchery* to accelerate its motion. This is all the witchcraft the good people of Salem ever possessed, except in common with all the colonists, during the fanaticism of 1692. This town was inc. 1629; pop. 1820, 12,731—1830, 13,886; r. ps. 3194; val. \$37 18; s. m. \$10,500. It lies 14 miles N.N.E. of Boston, 44 S. by W. of Portsmouth, N. H., and 446 miles from Washington. This place is largely engaged in foreign and domestic commerce. Tonnage of the district, 30,293 tons. There are 8 banks in this town with a capital of \$1,850,000. Insurance stock, \$950,000. In this town are a number of institutions for the promotion of literary and pious objects. The "East India Marine Society" was incorporated in 1801. It has a spacious hall, in which is collected a vast number of curiosities from all parts of the world. This splendid museum is open to visitors free of expense. *Cl*—John Prince, Charles W. Salisbury.

This township was granted to Simeon Bradstreet, and others, in 1638, by the name of *Merrimack*. In the year following it was incorporated by the name of *Colchester*, and in 1640 it assumed its present name. Being situated on the ocean, at the mouth of the *Merrimack*, and watered by *Powow river*, Salisbury has become both a maritime and manufacturing town. It is noted for ship building. The "Alliance," an old continental frigate, was built here during the revolution. A number of coasting and fishing vessels belong here. The "Salisbury Manufacturing Company" have two flannel factories in this town. Their capital is \$500,000. When both are in operation they produce 1,872,000 yards annually,

and employ 500 hands. There are also in this town a large tannery, a carding machine, fulling mill, candle factory, &c. There are two villages in this town. *Webster's Point* is near the sea. The upper village is connected with Amesbury, and divided only by the Powow river. It was inc. in 1640; pop. 2519; r. ps. 695; val. \$3 12; s. m. \$1500. 3 miles N. of Newburyport, 37 N. by E. of Boston, 23 N. of Salem, and 7 S. of Hampton Falls, N. H. This town is united to Newbury and Newburyport by two elegant bridges across the Merrimack. *Salisbury beach* is a place of considerable resort. *Cl*—Samuel Norris, b; John Gunnison and 1 v. soc. c; 1 v. soc. e; 1 soc. m; and 2 soc. freewill baptists. *Phs*—Cyrus Dearborn, J. Montague.

This town is on the east bank of Connecticut river, opposite to Deerfield, and united to that town by a bridge. *Turner's Falls*, at the northerly part of the town, are more interesting

than any in the state, and probably as much so as any in New-England. The canal for passing these falls, 3 miles in length and 75 feet lockage, with an immense dam across the river, greatly facilitates the navigation on Connecticut river. This place has a great water power, and promises peculiar advantages to the manufacturing interest. The scenery around this place is romantic and beautiful, and to the lovers of antiquarian lore, full of interesting associations. Northampton.

The Indian *Nonotuck*. This is a very handsome town, delightfully situated on the west bank of Connecticut river. Since the first settlements on the Connecticut basin, this town has been an important point of attraction. The soil of the town is alluvial and its products exuberant. Both before and since the division of the old county into three, this place has been the seat of justice. The buildings are handsome, and the most important offices are *fire proof*. A fine stream passes through the centre of the town, possessing a good water power, on which are manufactories and mills of various kinds.

This place has considerable river and inland commerce, which will probably be increased by the Hampshire and Hampden canal, which meets the Connecticut river here and terminates at New-Haven. There are many institutions of a literary and religious character in this town, and its schools are of the first order. The scenery around this town is enchanting, and those who visit Mount Holyoke, 830 feet above the river, on the opposite shore, find a display of Almighty power probably unsurpassed, in grandeur and beauty, by any spot in New-England. *Cl*—J. Cambridge.

This town may be divided into three parts:—*Old Cambridge*, the seat of the most ancient and best endowed college, now university, in the United States, is 3 miles from West Boston bridge, which divides Cambridge from Boston. *Cambridge-Port* is a compact, flourishing village, about midway between the university and the bridge. *East-Cambridge* is of newer growth, and is a very flourishing place. It is the seat of the county courts, and is immediately connected with Boston by Canal bridge and the viaduct of the Boston and Lowell railroad over Charles river. This town was incorporated by the name of Newton in 1630. It took the name of Cambridge in 1638. The first printing press in America was established here by Stephen Day, in 1639. The first work printed was the "Freeman's Oath." In this town are various and extensive manufactories. Here is the only manufactory of crown glass in the U. States. The "Cambridge Bank" has a capital of \$100,000—S. P. Fay, Pt; Martin Lane, Cr. The "Charles River Bank" has a capital of \$100,000—Levi Farwell, Pt.; John B. Dana, Cr. Harvard College was founded by John Harvard, in 1636. It was incorporated in 1638. It has received numerous and large donations from individuals, and has invariably received the protection and munificence of the state. Its funds at the present time exceed half a million dollars. It is governed by a corporation and board of overseers. Its number of alumni exceeds 5000. The philosophical apparatus, chemical laboratory, anatomical museum, and cabinet of minerals, are all very valuable. The college library contains 42,000 volumes. A botanical garden is attached to the institution. The sciences of theology, law, and medicine have each distinct departments, and courses of lectures on those subjects are annually given. *President*, Hon. Cemetery of Mount Auburn. The beautiful eminence on which this justly celebrated cemetery lies is in the towns of Cambridge and Watertown, about a mile west of the University, and 125 feet above the waters of Charles river. The Massachusetts Horticultural Society, having purchased about 100 acres of land, at this place, for the objects of their society, have been empowered by the legislature to devote a portion of their lands, (not less than forty acres,) as a Rural Cemetery or Burying Ground; to lay it out with gravelled avenues and walks, and to plant and embellish it with all the varieties of shrubbery, flowers and trees, which it is the design of the society to cultivate. Lots of ground of 300 square feet, at suitable distances, along the winding passages, are sold by the society as family burial-places, with the perpetual right to purchasers of enclosing, decorating and using them for that purpose. The price of the lots is \$66 each. About 375 of them are sold.

This cemetery was dedicated September 24, 1831.

We cannot deny ourselves the gratification of quoting a few lines from the *descriptive* part of Judge *Story's* admirable address on that occasion.

'A rural Cemetery seems to combine in itself all the advantages, which can be proposed to gratify human feelings, or tranquillize human fears; to secure the best religious influences, and to cherish all those associations, which cast a cheerful light over the darkness of the grave.

'And what spot can be more appropriate than this, for such a purpose? Nature seems to point it out with significant energy, as the favorite retirement for the dead. There are around us all the varied features of her beauty and grandeur—the forest-crowned height; the abrupt acclivity; the sheltered valley; the deep glen; the grassy glade, and the silent grove. Here are the lofty oak, the beech, that "wreaths its old fantastic roots so high," the rustling pine, and the drooping willow;—the tree, that sheds its pale leaves with every autumn, a fit emblem of our own transitory bloom; and the evergreen, with its perennial shoots, instructing us, that "the wintry blast of death kills not the buds of virtue." Here is the thick shrubbery, to protect and conceal the new-made grave; and there is the wild-flower creeping along the narrow path, and planting its seeds in the upturned earth. All around us there breathes a solemn calm, as if we were in the bosom of a wilderness, broken only by the breeze as it murmurs through the tops of the forest, or by the notes of the warbler pouring forth his matin or his evening song.

'Ascend but a few steps, and what a change of scenery to surprise and delight us. We seem, as it were, in an instant, to pass from the confines of death to the bright and balmy re-

gions of life. Below us flows the winding Charles, with its rippling current, like the stream of time hastening to the ocean of eternity. In the distance, the City,—at once the object of our admiration and our love,—rears its proud eminences, its glittering spires, its lofty towers, its graceful mansions, its curling smoke, its crowded haunts of business and pleasure, which speak to the eye, and yet leave a noiseless loneliness on the ear. Again we turn and the walls of our venerable University rise before us, with many a recollection of happy days passed there in the interchange of study and friendship, and many a grateful thought of the affluence of its learning, which has adorned and nourished the literature of our country. Again we turn, and the cultivated farm, the neat cottage, the village church, the sparkling lake, the rich valley, and the distant hills, are before us through opening vistas; and we breathe amidst the fresh and varied labors of man.

‘There is, therefore, within our reach, every variety of natural and artificial scenery, which is fitted to awaken emotions of the highest and most affecting character. We stand, as it were, upon the borders of two worlds; and as the mood of our minds may be, we may gather lessons of profound wisdom by contrasting the one with the other, or indulge in the dreams of hope and ambition, or solace our hearts by melancholy meditations.’

The United States' Navy Yard was first established in this town about the year 1798. The yard is situated on the north side of Charles river, on a plot of ground of about 60 acres. It is enclosed by a high wall of durable masonry, and contains several ware-houses, dwelling-houses for the officers, and a large amount of naval stores, live oak and other timber. It also contains three large ship-houses, in which are the Vermont and Carolina of 74, and the Cumberland frigate of 44 guns. These ships can be launched and ready for sea in a very short time. The dry dock at this place is of hewn granite, and of unrivalled masonry. It is 341 feet in length, 80 in width, and 30 in depth. It cost \$670,089. This dock was completed and received the *Constitution* on the 24th of June, 1833. Connected with this establishment are a naval hospital and magazine, at Chelsea, now in progress. A large ropewalk is now building in the yard, and other additions are contemplated. This is considered one of the best naval depots in the United States.

The McLean Asylum for the Insane—see Massachusetts Hospital, under Boston.

Bunker Hill Monument. On the 17th of June, 1825, the corner stone of an *Obelisk* was laid on the heights in this town, by the illustrious La Fayette, to commemorate the battle between the Americans and British on the 17th of June, 1775. In that battle, 449 Americans and 1055 Britons were slain. Charlestown was burnt by the British the same day. The site of the Monument is 62 feet above the level of the sea. It is of hewn granite, and, when completed, will be 30 feet square at the base, 15 feet square at the top, and 220 feet in height. It is now raised about 60 feet, and will probably be completed in one or two years. The cost of it will be about \$100,000.

The State Prison. This institution was founded in 1800, and soon after located on a point of land in this town, near East Cambridge, and which is connected with Canal bridge by a lateral bridge of 1920 feet in length. After having struggled with many and great difficulties attendant on the establishment of an institution so entirely new, the state, by the agency of suitable men, have so placed it as to effect all the objects proposed, without any expense to the commonwealth. The disbursements of the institution for the year ending September 30, 1834, was \$29,476; the income, \$37,122;—leaving a balance of profits of \$7,646. The amount of property at

the prison, at that time, belonging to the state, was \$46,954. At that time there were 277 convicts in the prison. Of that number, 7 were sentenced to confinement for less than a year—37 for 1 year—64 for 2 years—39 for 3 years—29 for 4 years—27 for 5 years—6 for 6 years—16 for 7 years—4 for 8 years—1 for 9 years—13 for 10 years—1 for 11 1-2 years—2 for 15 years—1 for 17 years—3 for 20 years—and 27 for life. Of this number, 138 were between 15 and 30 years of age—82 from 30 to 40—16 from 50 to 60—2 from 60 to 70—and 1 from 70 to 80 years of age. Of this number of convicts, 110 were natives of Massachusetts—97 were from other states; 61 were subjects of Great Britain, and 9 were subjects of other countries. 21 of these were negroes—12 mulattoes, and 1 Indian. *Warden*—Charles Lincoln, Jr. *Physician*—Wm. J. Walker. *Chaplain*—Jared Curtis. *Clerk*—Henry K. Frothingham.

Concord.

This town is situated on the river of the same name, 17 miles W.N.W from Boston, 14 S.S.W. from Lowell, 14 from

Harvard College, 30 E.N.E. from Worcester, and 445 from Washington. It lies not far from the centre of the county of Middlesex, of which it is the half shire. This town was the first inland settlement in the colony of Massachusetts Bay. The township was originally six miles square, and derives its name from the harmony in which it was purchased of the natives. Its Indian title was *Musketaquid*. It took an active part in the prosecution of the war against King Phillip, in 1675-6, and in April of the latter year, 10 or 12 of its citizens were killed, in the attack made by the Indians on the neighboring town of Sudbury. The General Court has frequently held its sessions in this town, and in the year 1774 the Provincial Congress selected it as their place of meeting. On the 19th of April, 1775, a detachment of British troops, sent out by Gen. Gage for the purpose of seizing a quantity of military stores, which were deposited here by the Province, were met at the North bridge by the citizens of Concord and the neighboring towns and forcibly repulsed. It was at this spot that the first regular and effectual resistance was made, and the first British life was taken in the war of the revolution. The graves of two of the British soldiers, who were killed at this place, are still marked, and a suitable monument is about to be erected near the site of the bridge to commemorate the event. The principal manufactories are one for cotton and woolen, which is designed to manufacture 5000 yards per week; one for lead, which consumes about 400 tons per year in the manufacture of lead pipe and sheets; two saw mills; two grist mills, carried by water; and a windmill, with two runs of stones. In addition to these, the manufacture of piano fortes, carriages, shoes, black and red lead pencils, soap, candles, and copper pumps is carried on to some extent. This town was incorporated, 1635; pop. 1820, 1788—1830, 2017; r. ps. 481; val. \$250; s. m. \$1550. The "Concord Bank" has a capital of \$100,000—Daniel Shattuck, Pt.; John M. Cheney, Cr. Lowell.

This place is remarkable for the extent of its water power, its rapid growth, and the height to which it has raised the American character by the perfection of its manufactures. In 1815, this town (then a part of Chemsford) was a wilderness, with the exception of a few lonely dwellings. It lies on Merrimack river, below Pawtucket Falls, and at the union of Concord river with the Merrimack. It is 25 miles N. of Boston, 12 N. by E. of Concord, and 38 S. of Concord, N.H. The hydraulic power of this place is produced by a canal, of a mile and a half in length, 60 feet in width, and 8 feet in depth, extending from the head of Pawtucket Falls to Concord river. This canal has locks at its outlet into Concord river:—and it also serves for the passage of boats up and down the Merrimack. The entire fall is 32 feet. From this canal the water is conveyed by lateral canals to the various places where it is wanted for use, and then discharged, either into the Merrimack or Concord. The waters of this canal are estimated to be amply sufficient to propel 50 mills of the size of those already erected. This canal is owned by "The Proprietors of Locks and Canals on Merrimack River." This company was incorporated in 1792, and have a capital of \$600,000. They dispose of lands and mill privileges, and own the Machine Shop, and carry on the manufacture of machinery. The first cotton mill at this place was erected in 1822. There are now 8 incorporated manufacturing companies, with a capital of \$6,150,000. These companies have 20 mills in full operation, with 103,876 spindles, 3,554 looms, and 5,715 operatives; about three-fourths of which are females. The factories are built of brick and are about 147 feet in length, 45 feet in breadth, and from 4 to 7 stories high. These mills manufacture a large amount of wool, and about 30,000 bales of cotton, annually. The manufactures consist of cotton goods of all qualities, broadcloths, cassimeres, flannels, Kidderminster and Brussels carpetings, rugs, worsted, &c. The cotton goods and carpeting are superior to those imported. The quantity of cotton cloth made at these mills, annually, is about 25,000,000 yards; of which about 7,000,000 yards are bleached and printed into calico, of all the various qualities and patterns now in use. Another company has been incorporated, with a large capital, and will make about 2,500,000 yards of flannel annually. The *Lowell Bleachery* has a capital of \$50,000. It bleaches about 125,000 yards annually, and employs 30 or 40 hands. Preparations are making to erect other factories. A vast quantity of machinery is made at this place. The Machine Shop is a brick building, 220 feet long, 45 wide and 4 stories high. About 200 ma-

chinists, many of them of the most approved skill and ingenuity, are constantly employed. About 700 tons of cast and wrought iron, besides a large quantity of steel, are annually converted into machinery of various kinds. It is computed, that the various manufactories at this place consume, annually, 6,000 tons of anthracite coal, besides large quantities of wood and charcoal. About a mile from the village is a powder mill, making between 700,000 and 800,000 pounds of powder annually. The conveyance of goods between Lowell and Boston is low and expeditious. ¶ For *Middlesex Canal and Boston and Lowell Railroad*, see Boston. This town was taken from Chelmsford in 1824; pop. 1830, 6,474—1832, 10,254—1833, 12,363—(of which 4,537 were males, and 7,926 females.) The present population is estimated at 14,000; r. ps. 1816; val. \$11 40. The "Lowell Bank" has a capital of \$250,000—Nathaniel Wright, Pt.; James G. Carney, Cr. The "Railroad Bank" has a capital of \$500,000—Luther Lawrence, Pt.; Pelham W. Warren, Cr. There are three fire insurance companies in this town, an Institution for Savings, and a number of moral and religious societies. *Cl*—Amos Blanchard, William Twining, Giles Pease, William Barry, c; Theodore Edson, e; Enoch W. NANTUCKET COUNTY AND TOWN.

INCORPORATED, 1695. An island in the Atlantic Ocean—town and county. It lies east of Dukes county, and about 30 miles south of Cape Cod, or Barnstable county. This island is about 15 miles in length, from east to west, and about four miles average breadth. It contains 50 square miles. The town, formerly called *Sherburne*, is in about the centre of the island, on the north side, in lat. $41^{\circ} 18' N.$, and $70^{\circ} 10' W.$ lon. It has a good harbor, with $7\frac{1}{2}$ feet of water, at low tide, on the bar at its mouth. This island was formerly well wooded, but for many years it has not had a single tree of natural growth. The soil is light and sandy; it however affords pasturage for about 14,000 sheep, 500 cows, and other cattle. In 1659, when this county was incorporated, the island contained 3000 Indians, but now, not one. The whale fishery commenced here in 1690; and this place is perhaps more celebrated than any other for the enterprize and success of its people in that species of nautical adventure. Pop. 1820, 7,266—1830, 7,202; r. ps. 1656; val. \$17 25. 144 inhabitants to a square mile. Nantucket is 55 miles S.E. of New-Bedford, 30 S.E. of Falmouth, 102 S.E. by S. of Boston, and 500 miles from Washington. This town has 76 ships employed in the whale fishery. There are 66 schooners and sloops engaged in the coasting trade. Total tonnage, about 35,000 tons. 2010 men and boys, belonging to the island, are employed in navigation. There are on the island 30 candle houses, or factories; 2 brass foundries; and 4 (wind) grist mills. There are considerable quantities of peat on the island. The "Citizens Bank" has a capital of \$100,000—James Mitchell, Pt.; W. C. Starbank, Cr. The "Manufacturers' and Mechanics' Bank" has a capital of \$100,000—David Jones, Pt.; Barker Burnell, Cr. NORFOLK COUNTY.

THIS county is bounded N.E. by Boston harbor, N. by Suffolk county, W. by the S. E. corner of Worcester county, S. by the N.E. corner of the State of Rhode Island, and S.S.E. and E. by the counties of Bristol and Plymouth. Area, about 400 square miles. Central lat. $42^{\circ} 12' N.$; lon. $71^{\circ} 5' W.$ Pop. in 1820, 36,452; in 1830, 41,901; r. p. 10,637; val. \$53 15. Taken from Suffolk county in 1793. This county has a maritime coast on Boston harbor of about 12 miles, which is indented with many small bays and navigable rivers. Its surface is uneven, and in some parts hilly. Its soil is generally strong and rocky. Much of the dark colored granite or sienite is found here. A large part of Norfolk county, particularly those towns near Boston, is under a high state of cultivation, and affords fruits and vegetables in great abundance. The proximity of this county to the capital, gives it many facilities; and the towns in this, and in the county of Middlesex, that border on Boston harbor, may be called the *Gardens of Boston*. 22 towns; 105 inhabitants to a square mile. The Charles, Neponset, and Manaticut, are its chief rivers.

Bellingham.

This town is well watered by Charles river. It has 2 cotton mills and a woolen factory. Iron ore. Inc. 1719; pop. 1001; r. ps. 265; val. \$1 18; s. m. \$500. 28 miles S. Braintree.

This town was inc. 1640. It lies 10 miles S. by E. of Boston, 12 miles S.E. of Dedham, and 6 N. by E. of Randolph.

Pop. 1752; r. ps. 483; val. \$1 83; s. m. \$925. The *Manaticut* river, after meandering through this town and affording many fine mill sites, meets the tide-waters of Weymouth Fore river at Braintree landing, in Boston harbor, where considerable quantities of flour, grain, lumber, &c. are sold. In this town are manufactories of cotton, satinnet, shovels, nails, paper, and chocolate. Large quantities of shoes are made here. This town formerly included *Quincy* and *Randolph*, and was first called *Mount Woluston*. It is celebrated for the antiquity of its settlement, (1625,) and for the eminent men it has produced both in church and state. It affords good white oak and cedar; and some of the best merchant ships are built here. Excellent granite, of which large quantities are annually transported to Boston and other places. Some indications of coal. The Holley tree (*Ilex aquifolium*) is indigenous. Paine's Hill is 210 feet above the sea. A survey between the tide waters of this town and those of Taunton river, to unite Massachusetts and Narraganset bays, by a ship canal, was commenced by the United States' government in 1827. From the tide lock at the Quarry in Braintree, on Weymouth Fore river, to the tide lock at Somerset, 13 miles below Taunton, the distance is 36 miles. The summit level between the bays is at Howard's meadow, in Randolph, 134 feet above high water mark at Braintree or Weymouth landing. A ship canal in this direction, or one across Cape Cod, at Sandwich, would save many lives and a vast amount of property. *Cl*—Richard S. Middleborough.

This is the Indian *Namasket*; formerly thickly populated by people of that tribe, and governed by the noted Sachem *Tispacan*. On the rocks, in this town, are the prints of naked hands and feet, supposed to be the work of the Indians. Here are numerous ponds, several kinds of fish, and large quantities of iron ore is found in the ponds. These ponds, of which the *Assawamset* and Long pond are the largest, empty into Taunton river, and produce an extensive water power. It has 2 cotton mills, 2 large shovel factories, 2 forges, 2 furnaces, a tack factory, and 5 trip-hammers. This town is 15 miles in length and about 9 miles average width. It lies 34 miles S. by E. of Boston, 14 W.S.W. of Plymouth, and 10 S.E. of Taunton. Inc. 1660; pop. 5008; r. ps. 1311; val. \$472. Some indications of anthracite coal. Boston.

The ancient City of BOSTON, the capital of Massachusetts, and of New-England, and the birth place of American Freedom, is naturally divided into three sections—*Old Boston*, *South Boston*, and *East Boston*, situated at the western extremity of Massachusetts Bay. The peninsula on which old Boston is built, extends from Roxbury, on the south, to Winnesimmet Ferry, on the north, and is nearly surrounded by the waters of Boston harbor on the east, and Charles river on the north and west. Its length is nearly three miles, and its average breadth about one mile. It originally contained about 700 acres, but its territory has been greatly extended by filling up around its borders. Its surface is quite uneven. It has numerous eminences rising from 50 to 110 feet above the sea, affording admirable sites for building, and giving to it a peculiarly romantic appearance. It is in north lat. $42^{\circ} 21'$, and west lon. $71^{\circ} 4'$. It lies 163 miles S.S.W. of Augusta, Me.; 63 S S.E. of Concord, N.H.; 160 S.E. by S. of Montpelier, Vt.; 158 E. (19' S.) of Albany, N.Y.; 40 N.N.E. of Providence, R.I.; 97 E.N.E. of Hartford, Ct.; 207 N.E. by E. of New-York, and 432 miles N.E. by E. of Washington. The Indian name of this place was *Shawmut*. It was called by the first settlers *Tramount*, *Tremont*, or *Trimountain*, from three hills nearly in its centre. It took its present name on the 7th of Sept. 1630, in honor of the Rev. John Cotton, second minister of the first church, who came from Boston, in England, a town 115 miles north of London.

South Boston. This part of Boston was set off from Dorchester, by legislative enactment, March the 6th, 1804. It is bounded south by Dorchester Bay, and spreads about two

miles on the south side of the harbor, above the forts. It contains about 600 acres, and is laid out into regular streets and squares. The surface of this part of Boston is exceedingly picturesque. In about the centre of this tract, and about two miles from the City Hall, the memorable "Dorchester Heights" rear their heads 130 feet above the sea, from which is presented a splendid view of Boston, its harbor, and the surrounding country. It is connected with old Boston by two bridges. This part of Boston is rapidly increasing in population and wealth.

East Boston. This section of the city, until recently, had been called *Noddle's Island*. It lies about 660 yards N.E. from old Boston, and about the same distance from Charlestown. It is divided from Chelsea by *Chelsea Creek*, 600 feet wide, over which is a bridge, and from which is an excellent road to the Salem turnpike. This is a new and commodious route from the city to Salem. The island contains about 660 acres of land, and a large body of flats. It was purchased by a company of enterprising gentlemen in 1832. They were incorporated in March, 1833, and the first house was commenced in October of the same year. A steamboat ferry is established between this place and old Boston, starting from each side every five minutes. The time occupied in crossing is about three minutes. A ferry is about being established between this island and Charlestown. The surface of this island is pleasingly variegated, and affords delightful sites for dwelling-houses and gardens at moderate prices. This place is well located for manufactories of various kinds; particularly for ship building, and all those branches of mechanics connected with navigation. Already the Boston Sugar Refinery, the Boyden Malleable Iron and Steel, the Merchants' Marine Railway, the East Boston Timber and Wharf, Companies, are in successful operation, employing a capital of more than a million dollars.

The *Maverick Hotel*, a large and splendid building, occupying a commodious site, is now open for public accommodation. This house is named in honor of Samuel Maverick, who owned the island and resided there in 1630, and who is said to have made "some figure in the history of after times—a man of very loving and courteous behavior, and very ready to entertain strangers."

Boston Harbor extends across Light House Channel and Broad Sound, from Point Alderton on Nantasket, to Point Shirley in Chelsea, a distance, between the islands, of about 4 miles. It is safe, and of ample capacity for the largest navy. The most important part of this harbor is entered by a narrow

pass, between two and three miles below the city and Navy Yard; and is well protected by two powerful forts—Independence and Warren. Boston harbor contains many islands of great beauty, and is the reservoir of the *Mystic*, *Charles*, *Neponset*, *Manaticut* and other rivers. Its borders are environed by the towns of Hull, Hingham, Weymouth, Braintree, Quincy, Dorchester, Roxbury, Brookline, Cambridge, Charlestown, and Chelsea; and the numerous small bays, coves and inlets, indenting their shores, give great variety, and add much to the scenery of this delightful harbor.

Owing to the almost insular situation of Boston, and its limited extent, its population appears small. But it must be considered that the neighboring towns of Quincy, Dorchester, Milton, Roxbury, Brookline, Brighton, Watertown, Cambridge, Charlestown, Medford, Malden, and Chelsea, although not included in the city charter, are component parts of the city, and are as much associated with it in all its commercial, manufacturing, literary, and social relations and feelings, as Greenwich, Manhattanville, and Harlem are with the city of New-York; or Southwark and the Northern Liberties with Philadelphia.

The population of Boston, in 1700, was 7,000—1722, 10,567—1765, 15,520—1790, 18,038—1800, 24,937—1810, 33,250—1820, 43,298—1830, 61,391. The population now is about 80,000.

The following eminent physicians and surgeons have died in this city within a few years.

Charles Jarvis, M.M.S.S., was born in Boston in 1748. He died November 15, 1807.

James Lloyd, M.D., was born at Long Island, N. Y. April, 1728. He died March, 1810.

John C. Howard, M.D., was born at Boston in 1773. He died August 11, 1810.

John Warren, M.D., A.A.S., et M.M.S.S., was born in Roxbury, July 27, 1753. He died April 4, 1815.

John Jeffries, M.D., M.M.S.S., was born at Boston, Feb. 5, 1744. He died September 16, 1819.

Thomas Kast, M.M.S.S., born in Boston, August 12, 1750. He died June 20, 1820.

Lemuel Hayward, M.D., M.M.S.S., was born at Braintree, March 11, 1749. He died March 20, 1821.

Isaac Rand, M.D., M.M.S.S., was born at Charlestown, April 27, 1743. He died September 11, 1822.

William Eustis, M.M.M.S.S., LL.D., was born in Boston, June 10, 1753. He died Feb. 1825.

Samuel Danforth, M.D., was born in Cambridge in 1740. He died November 16, 1827.

Avenues.

The peninsular situation of Boston requires many artificial avenues to and from the surrounding country. Until 1786 the "Neck" between Boston and Roxbury, one mile and 117 feet in length, was the only passage to it by land. On the 17th of June of that year, the *Charles River Bridge*, leading from Boston to Charlestown, was opened for travel. It was incorporated, March 9, 1785. This bridge is 1503 feet in length, 42 in breadth, and cost \$50,000. It cost the present proprietors \$300,000. Net revenue in 1834, \$9,383. No original proprietor is now a stockholder. This bridge becomes state property in 1856.

West Boston Bridge, leading to Cambridge, was opened on the 23d of November, 1793. It was incorporated March 9, 1792. Length of the bridge, 2,758 feet—abutment and causeway, 3,432—total length, 6,190 feet. Cost, \$76,667. Net revenue in 1834, \$12,928. This bridge will become state property in 1879.

South Boston Bridge, leading from Boston Neck to South Boston, was incorporated March 6, 1804, and opened for travel in July, 1805. Length, 1550 feet—width, 40. It cost the proprietors about \$50,000. It is now city property—free.

Canal Bridge, from Boston to Lechmere Point, in East Cambridge, was incorporated February 27, 1807, and opened for travel in August, 1809. Length, 2,796 feet—width, 40. A lateral bridge extends from this to *Prison Point*, Charlestown. Length, 1,820—width, 35 feet. Net receipts in 1834, \$3,173. This bridge will become state property in 1879.

The Western Avenue, leading from Beacon-street to *Sewell's Point*, in Brookline, was incorporated June 14, 1814, and commenced in 1818. It was opened for travel, July 2, 1821. This avenue is a substantial dam across Charles river bay, about a mile and a half in length, and from 60 to 100 feet in width. This dam encloses about 600 acres of flats over which the tide formerly flowed from 7 to 10 feet. A partition dam divides this enclosure, and forms, by the aid of flood and ebb gates, a full and receiving basin; thereby producing, at all times, a great hydraulic power. The cross dam also forms an excellent avenue from the main dam to Roxbury. Cost about \$700,000. Net receipts in 1834, \$6,133. The proprietors of this avenue claim a perpetual franchise.

Boston Free Bridge, from Sea-street to South Boston. Incorporated March 4, 1826—completed, 1828. Length, 500—width, 38 feet. Built by proprietors of lands in the vicinity. City property.

Warren Bridge, leading to Charlestown. Length, 1,390 feet—width, 44. Incorporated March, 12, 1828, and opened on the December following. It is now state property. The net receipts of this bridge in 1834, was \$16,427.

☞ All the above avenues are lighted with lamps, when necessary, and make a beautiful appearance.

Public Buildings.

A few of these only can be mentioned.

The City Hall, or "the old State House," on State and Washington streets, now occupied by the city government, Post-Office, Reading-Room, &c., is 110 feet in length, 38 in breadth, and 3 stories high. Two buildings on this spot have been destroyed by fire. The first was built in 1659, the second in 1714, and the present in 1748. Until the erection of the present State House, this building had ever been used for governmental purposes, both Colonial and State.

Faneuil Hall, or the "Cradle of Liberty," in Dock Square, is three stories high, 100 feet by 80, and was the gift of Peter

Faneuil, Esq. to the town in 1742. The building was enlarged in 1805, and until the new Market was built the lower part of it was used for meat stalls. It is now improved for stores. The *Hall* is 76 feet square, 28 feet high, and has deep galleries on three sides. It is adorned with superb paintings of Patriots, Warriors and Statesmen. The third story is improved for armories.

State House. This building is on an open square, on Beacon street, fronting the malls and common. Its foundation is 110 feet above the level of the sea. It was commenced in 1795, and completed and occupied in 1798. Cost \$133,333. Length, 173 feet,—breadth, 61. On the area of the lower Hall stands the beautiful *Statue of Washington*, by Chantry. From the top of the dome on this building, 52 feet in diameter, and 230 feet above the level of the harbor, the whole city appears beneath, with all its *crooked streets*, its extended avenues, its splendid buildings, and the malls and common, of 75 acres, crossed with romantic walks, and shaded by centurian elms. On the north and west the County of Middlesex presents its numerous villas, and a rich array of agricultural taste and beauty. Here are viewed the hallowed halls of Harvard, and the sacred field of Bunker. On the south the County of Norfolk appears with its granite hills, and luxuriant vales, chequered with a thousand farm houses, cottages, and splendid mansions. On the east, the city, with its lofty spires, the harbor, and the ocean, all conspire to render this the most enchanting scene west of the Bay of Naples.

The *Massachusetts Hospital* is on an open plot of ground of 4 acres, at the western part of the city, on the banks of Charles River. It is 168 feet in length, and 54 in breadth. Commenced in 1818, completed in 1821. This building is of granite, and is a beautiful monument of taste and beneficence. See Appendix.

Faneuil Hall Market. The Corner Stone of this superb granite building was laid on the 27th of April 1825, and completed in 1827. Cost, \$150,000, exclusive of land. It extends east of Faneuil Hall, on Dock Square, 536 feet, and is 50 feet in width. The centre part of the building, 74 by 55, projects two or three feet on the north and south, and rises 77 feet from the ground, to a beautiful dome. The wings are 31 feet, and two stories high. The lower floor is exclusively appropriated as a meat, fish and vegetable market. The upper story is one vast Hall arranged to be divided into compartments for ware-rooms and large sales. On the sides of this building are *North Market street*, 65, and *South Market street*, 102 feet in width; on each of which is a range of spacious ware-houses, with granite fronts. On the east, across Commercial street, is a commodious wharf, belonging to the

city. The hall, in the centre of the building is called *Quincy Hall*, in honor of Josiah Quincy, L.L.D. the late indefatigable Mayor of the city.

Tremont House. This noble Hotel, on Tremont and Beacon streets, was commenced on the 4th of July 1828, and completed 16th of October, 1829. Its granite front on Tremont street, is 160 feet, and 3 stories high. The wings are four stories high; that on Beacon street is 84 by 34 feet; and that on the south, fronting an open square, is 110 by 40 feet. This building contains 180 rooms. The dining hall is 70 by 31, and 14 feet high. Cost, \$68,000, without the land.

New Court House. The corner stone of the noble building now erecting in Court square, between Court and School streets, for the accommodation of the Courts of Law, Offices of Record, &c., was laid Sept. 28, 1833. It is of cut or hewn granite, from the Quincy quarry. Its length is 175 feet 10 inches;—width, 53 feet 10 inches, and height 57 feet 3 inches. A Portico of nearly the same model of the Doric Portico at Athens, will adorn its north and south fronts. There are four columns of fluted granite at each of these Porticos, measuring 25 feet 4 inches in length, and 4 feet 5 inches diameter. They weigh 25 tons each. The interior contains four Court rooms, 50 feet by 40. The estimated expense of this building, without the land, is \$150,000. It will probably be finished in the course of the present year.

Trinity Church, in Summer street, *St. Paul's Church* and the *Masonic Temple*, in Tremont street, the *Washington Bank* in Washington street, the granite building lately erected by the *Suffolk Bank*, and the *United States Bank*, in State street, are some of the best specimens of architecture in Boston.

Churches and Ministers.

First Church. The first house of worship for this society was built in 1632, near the corner of State and Devonshire streets. Their second house was built in 1640—1641, on Washington street on the lot where Joy's buildings now stand. This house was burnt in 1711, and the *Old Brick*, so called, was erected on the same spot. In 1808 the *Old Brick* was sold and their present house in Chauncey place, out of Summer street was built, and dedicated on the 21st of July the same year. The church was constituted July 30, 1630.

This house is 88 by 61 feet. It has two tiers of galleries,

and is so central and commodious that it is generally used on great public occasions.

“ Here was delivered, in defiance of the threats of authority and in presence of marshalled soldiery, Warren’s fearless Oration on the anniversary of the massacre of the 5th of March, 1770. Here were repeatedly held the meetings of oppressed freemen, which called forth those peals of patriotic eloquence, which moved this whole country, and shook the British throne.”

(See Dr. Wisner’s centennial sermons, delivered in this house in May, 1830. Published by Crocker & Brewster.)

King’s Chapel. This Episcopalian society was formed June 15, 1686. Their first house was of wood, and was erected in 1688, at the corner of Tremont and School streets, on the spot where their present Stone Chapel now stands, and which was first opened for worship on the 21st Aug. 1754.

There are in the United States, 22 Catholic Colleges and other seminaries of learning for males, and 34 Convents and Academies for females.

First Methodist Episcopal Church. No fraternity of christians denominated *Methodists* existed in Boston until the year 1784, when the Rev. William Black became a regular preacher. A society was formed in 1792, and in 1799 this society built a neat chapel at the north part of the city, which was dedicated May 15th the same year. At that time there were but 50 communicants. The celebrated George Whitfield had preached in Boston previous to that time, but no society was

formed under his ministration. Mr. Whitfield was born in England, 1714. He died at Newburyport, Sept. 30, 1770.

The corner stone of a new Chapel, for the accommodation of this society was laid on the 30th of April 1828; on which occasion a large concourse of people assembled, and by the breaking of the floor a large portion of the audience were precipitated into the cellar;—many persons were severely injured :—three lost their lives. This house is in North Bennet street. It was dedicated September 23, 1828.

The first Methodist society in the United States was formed at New York, in the year 1769. This is now probably the largest sect of christians in America. The number of members in Massachusetts, in 1834, was 12,714;—the number of preachers, 104;—the whole number of members in the United States was 638,784—preachers, 2,458. In that year 39,048 members and 216 preachers were added to the 22 different conferences.

DOCTRINES OF THE METHODISTS. Believing much misapprehension exists with regard to the doctrines of the Methodists, the following notice of the distinguishing tenets of this denomination is here given :—

In their doctrines, the Methodists are the same all over the world. They are Arminians, and in common with those who are usually styled Calvinists, or Orthodox, they are Trinitarians, and hold to repentance, faith and regeneration, as necessary to salvation. Justification by faith, and a state of future rewards and punishments, endless in their duration. Those tenets by which Methodists are chiefly distinguished from Calvinists relate to the five following articles, viz :—Predestination, Particular Redemption, Total Depravity, Effectual Calling and the Perseverance of the Saints.

Election. The Calvinists hold, that God has chosen a certain number unto eternal glory, without any conditions performed by them, and that the rest, he was pleased to pass by, and ordain to dishonor and wrath;—but the Methodists believe Election to be dependent upon man's obedience to God's holy requirements, and final reprobation, upon his disobedience.

Particular Redemption. The Calvinists hold, that Christ, by the blood of the cross, redeemed only those who were from eternity elected to salvation, and given him by the Father;—but the Methodists believe that Jesus Christ by his sufferings, made an atonement for the sins of all mankind in general, and for every individual in particular.

Total Depravity. The Calvinists hold, that man has neither light, or ability to turn to God, before regeneration,—but the Methodists believe that by the operations of the Holy Ghost upon the heart, he has both light and ability.

Effectual Calling. The Calvinists hold, that all whom God has predestinated to eternal life, he is pleased in his appointed time, effectually to call from sin and death to grace and salvation;—but the Methodists believe that Divine grace begins and perfects every thing that can be called good in man, that this grace is offered to all—that it does not force men to act against their inclinations, but that it may be received, or resisted.

Perseverance of the Saints. The Calvinists hold that those whom God has effectually called, and sanctified by his spirit, shall never finally fall from a state of grace;—whereas, the Methodists believe that God gives to the truly faithful who are regenerated by his grace, the means of preserving themselves in this state, but, that it is possible they may lose true justifying faith—fall from a state of grace, and die in their sins.

☞ A view of religions, giving the peculiar tenets of every sect of christians in the United States, is in preparation and will soon be published.

Fourth Universalist Society. House at South Boston, dedicated 1830, Benjamin Whittemore, s. July, 1830.

Grace Church. This Church was formed 1829, under James Sabine, who continued to officiate a few months in Piedmont, now Church street. Geo. F. Haskins, administered until 20th Sept. 1831, when he resigned. They gave up the church in Piedmont street in Feb. 1834, and removed to a small building in Bedford street. They were destitute of a regular pastor from 20th Sept. 1831, till 19th July 1832. Most of the Episcopalian Ministers in the city officiated during that time. Samuel McBurney, became their pastor for 1 year, 19th July, 1832. The society removed to Boylston Hall on the 1st Sunday in Aug. 1833. Zachariah Mead, became pastor, Sept. 8, and commenced the charge 20th Dec. 1833. This society now worship in Amory Hall, corner of West and Washington-streets. They are now building a beautiful church in Temple street, which is estimated to cost \$33,000.

In addition to the above places of public worship, there are a large number of *Halls, Mission Chapels, &c.* devoted to that object.

Schools.

The first settlers of New England were exceedingly tenacious of their civil and religious rights, and they well knew that *knowledge* was an all powerful engine to preserve those rights, and transmit them to their posterity. They therefore very early laid the foundation of those *free schools*, of which all the sons and daughters of New-England are justly proud. Exclusive of Infant and Sabbath school scholars, about a quarter part of the population of Boston is kept at school throughout the year, at an annual expense of about \$200,000.

Houses of Industry, Correction, and Reformation.

These houses are delightfully situated on a plot of ground of about 60 acres, situated at South Boston, on the margin of the harbor, and near the brow of Dorchester Heights.

The House of Industry is a large stone building wholly devoted as a place of refuge for the poor, who are old, infirm, or otherwise unable to support themselves; and as a work-house for those who cannot, or will not maintain themselves. This establishment is of the same character of that which stood on Park-street many years ago, and which was removed to Barton's Point in 1800, where a beautiful building was erected for its accommodation, but which was sold, and the present house built in 1823. From the 7th of August, 1823, to June 2d, 1835, the number admitted to this house was 8,241. The number of admissions and re-admissions in 1834 was 979, besides 32 births in the house. There remained in the House, December 31, 1834, 610. "1383 different individuals were inmates in 1834, for longer and shorter periods of time, (some of whom were out and in several times) while only 237 have remained steadily in the House the whole year." Of this number 600 were men, 404 women, 223 boys, and 153 girls. Of this number 71 men and 57 women were insane or idiotic, and 8 idiot children. Of this number 268 were Bostonians, 274 were from other parts of the United States, and 841 were foreigners.

It is observed by the Superintendent that "there has been, for several years, a constant diminution of native Americans supported in the House, with more than a corresponding increase of foreigners. A large proportion of these travel into the State by land, from the British Provinces, and from other States." The number of foreigners admitted into this House in 10 years was 3,695.

House of Correction. This House is a few rods east of the House of Industry, and occupies at present, only the easterly part of a large stone building. This is a County Prison for convicts too young in vice to place in the State Prison, but too old in vicious habits to require much less discipline. The commitments to this House are from the Municipal and Police Courts. None exceed 8 years. The plan of the House, although at present limited in extent, is admirably fitted for its uses. It is on the plan of the Auburn Prison in the State of New-York, which cannot well be described here. It is worthy of a visit from all classes of people both good and bad;—it teaches solemn lessons; and whilst we pity and deplore its convict inmates for their state of degradation, we cannot but admire that order and

discipline by which so large a number of men and women are kept in such quiet subjection. The number of white males at this House, January 1st, 1834, was 160, white females 85, colored males 10, colored females 13. Total, 268. Of this number 84 belonged to Massachusetts, 63 were from other States, and 121 were foreigners. On the 1st of January, 1835, there were at this House 178 white males, 74 white females, 14 colored males, 20 colored females.—Total, 286. Of this number 153 were people of the United States, and 133 foreigners.

In the right wing of the latter building is the House of Reformation for Juvenile Offenders. The number is generally between 80 and 90. The above buildings are each 220 feet in length and 43 feet in width. A new building is erecting on the city land south of these buildings, for a House of Reformation; when it is completed the House of Correction will occupy the whole of the present building. These Houses are severally governed by Boards of Overseers.

Officers. House of Industry. *Superintendent*, John Porter. *Physician*, Joseph W. McKean. *Chaplain*, Wm. Bascomb.

House of Correction. *Clerk to the Overseers*, Benjamin Ingersoll. *Master of the House*, Charles Robbins. *Physician*, Joshua B. Flint. *Chaplain*, Charles Cleveland.

House of Reformation. *Superintendent*, F. C. Whiston. *Chaplain and Instructor*, John F. Haskins.

Theatres.

The *Boston Theatre*, on Federal and Franklin-sts. was first opened February 3, 1794. It was burnt, February 2, 1798; it was re-built, and re-opened on the 29th of Oct. the same year. This building is of brick, and is 152 feet long, 61 wide, and 40 high. This building has not been used for theatrical performances for some years. It is now improved by the Boston Academy of Music, and as the place of worship of the *Franklin-street Church*, which was organized on the 11th of May, 1835. A huge wooden building was erected on Tremont-street, and opened as the "Hay-Market Theatre," December 26, 1796. The citizens in its neighborhood being fearful of its conflagration, caused its demolition, by subscription, and the block of elegant brick dwelling-houses, near, and north of Boylston-street, now occupy the spot.

The *Tremont Theatre*, on Tremont-st. is a very neat building, with a granite front, 135 feet by 79. It was commenced in July, and opened Sept. 24, 1827. Cost, about \$120,000.

The *Warren Theatre*, a low building, at the junction of Portland and Traverse-streets, near the Warren bridge, was constructed in 1831. This building was first used for equestrian performances.

Commerce.

The citizens of Boston have ever sustained a high rank for their commercial enterprise. After whitening every sea with their canvass, and extending their commerce with all nations of the globe, they are now looking *westward*, and constructing new and artificial channels to enable them not only to compete with other Atlantic cities for the already immense commerce of the western world, but to intercept it on its passage down the St. Lawrence.

A sketch of the commerce of Boston for five years, with the amount of importations of some important articles, may not be uninteresting.

The whole importations of Saltpetre from Calcutta into Boston during the above five years was 137,851 bags. There were imported into Salem during that period 17,149 bags. The whole amount of this article imported into the United States in those years was 237,704 bags. A bag usually weighs 160 pounds. The average weight of a bale of cotton is about 400 lbs. The arrivals, coastwise, are not all stated here. Some thousands of coasters arrive annually with lumber, wood, fish, &c. which are not noticed in the record of arrivals.

Commercial Accommodations.

There is probably no place in the world better accommodated for commercial operations than Boston. The whole length of the harbor on the east and north is lined with about 200 docks and wharves. A few of them only can be noticed.

India Wharf, at the foot of *Fort Hill*, was constructed in 1805. It extends into the harbor 980 feet, and is 246 to 280

feet in width. In the centre is a range of 39 stores, 22 by 80, and 4 stories in height.

Central Wharf, between India and Long Wharves, was built in 1816. In the centre are 54 warehouses, 23 by 50, 4 stories high. It is 1379 feet in length, and 150 in width. Over a spacious hall in the centre of this range of stores, is one of the best Observatories in the U. States. J. R. Parker is the conductor and proprietor.

North of this is *Long Wharf*, at the foot of State-street, commenced in 1710. This wharf extends into the harbor 1800 feet, is 200 feet in width, and has 76 spacious warehouses. About the centre of this wharf is a well of fresh water, 90 feet in depth.

Passing the City Wharf on the north, we come to *Commercial Wharf*, 1100 feet in length, and 160 feet in width. On the centre of this wharf is a range of 34 granite ware-houses, 25 by 60 feet, and are unequalled by any thing of the kind in the U. States for convenience or grandeur. Cost, \$500,000.

On the west, and in front of this tier of wharves which run into the harbor, nearly parallel to each other, are *India and Commercial streets*, having the east end of Fanueil Hall Market nearly in the centre. These streets are wide; they serve as wharves, and their west sides are covered with large and convenient stores. It is contemplated to extend India-street, on the South, to the Free Bridge on Sea-street; and Commercial street on the north, to Winnesimmet Ferry. (See Hale's Map of Boston.)

The *Marine Railways*, established in 1826, at the north part of the city, afford great accommodations to those engaged in navigation. An appropriation has been made by the general government for the erection of a new Custom House in Boston. The site is not yet selected. An *Exchange*, for the accommodation of merchants is contemplated, on the site of the State Bank. An Exchange is much needed.

Finances.

The public debt of the city of Boston on the 1st of May, 1835, was \$1,147,399. The receipts during the financial year, (from 30th April, 1834, to 30th April, 1835) were \$1,316,624. The expenditures, \$1,316,290, leaving a balance in the Treasury of \$334 00. The amount due to the city on bonds and notes, was \$105,420. The income for rents of city property in 1835, is estimated at \$44,000. Besides the public property in public buildings, City and other wharves, &c. &c. both improved for city purposes, and rented, the city has about 7,000,000 square feet of land on the Neck, exclusive of streets, public squares, and malls, and a very large property in other lands in various parts of the city, which are rapidly increasing

in value. The amount of this property cannot be stated, but it is known greatly to exceed the city debt.

Banking and Insurance Companies.

There are twenty-eight Banks in Boston with a capital of \$18,150,000, besides the Bank of the United States. The charters of these Banks as well as of all Banking Companies in the Commonwealth, expire by limitation in 1851. The oldest Bank in the Commonwealth is the Massachusetts Bank in Boston. It was incorporated in 1785. The Union Bank was incorporated in 1792. The Boston Bank in 1803. Most of the other Banks in Boston are of a much more recent date. (The oldest Bank in the United States is the Bank of North America in Philadelphia. It was incorporated in 1778.

It is a singular fact, and worthy of notice, that through all the various changes to which monied institutions are constantly liable, no banking company in Boston was ever known to refuse specie for their bills, on demand.

There are 27 Insurance Companies in Boston, with a capital of \$7,600,000, besides the Massachusetts Hospital Life Insurance Company, with a capital of \$500,000—and the Massachusetts Mutual Fire Insurance Company. The charters of these Companies are subject to the control of the Legislature.

Middlesex Canal.

This canal passes in a northerly direction from Boston harbor at Charlestown, through Medford, 5 miles from Boston; Woburn, 10;—Wilmington, 14;—to Lowell, at the locks and canals at that place, 27 miles. It was incorporated in 1789, and completed in 1808. Cost, \$828,000. Its breadth at the surface is 30 feet;—at bottom, 20; depth, 4 feet. Summit level, 104 feet above tide-water, and 32 feet above the Merrimack at Lowell. This and other short canals on the Merrimack, open a navigable communication between Boston and Concord, N. H. (See Lowell.) This was the first enterprise of the kind attempted in the United States.

Railroads.

The Boston and Providence Railroad was incorporated June 22, 1831, and the company was immediately organized. The road commences on the southwest side of the common in Boston, crosses the Boston and Worcester railroad, passes through Roxbury, the eastern part of Dedham, and western part

of Canton, Sharon, Foxborough, Attleborough, and Pawtucket, to Seekonk, and terminates at India bridge, which crosses the Pawtucket river to Providence. Its length is 41 miles, and is now open for travel. It has a branch of two miles in length, leading to the town of Dedham. It is built of the iron edge rail, of the form called the T rail, supported on cross sleepers of wood. Depot at or near the corner of Pleasant and Charles streets. Single track. Cost, \$1,150,000, including cost of depot, engines, cars, &c.

The Lowell Railroad was incorporated in June, 1831, and the company was organized soon after. The road commences near Leverett-street, in the northwestern part of the city; passes through the eastern part of East Cambridge, the western part of Charlestown and Medford, the eastern part of Woburn and Wilmington, and the north part of Billerica, and terminates near the Merrimack House, in Lowell. It is 26 miles in length, and is now nearly completed. It is built of the iron edge rail, supported by cast iron chairs, on stone blocks and cross sleepers, resting on stone foundations. Depot at Barton's Point, in Boston, on Charles river. Single track. Cost, \$1,200,000, including cost of depot, engines, cars, &c.

The Boston and Worcester Railroad was incorporated June 23, 1831. The company was organized in the following year, and the work was begun in September, 1832. The road begins at the South Cove, on deep water, near the Free bridge, in the southeastern part of Boston, and terminates on Main-st. near the centre of the town of Worcester. It passes under Washington-st. in Boston, passes through Brighton, Newton, Needham, Natick, the S. part of Framingham and Southborough, the N. part of Hopkinton, the centre of Westborough, and the north part of Grafton; in each of which places the cars will stop for passengers, and there will be in each a depot for merchandize. The road is built of the iron edge rail, supported by cast iron chairs, on cross sleepers of wood, resting on a foundation of stone rubble, laid below the reach of frost, in a continuous trench, under each rail. The length of the road is 44 miles, and the cost, when finished, including a branch of three miles in length, from Grafton to Millbury, with the depots in Boston and Worcester, and at the intervening places, and with the engines and cars of every description, will be about \$1,200,000. It was opened from Boston to Newton in April, 1834, and to Westborough, a distance of 32 miles, in November following. It will be completed to Worcester in the course of the ensuing summer.

Post Office.

The Post Office in Boston occupies the first floor of the west end of the City Hall, and fronts on Washington-street. Letters, newspapers and pamphlets are deposited from the entrance on Washington-street, and from the public hall in the centre of the building. Boxes, with locks and keys, for the accommodation of insurance companies and printers of newspapers, are placed in the northwest part of the lobby on Washington-street; the Postmaster's private room is on the opposite side of the same lobby; in the centre is the window for the "general delivery" of letters, &c. The eastern front of the office is on the public hall, which is entered from State-street on the north and south sides; this front is occupied by the private boxes of merchants and others who keep accounts at the office. On this front is also the entrance to the Cashier's office, where all business relating to this delivery is attended to. The centre and most of the north and south sides of the office are devoted to the business of the "forwarding department," where letters, pamphlets, &c. are rated, stamped, mailed, and despatched for their various destinations. The "city delivery" is under the superintendence of Mr. Leonard Holmes, who is also the cashier, and who is assisted by four clerks. The "forwarding department" is under the superintendence of Mr. Calvin Young, who is assisted by three clerks. There are also two clerks who attend to the distribution of papers and pamphlets, and deliver the mail bags during the night; these are on duty until relieved by the day clerks in the morning. Mails are received from and despatched for 2800 offices weekly. Thirty-three mail stages arrive and depart daily. From the first of April to the first of October, the office is open from 7, A.M. to 8, P.M.—from October to April, from 8, A.M. to 8, P.M. On Sundays, from 5 to 6, P.M. Letters are delivered by penny post to all persons in the city who desire so to receive them. In 1834, the net proceeds of this office, paid over to the department, were \$78,174. Nathaniel Greene, *Postmaster*.

Public Houses.

Boston is celebrated for its good taverns or public houses. A few of them, with the names of their keepers and location, will be noticed.

Fires.

Boston, in common with all large towns which are chiefly built of wood, has suffered very much by fire. Fifty years ago the buildings in the town were principally of that material; but by efficient measures adopted by the citizens, particularly the law of 1803, prohibiting the construction of wooden buildings of a greater height than 10 feet, a large portion of the old buildings have been taken down, and their places, with thousands of others on new sites, now present to that destructive element solid walls of brick and stone. A few of the most memorable fires are here given. In October 1711, a fire broke out in Williams' Court and destroyed most of the buildings on both sides of Cornhill, from School-street to Market square. On the 20th of March 1760, 174 dwelling-houses, 175 warehouses, shops, &c. were burnt. This fire was in the centre of the town, (Cornhill, State and Congress-streets to Fort Hill,) and the amount of property consumed, was estimated at £100,000 sterling. April 24, 1787, a fire commenced in Beach street, and extending south, destroyed about 60 dwelling-

houses, 40 other buildings, and the church in Hollis-street. July 30, 1794. Seven rope-walks between Pearl and Atkinson-streets, and about 90 other buildings in that neighborhood were destroyed. Loss estimated at more than \$200,000.

On the 3d of November, 1818, the *Boston Exchange Coffee-House*, in Congress-square, was destroyed by fire. This building covered 12,753 feet of land. It was 7 stories high, and from the floor to the top of the dome was 83 feet. It contained 210 apartments, and cost about half a million dollars. The conflagration occurred in the evening, and the sight was awfully sublime.

On the 7th of July, 1824, at noon, (the wind blowing almost a gale) 15 costly dwelling-houses were burnt, on Beacon, Charles and Chesnut-streets.

A very destructive fire commenced on Doane-street, April 7th, 1824, when 53 large ware-houses, in that part of the city, with a great amount of merchandize, were destroyed.

A number of buildings, containing about 35 lawyers' offices, and 20 stores and shops, on Court-st. were burnt, Nov. 10, 1825.

During the last five years, there were 226 fires—the amount of property destroyed was \$274,278:—of which \$140,943 was insured. The most destructive fires were in 1833. In that year 71 fires occurred, \$89,970 value of property was destroyed, of which \$57,040 was insured.

The present Fire Department was organized in 1826. It is always in the most perfect state of preparation for service. Attached to this department are 20 engines, 16,000 feet of hose, 21 ladders, 18 hooks, 27 carriages, 800 buckets, 13 Engineers, and 1313 firemen. By the most powerful of these engines, with 250 feet of hose, water can be thrown over the *grasshopper*, on the cupola of Faneuil Hall, 84 feet above the pavement.

Health.

To judge of the health of a city we must compare its bills of mortality, for a series of years, with those of some other city. We have ever believed that the climate of Boston, and of New-England generally, was as conducive to health as any portion of our country; but having heard it often asserted that the climate of Boston was more favorable to some diseases, particularly those of a pulmonary character, or what is commonly called *consumption*, than that of our sister city New-York, we herewith give the authenticated bills of mortality of each city for five successive years, with the number of deaths by some of the most prevalent diseases in each, whereby, those who desire it, may judge of the comparative health of both. The population of Boston, in 1830, was 61,391—of New-York, 202,589—a fraction less than 3 1-3 in New-York to 1 in Boston. From 1820 to 1830, the average

increase of the population of Boston was a fraction less than 4 per cent. per annum—that of New-York a fraction less than 6 1-3 per cent. per annum. The aggregate number of deaths in Boston during those five years, was 7,340—New-York, 35,087:—a fraction more than 4 2-3 in New-York to 1 in Boston. In that period, the aggregate number of deaths in Boston, by *consumption*, was 1,128—in New-York 6,124:—more than 5 1-3 in New-York to 1 in Boston.

**Mortality in Boston and New-York compared,
from 1830 to 1834, inclusive.**

Water.

The subject of pure water for all the various uses of life has ever been one of the first and most important considerations with settlers in all countries. It frequently happens that those places most suitable for commerce are the least favorable to the ready acquirement of that indispensable element; consequently the ingenuity and skill of man have devised and executed those stupendous aqueducts, and tanks or reservoirs,

both in ancient and modern times, which have made some of the most desolate parts of the globe the greatest marts of trade and the most splendid cities. Governor Winthrop and his associates located themselves at Charlestown, and would have continued there had not the waters of *Shawmut* been more agreeable to their tastes. Their change of situation, on that account, is no compliment to their chemical knowledge, for the waters of Charlestown are decidedly the best. Possibly "the magic of a name" might have influenced them; for *Shawmut*, in the Indian language, is said to mean "springs of living waters."

An analysis of some of the waters of Boston has recently been made by Dr. Charles T. Jackson, and in a letter, dated August 28, 1834, to Mr. Baldwin, he says—

"I hope to be able to furnish you with analyses of the different well waters of the city, by which it will appear that we are in the habit of drinking several salts in considerable quantities, which must have deleterious effects on the human constitution. I will now only observe that one of the best specimens of clear well water from Bowdoin-street, yields 3.6 grs. of the salts of Sulphate of Lime, Muriate of Soda, and Muriate of Lime, to the pound of water. The well is 30 feet deep and is situate high up on the side of the hill. I have also examined the water of the well at my residence No. 11. Hanover-street. The well is 40 feet deep and the water stands about 10 feet from the surface. This water gives 7.5 grains of the above salts to the pound of water; although the taste of the water is not unpleasant to those who have been accustomed to it. It must however be prejudicial to the health, when we consider that several pounds of it are drank by each person in the course of a day.

"I have made examinations of the water of several other wells of the city, but have not kept notes of the quantities of matter they contain. I am satisfied, however, that there are wells, whose waters are infinitely worse than those I have mentioned, which have the reputation of being good water, although they contain noxious matter."

The City Council, with a laudable zeal for the welfare of the citizens, passed a vote, April 14, 1834, which provides that a committee be appointed "with authority to cause a survey to be made by competent persons for the purpose of ascertaining whether a steady and copious supply of pure and soft water can be obtained, and also what will be the best mode and the cost of introducing such supply of water into the city, and that the said committee report to the City Council the result of the survey as soon as completed."

Loammi Baldwin, Esq. of Boston, an eminent engineer, was appointed to make a survey and report upon the subject.

Mr. Baldwin, in his report, dated October 1, 1834, states that there are 2,767 wells in the city;—of which number 2,085 are drinkable, and 682 bad: and that only 7 of the whole number are occasionally used for washing. Of the wells in Boston Mr. Baldwin says—

“ All the dug or Artesian wells of Boston, are in strata of different materials in very irregular position, so that whatever may be the success in making one well, no certain result can be predicated upon another trial at a short distance from the first. The wells in town are polluted by the dirty water at the surface being absorbed, settling and mingling with the veins below; or are adulterated by mixture with little streams of sea-water. That the latter case frequently occurs is very natural, as can be illustrated by the following facts.

“ In excavating in hard compact gravel mixed with some clay, for the foundation of the Dry Dock in Charlestown Navy Yard, at the depth of about 40 feet, they came to a small spring of fresh water on the S. W. side next the ship-house, a few feet outside the exterior line of masonry. This became valuable and convenient to use in the mortar. But it was necessary also to separate it from another spring of salt water which arose within a few feet of it. This was done by sinking a hogshead and puddling it all round with clay to preserve it pure. In this way fresh water was furnished from this little spring for making mortar throughout the whole work, and no other fresh water was used. Had any one attempted to dig a well from the surface on this spot he might have hit the salt instead of the fresh source, or both, and his well be good for nothing. So on the opposite side of excavation, near the head of the dock, where the hard gravel stood perpendicular for 30 feet, two similar springs issued from the side 20 feet from the surface, within a few feet of each other, one of which was of beautiful pure water, frequently drunk by workmen, and the other was salt as sea-water. The same geological phenomena doubtless exist in most parts of Boston, where the same kinds of strata are found in well-digging.”

The Boston Aqueduct Corporation commenced operations for conveying water into the city from Jamaica Pond, in Roxbury, in 1795. The distance from Boston to the Pond is four miles, and the number of feet of logs laid in the city is 72,000, or about 18 miles. The greatest quantity of water that can be supplied from this source is 50,000 gallons daily, and the greatest height it can be raised in the city is 49 feet above tide-water. (The quantity of water used in Philadelphia, with a population of about 200,000, is between two and three million gallons daily.)

After procuring a survey of all the waters in the vicinity of Boston, adapted to the purpose, Mr. Baldwin is of opinion

that *Farm and Shakum Ponds*, in Framingham, together with incidental ones dependent on them, and *Long Pond* in Natick, are best suited to the object. The above ponds cover 885 acres. Mr. B. proposes to bring the water in a close stone aqueduct to a reservoir in Roxbury, 2 3-4 miles distant from Boston, and 110 feet above marsh level. This source would supply 5,000,000 gallons daily, if required, at an estimated expense of \$750,000. The distance from the nearest waters of these ponds to the proposed reservoir, is 22 miles.

The citizens of New-York, with a laudable regard to their health and lives, are about supplying themselves with pure water from the Croton river, in Westchester county, a distance of 41 miles north of the city. Their plan is to carry the waters of that river, in a covered aqueduct, to Murray's Hill, 3 miles from the City Hall, and from thence to distribute it throughout the city in iron pipes. The total expense for bringing the water to Murray's Hill and laying 167 miles of pipes in the city, is estimated at about five millions and a half of dollars. It is estimated that the Croton can supply thirty million gallons daily. The price to each family, of common size, will be \$8 per ann. The annual revenue to the city, when the works are completed, is computed at \$310,516. The declination from Croton river to Murray's Hill, is 15 inches a mile. Murray's Hill is about 7 feet higher than the roof of the highest building in the city.

Present Improvements.

Perhaps at no period since the settlement of Boston has its prosperity been so flattering as at the present time. It is true that Boston increased in population and wealth with great rapidity during the wars in Europe, from 1794 to 1807. But that growth was unnatural and contingent;—it depended solely on the caprice of the belligerent powers, who viewed us rather as servants to their necessities, than with respect.

The present state of things is altogether different. The world is at peace. We look for no besieged city to supply with bread, neither do we seek to run the gauntlet of a blockading squadron to furnish a starving country with the growth and produce of its own colonies. We now rely on our own resources—agriculture and manufactures, and commerce with all nations with whom we can exchange our commodities at fair prices. So long as we are blessed with union, good institutions and good laws, our city, under Providence, will continue on in the forward path to prosperity and happiness.

The location of Boston always gave it the command of a greater coasting trade than any other port on the American continent; but the great arteries to an immense, wide-spread and rapidly increasing interior commerce were never opened until the railroads to the north, the west, and the south were

constructed and in operation. By these devices of human wisdom, and by the continuance of the two former—crossing the waters of our own Connecticut to the noble Hudson, and piercing the centre of a large and fertile country, to the outlet of the great western Oceans on the banks of the St. Lawrence, Boston, with its enterprise and capital cannot fail of sustaining a fair and successful competition for this trade, with any city on the American continent.

With these prospects of permanent and increasing prosperity, the Bostonians are fearlessly investing their capital in building up and embellishing their city. There is scarcely a street in the city where the hand of improvement is not seen. Among the various improvements now in progress, we shall mention only one. The splendid estate of the late Gardner Green, Esq. extending from Tremont to Somerset-streets, with the adjoining estates of the late Dr. Lloyd and William H. Bordman, Esq., have recently been purchased by three enterprising individuals. These estates comprize 133,797 square feet of land, and embrace the summit of the ancient *Trimountain*. The hill is now being taken down, and the site graduated on each side for the construction of superb blocks of buildings. This will form a continuation of State and Court-streets. The summit of this hill is 70 feet above Tremont-street. It comprises 7,155,000 cubic feet, or more than 400,000 tons of earth, which will probably be removed by midsummer. This hill is supposed to have been an Indian cemetery.

Antiquities.

The following is an account of the first visit of the English at Plymouth, to Boston harbor, in the words of one of the party.

“It seemed good to the company in general, that though the Massachusetts, (a tribe of Indians,) had often threatened us, (as we were informed) yet we should go amongst them, partly to see the country, partly to make peace with them, and partly to procure their truck. For these ends the governours chose ten men, fit for the purpose, and sent Tisquantum, and two other savages, to bring us to speech with the people, and interpreter for us.

“[On the 18th of September, 1621, being Tuesday] we set out about midnight. the tide then serving for us; we, supposing it to be nearer than it is, thought to be there the next morning betimes: but it proved well near twenty leagues from New-Plymouth. We came into the bottom of the bay, but being late we anchored and lay in the shallop, not having seen any of the people. The next morning we put in for the shore. There we found many lobsters, that had been gathered together by the savages, which we made ready under a cliff. (Copp's hill in Boston.) The captain sent two sentinels behind

the cliff, to the landward, to secure the shallop, and taking a guide with him, and four of our company went to seek the inhabitants, where they met a woman coming for her lobsters; they told her of them and contented her for them. She told them where the people were: Tisquantum went to them; the rest returned, having direction which way to bring the shallop to them.

“The sachem, or governour of this place, is called Obbatinewat, and though he live in the bottom of the Massachusetts Bay, yet he is under Massasoit. He used us very kindly; he told us he durst not remain in any settled place, for fear of the Tarentines*. Also the squaw sachem or Massachusetts queen was an enemy to him. We told him of divers sachems that had acknowledged themselves to be king James his men, and if he also would submit himself, we would be his safeguard from his enemies; which he did, and went along with us to bring us to the squaw sachem.

“Again we crossed the bay, which is very large and hath at least fifty islands in it, but the certain number is not known to the inhabitants. Night it was before we came to that side of the bay where this people were,——that night also we rid at anchor aboard the shallop. On the morrow we went ashore all but two men, and marched in arms up the country. Having gone three miles, we came to a place where corn had been newly gathered, a house pulled down, and the people gone. A mile from hence, Nanepashemet their king *in his life time* had lived. His house was not like others, but a scaffold was largely built, with poles and planks, some six foot from ground, and the house upon that, being situated on the top of a hill.

“Not far from hence, in a bottom, we came to a fort built by their deceased king, the manner thus: there were poles some thirty or forty feet long, stuck in the ground as thick as they could be set one by another, and with these they enclosed a ring some forty or fifty feet over. A trench breast high was digged on each side: one way there was to go into it with a bridge. In the midst of this palisado stood the frame of an house, wherein *being dead* he lay buried.

“About a mile from hence we came to such another, but seated on the top of an hill; here Nanepashemet was killed, none dwelling in it since the time of his death. At this place we staid, and sent two savages to look the inhabitants, and to inform them of our ends in coming, that they might not be fearful of us. Within a mile of this place they found the women of the place together, with their corn on heaps, whither we supposed them to be fled for fear of us, and the more, because in divers places they had newly pulled down their

*The Eastern Indians.

houses, and for haste in one place had left some of their corn, covered with a mat, and nobody with it.

“ With much fear they entertained us at first, but seeing our gentle carriage towards them, they took heart and entertained us in the best manner they could, boiling cod and such other things as they had for us. At length, with much sending for, came one of their men, shaking and trembling for fear. But when he saw that we intended them no hurt, but came to truck, he promised us with his skins also. Of him we inquired for their queen; but it seemed she was far from thence, at least we could not see her. Here Tisquantum would have had us rifled the savage women, and taken their skins, and all such things as might be serviceable for us: for, (said he) they are a bad people, and have oft threatened you: but our answer was, were they never so bad, we would not wrong them, or give them any just occasion against us; for their words, we little weighed them, but if they once attempted any thing against us, then we would deal far worse than he desired. Having well spent the day, we returned to the shallop, almost all the women accompanying us to the shore. We promised them to come again to them, and they us to keep their skins.

“ Within this bay the savages say there are two rivers; the one whereof we saw, having a fair entrance, but we had no time to discover it. Better harbours for shipping cannot be than here are. At the entrance of the bay are many rocks; and in all likelihood good fishing ground. Many, yea, most of the islands have been inhabited, some being cleared from end to end, but the people are all dead or removed. Our victual growing scarce, the wind coming fair, and having a light moon, we set out at evening, and through the goodness of God, came safely home before noon the day following, with a considerable quantity of beaver and a good report of the place, *wishing we had been seated there.*”

Boston and its neighborhood were thus described by William Wood, 202 years ago:

“ First I will begin with the outmost plantation in the patent, to the southward, which is called Wichagusset [Weymouth.] This is but a small village, yet it is well timbered and hath good store of hay ground.—Three miles to the north of this is Mount Wolaston, a very fertile soil, and a place very convenient for farmers’ houses, there being great store of plain ground, without trees.—Six miles farther to the north lieth Dorchester, which is the greatest town in New-England, well wooded and watered, very good arable and hay grounds. The inhabitants of this town were the first that set upon the trade of fishing in the bay—A mile from this lieth Roxbury which is a fair and handsome country town; the inhabitants of it being all very rich: a clear fresh brook

runs through the town, and a quarter of a mile to the north is a small river called Stony River, upon which is built a water mill. Up westward it is something rocky, whence it hath the name of Roxbury. Here is no harbour for ships, because the town is seated in the bottom of a shallow bay; which is made by the neck of land on which Boston is built, so that they can transport all their goods from the ships in boats from Boston, which is the nearest harbour.

“This harbor is made by a great company of islands, whose high cliffs shoulder out the boisterous seas; yet may easily deceive any unskilful pilot; presenting many fair openings and broad sounds; which afford too shallow water for ships, though navigable for boats and pinnaces. It is a safe and pleasant harbour within, having but one common and safe entrance, and that not very broad; there scarce being room for three ships to come in board and board at a time; but being once in, there is room for the anchorage of 500 ships. The seamen having spent their old store of wood and water, may here have fresh supplies from the adjacent Islands, with good timber to repair their weather beaten ships.

“Boston is two miles N.E. of Roxbury. Its situation is very pleasant, being a peninsula hemmed in on the south side by the bay of Roxbury, and on the north side, with Charles river, the marshes on the back-side, being not half a quarter of a mile over; so that a little fencing will secure their cattle from the wolves. Those that live here upon their cattle, must be constrained to take farms in the country, or else they cannot subsist; the place being too small to contain many, and fittest for such as can trade into England, for such commodities as the country wants, being the chief place for shipping and merchandize.

“This neck of land is not above four miles in compass, in form almost square, having on the south side at one corner, a great broad hill, whereon is planted a fort, which can command any ship, as she sails into the harbour within the still bay. On the north side is another hill, equal in bigness, whereon stands a windmill. To the northwest is a high mountain, with three little rising hills on the top of it, wherefore it is called the *Tramont*.

“From the top of this mountain, a man may overlook all the islands which lie within the bay, and descry such ships as are on the sea coast.

“This town although it be neither the greatest nor the richest, yet is the most noted and frequented, being the centre of the plantations, where the monthly courts are kept. Here likewise dwells the Governour. This place hath very good land affording rich cornfields and fruitful gardens, having likewise sweet and pleasant springs. The inhabitants of this

place, for their enlargement, have taken to themselves farm-houses in a place called Muddy River, [Brookline] two miles from the town, where there is good ground, large timber, and store of marsh land and meadow. In this place they keep their swine and other cattle in the summer, whilst the corn is in the ground at Boston, and bring them to town in the winter.

“Newtown (Cambridge) is one of the neatest and best compacted towns in New England, having many fair structures, with many handsome contrived streets: the inhabitants most of them are very rich.—Half a mile westward of this is Watertown, a place nothing inferior for land, wood, meadows and water to Newtown. Within half a mile of this town is a great pond which is divided between the two towns, and divides their bounds to the northward. Both towns are on the north side of the river Charles.

“On the same side of that river is Charlestown, which is another neck of land, on whose north side runs Mystick river. At this town there is kept a ferry boat to convey passengers over Charles river, which between the banks is a quarter of a mile over, being a very deep channel. Up higher is a broad bay, being above two miles between the shores, into which run Stony river and Muddy river. Towards the southwest in the midst of this bay is a great oyster bank: towards the northeast is a great creek, upon whose shore is situated a small village [included within the bounds of Charlestown.] At the bottom of this bay, the river begins to be narrower, being but half a quarter of a mile broad.

“The next town is Mystick [Medford] which is three miles from Charlestown by land, and a league and a half by water. It is seated by the water side very pleasantly; there are not many houses as yet. On the west side of this river the Governour hath a farm, where he keeps most of his cattle. On the east side is Mr. Craddocks plantation, where he hath a park impaled and keeps his cattle, till he can store it with deer. Here likewise he is at charges of building ships. The last year one was upon the stocks of an hundred tons; that being finished they are to build one of twice her burthen.

“The last town in the still bay is Winnesimet [Chelsea,] a very sweet place for situation; it is within a mile of Charlestown, the river only parting them.

“The next plantation is Saugus [including Lynn] six miles northeast from Winnesimet. This town is pleasant for situation, seated at the bottom of a bay, which is made on one side with the surrounding shore, and on the other side with a long sandy beach, which is two miles long to the end, whereon is a neck of land called NAHANT. Upon the south side of the sandy beach the sea beateth, which is a true prognostication, to pre-sage storms and foul weather, and the breaking up of the

frost : for when a storm hath been or is likely to be it will roar like thunder, so as to be heard six miles."

Boston was described by Johnson in his "Wonder Working Providence," about the year 1663, in the following words :—

"Invironed it is with brinish floods, saving one small Istmos, which gives free access to the neighboring towns by land, on the south side, on the northwest and northeast. Two constant fairs are kept for daily trafique thereunto. The form of this town is like a *heart*, naturally situated for fortifications, having two hills on the frontier part thereof next the sea, the one well fortified on the superficies thereof, with store of great artillery well mounted. The other hath a very strong battery built of whole timber, and filled with earth ; at the descent of the hill, in the extreme poynt thereof betwixt these two strong arms lies a cove or bay, on which the chief part of this town is built, overtopped with a third hill ; all these like overtopping towers, keep a constant watch to see the approach of foreign dangers, being furnished with a beacon and loud babbling guns to give notice by their redoubled echo to all the sister towns. The chief edifice of this city-like town is *crowded* on the sea-banks, and wharfed out with great labour and cost ; the buildings beautiful and large, some fairly set forth with brick tile, stone and slate, and orderly placed with semely streets, whose continual enlargement presageth some sumptuous city. But now behold the admirable acts of Christ, at this his people's landing ; the hideous thickets in this place were such that wolves and bears nurst up their young from the eyes of all beholders, in those very places where the streets are full of girls and boys, sporting up and down with continued concourse of people. Good store of shipping is here yearly built, and some very fair ones. This town is the very mart of the land ; Dutch, French, and Portugalls come here to trafique."

City Charter.

As the citizens of many large towns in New-England contemplate the adoption of city forms of government, and as the construction and character of city charters are not generally understood, we herewith give the Boston charter in full :—

An Act establishing the City of Boston, Feb. 23, 1822.

SECT. 1. *Be it enacted by the Senate and House of Representatives, in General Court assembled, and by the authority of the same, That the inhabitants of the town of Boston, for all purposes, for which towns are by law incorporated in this Commonwealth, shall continue to be one body politic,*

in fact and in name, under the style and denomination of the City of Boston, and as such, shall have, exercise, and enjoy, all the rights, immunities, powers, and privileges, and shall be subject to all the duties and obligations, now incumbent upon, and appertaining to said town, as a municipal corporation. And the administration of all the fiscal, prudential, and municipal concerns of said city, with the conduct and government thereof, shall be vested in one principal officer, to be styled the Mayor, one select council, consisting of eight persons, to be denominated the Board of Aldermen, and one more numerous council to consist of forty-eight persons to be denominated the Common Council; which boards, in their joint capacity, shall be denominated the City Council, together with such other board of officers, as are herein after specified.

SECT. 2. *Be it further enacted,* That it shall be the duty of the Selectmen of Boston, as soon as may be, after the passing of this act, to cause a new division of the said town to be made into twelve wards, in such manner as to include an equal number of inhabitants in each ward, as nearly as conveniently may be, consistently with well defined limits to each ward; including, in such computation of numbers of inhabitants, persons of all descriptions, and taking the last census, made under the authority of the United States, as a basis for such computation. And it shall be in the power of the City Council, herein after mentioned, from time to time, not oftener than once in ten years, to alter such divisions of wards, in such a manner as to preserve, as nearly as may be, an equal number of inhabitants in each ward.

SECT. 3. *Be it further enacted,* That on the second Monday of 'April,' [altered to December—See page 170,] annually, the citizens of said city, qualified to vote in city affairs, shall meet together within their respective wards, at such time and place, as the Mayor and Aldermen, may by their warrant, direct and appoint; and the said citizens shall then choose by ballot one Warden and one Clerk, who shall be resident in said ward, who shall hold their offices for one year, and until others shall be appointed in their stead. And it shall be the duty of such Warden to preside at all meetings of the citizens of such ward, to preserve order therein; and it shall be the duty of such Clerk to make a fair and true record, and keep an exact journal of all the acts and votes of the citizens, at such ward meetings; to deliver over such records and journals, together with all other documents and papers held by him, in his said capacity, to his successor in such office. And if, at the opening of any annual meeting, the Warden of such ward should not be present, the Clerk of such ward shall call the citizens to order, and preside at such meeting until a Warden shall be chosen by ballot. And if,

at any other meeting, the Warden shall be absent, the Clerk, in such case, shall so preside, until a Moderator or Warden *pro tempore*, shall be chosen; which may be done by nomination and hand vote, if the Clerk so direct. At such meeting also, five inspectors of elections shall be chosen for such ward, being residents therein, by ballot, to hold their offices for one year. And it shall be the duty of the Warden and Inspectors, in each wards to receive, sort, count and declare all votes, at all elections within such ward. And the Warden, Clerk, and Inspectors, so chosen, shall respectively be under oath, faithfully and impartially to discharge their several duties, relative to all elections; which oath may be administered, by the Clerk of such ward, to the Warden, and by the latter to the Clerk and Inspectors, or by any Justice of the Peace of the county of Suffolk; and a certificate of such oath's having been administered shall be entered in the record or journal, to be kept by the Clerk of such ward.

SECT. 4. *Be it further enacted*, That the Warden, or other presiding officer of such ward meeting, shall have full power and authority to preserve order and decorum therein, and to repress all riotous, tumultuous, and disorderly conduct therein, and for that purpose to call to his aid, any constable, or other peace officer, and also to command the aid and assistance of any citizen or citizens, who may be present; and any peace officer, or other citizen, neglecting or refusing to afford such aid, shall be taken and deemed to be guilty of a misdemeanor. And such Warden shall also have power and authority, by warrant, under his hand, to cause any person or persons who shall be guilty of any riotous, tumultuous, or disorderly conduct at such meeting, to be taken into custody, and restrained: *Provided, however*, That such restraint shall not continue after the adjournment or dissolution of such meeting: *And Provided, further*, That the person, so guilty of such disorderly conduct, shall be liable, notwithstanding such restraint, to be prosecuted and punished, in the same manner, as if such arrest had not been made.

SECT. 5. *Be it further enacted*, That the citizens of said city, qualified to vote in city affairs, at their respective ward meetings, to be held on the second Monday in 'April' [*altered to December—See page 170,*] annually, shall be called upon to give in their votes for one able and discreet person, being an inhabitant of the city, to be the Mayor of said city, for the term of one year. And all the votes so given in, in each ward, being sorted, counted, and declared by the Warden and Inspectors of elections shall be recorded at large, by the Clerk, in open ward meeting: and in making such declaration and record, the whole number of votes or ballots, given in, shall be distinctly stated, together with the name of every person

voted for, and the number of votes given for each person respectively; such numbers to be expressed in words at length; and a transcript of such record certified and authenticated by the Warden, Clerk, and a majority of the Inspectors of elections for each ward, shall forthwith be transmitted or delivered by such ward Clerk, to the Clerk of the city. And it shall be the duty of the City Clerk, forthwith to enter such returns, or a plain and intelligible abstract of them, as they are successively received, upon the journal of the proceedings of the Mayor and Aldermen, or some other book to be kept for that purpose. And it shall be the duty of the Mayor and Aldermen to meet together, within two days after such election, and to examine and compare all the said returns, and to ascertain whether any person has a majority of all the votes given for Mayor; and in case a majority is so given, it shall be their duty to give notice thereof, in writing, to the person thus elected, and also to make the same known to the inhabitants of said city. But if, on such an examination no person appears to have a majority of all the votes given for Mayor, the Mayor and Aldermen for the time being, shall issue their warrants for meetings of the respective wards, for the choice of a Mayor, at such time and place, as they shall judge most convenient; And the same proceedings shall be had in all respects, as are herein before directed, until a Mayor shall be chosen by a majority of all the voters, voting at such elections. And in case of the decease, inability, or absence of the Mayor, and the same being declared and a vote passed by the Aldermen and Common Council, respectively, declaring such cause, and the expediency of electing a Mayor, for the time being, to supply the vacancy thus occasioned, it shall be lawful for the Aldermen and Common Council to meet in convention, and elect a Mayor to hold the said office until such occasion shall be removed, or until a new election. [See page 171.]

SECT. 6. *Be it further enacted,* That the citizens in their respective ward meetings, to be held on the second Monday of 'April' [altered to December—See page 170,] annually, shall be called upon to give in their votes for eight persons, being inhabitants of said city, to constitute the Board of Aldermen, for the ensuing year; and all the votes so given, being sorted, counted, and declared by the Warden and Inspectors, shall be recorded at large, by the Clerk, in open ward meeting; and in making such declaration and record, the whole number of votes or ballots given in shall be particularly stated, together with the name of every person voted for, and the number of votes given for each person; and a transcript of such record, certified by the Warden and Clerk, and a majority of the Inspectors of each ward, shall, by the said Clerk, within two days, be transmitted to the City Clerk; whereupon the same

proceedings shall be had, to ascertain and determine the persons chosen as Aldermen, as are herein before directed in regard to the choice of Mayor, and for a new election, in case of the whole number required not being chosen at the first election. And each Alderman, so chosen shall be duly notified in writing of his election by the Mayor and Aldermen at the time being. [See page 170.]

SECT. 7. *Be it further enacted*, That the citizens of each ward, qualified to vote as aforesaid, at their respective ward meetings, to be held on the second Monday of 'April' [altered to December—See page 170,] annually, shall be called upon to give in their votes for four able and discreet men, being inhabitants of said ward, to be members of the Common Council; and all the votes given in as aforesaid, in each ward, and being sorted, counted, and declared by the Warden and Inspectors, if it appear that four persons have a majority of all the votes given at such election, a public declaration thereof, with the names of the persons so chosen, shall be made in open ward meeting, and the same shall be entered at large, by the Clerk of such ward, in his journal, stating particularly the whole number of votes given in, the number necessary to make a choice, and the number actually given for each of the persons, so declared to be chosen. But, in case four persons are not chosen at the first ballot, a new ballot shall be opened for a number of Common Council-men, sufficient to complete the number of four; and the same proceedings shall be had, as before directed, until the number of four shall be duly chosen; *Provided, however*, That if the said elections cannot conveniently be completed on such day, the same may be adjourned to another day, for that purpose, not longer distant than three days. And each of the persons so chosen as a member of the Common Council, in each ward, shall, within two days of his election, be furnished with a certificate thereof, signed by the Warden, Clerk, and a majority of the Inspectors of such ward; which certificate shall be presumptive evidence of the title of such person to a seat in the Common Council, but such Council, however, shall have authority to decide ultimately upon all questions relative to the qualifications, elections, and returns of its members.

SECT. 8. *Be it further enacted*, That every male citizen of twenty-one years of age and upwards, excepting paupers, and persons under guardianship, who shall have resided within the Commonwealth one year, and within the city six months next preceding any meeting of citizens, either in wards, or in general meeting, for municipal purposes, and who shall have paid by himself or his parent, master, or guardian, any state or county tax, which, within two years next

preceding such meeting, shall have been assessed upon him, in any town or district in this Commonwealth, and also every citizen who shall be, by law, exempted from taxation, and who shall be in all other respects qualified as above mentioned, shall have a right to vote at such meeting, and no other person shall be entitled to vote at such meeting.

SECT. 9. *Be it further enacted*, That the Mayor, Aldermen, and Common Councilmen, chosen as aforesaid, shall enter on the duties of their respective offices on the first day of 'May' in each year, unless the same happen on a Sunday; and in that event on the day following; [*altered to 1st Monday in January—See page 170.*] and before entering on the duties of their offices, shall respectively be sworn, by taking the oath of allegiance and oath of office, prescribed in the constitution of this Commonwealth, and an oath to support the constitution of the United States. And such oaths may be administered to the Mayor elect, by any one of the Justices of the Supreme Judicial Court, or any Judge of any Court of Record, commissioned to hold any such Court within the said city, or by any Justice of the Peace for the county of Suffolk. And such oaths shall and may be administered to the Aldermen and members of the Common Council, by the Mayor being himself first sworn as aforesaid; and a certificate of such oaths having been taken, shall be entered in the journal of the Mayor and Aldermen, and of the Common Council, respectively, by their respective Clerks.

SECT. 10. *Be it further enacted*, That the Mayor and Aldermen, thus chosen and qualified, shall compose one board, and shall sit and act together as one body, at all meetings, of which the Mayor, if present, shall preside; but in his absence, the board may elect a Chairman, for the time being. The said board, together with the Common Council, in convention, shall have power to choose a Clerk, who shall be sworn to the faithful discharge of the duties of his office, who shall be chosen for the term of one year, and until another person is duly chosen to succeed him; removable, however, at the pleasure of the Mayor and Aldermen; who shall be denominated the Clerk of the City, and whose duty it shall be to keep a journal of the acts and proceedings of the said board, composed of the Mayor and Aldermen; to sign all warrants issued by them, and to do such other acts in his said capacity, as may, lawfully and reasonably be required of him; and to deliver over all journals, books, papers, and documents, entrusted to him as such Clerk, to his successor in office, immediately upon such successor being chosen and qualified as aforesaid, or whenever he may be thereto required by the said Mayor and Aldermen. And the City Clerk thus chosen

and qualified, shall have all the powers, and perform all the duties, now by law belonging to the Town Clerk of the Town of Boston, as if the same were particularly and fully enumerated, except in cases where it is otherwise expressly provided.

SECT. 11. *Be it further enacted,* That the persons so chosen and qualified, as members of the Common Council of the said city, shall sit and act together as a separate body, distinct from that of the Mayor and Aldermen, except in those cases in which the two bodies are to meet in convention; and the said Council shall have power, from time to time, to choose one of their own members to preside over their deliberations, and to preserve order therein, and also to choose a Clerk, who shall be under oath faithfully to discharge the duties of his office, who shall hold such office, during the pleasure of said Council, and whose duty it shall be to attend said Council, when the same is in session, to keep a journal of its acts, votes, and proceedings, and to perform such other services, in said capacity, as said Council may require. All sittings of the Common Council shall be public; also all sittings of the Mayor and Aldermen, when they are not engaged in executive business. Twenty-five members of the Common Council shall constitute a quorum for the transaction of business.

SECT. 12. *Be it further enacted,* That the Mayor of the said City, thus chosen and qualified, shall be taken and deemed to be the chief executive officer of said corporation; and he shall be compensated for his services by a salary to be fixed by the Board of Aldermen and Common Council in City Council convened, payable at stated periods; which salary shall not exceed the sum of five thousand dollars annually, and he shall receive no other compensation or emoluments whatever; and no regulations enlarging or diminishing such compensation shall be made, to take effect until the expiration of the year, for which the Mayor then in office, shall have been elected. And it shall be the duty of the Mayor to be vigilant and active at all times, in causing the laws for the government of said city to be duly executed and put in force; to inspect the conduct of all subordinate officers in the government thereof, and as far as in his power, to cause all negligence, carelessness, and positive violation of duty, to be duly prosecuted and punished. He shall have power, whenever, in his judgment, the good of said city may require it, to summon meetings of the Board of Aldermen and Common Council, or either of them, although the meeting of said boards or either of them may, stand adjourned to a more distant day. And it shall be the duty of the Mayor, from time

to time to communicate to both branches of the City Council all such information, and recommend all such measures as may tend to the improvement of the finances, the police, health, security, cleanliness, comfort, and ornament of the said city.

SECT. 13. *Be it further enacted, That the administration of police, together with the executive powers of the said corporation generally, together also with all the powers heretofore vested in the Selectmen of the town of Boston, either by the general laws of this Commonwealth, by particular laws relative to the powers and duties of said Selectmen, or by the usages, votes, or by-laws of said town, shall be and hereby are vested in the Mayor and Aldermen, as hereby constituted, as fully and amply as if the same were herein specially enumerated. [“And further, the said Mayor and Aldermen shall have full and exclusive power to grant licenses to innholders, victuallers, retailers, and confectioners, within the said city, in all cases wherein the Court of Sessions for the county of Suffolk, on the recommendation of the Selectmen of Boston, have heretofore been authorized to grant such licenses; and in granting such licenses, it shall be lawful for the said Mayor and Aldermen to annex thereto such reasonable conditions in regard to time, places, and other circumstances, under which such license shall be acted upon, as in their judgment, the peace, quiet, and good order of the city may require. Also to take bonds of all persons so licensed, in reasonable sums, and with sufficient sureties, conditioned for a faithful compliance with the terms of their said licenses, and of all laws and regulations respecting such licensed houses: And said Mayor and Aldermen, after the granting of any such license, shall have power to revoke or suspend the same, if in their judgment the order and welfare of said city shall require it. And any person or persons who shall presume to exercise either of the said employments, within said city, without having first obtained a license therefor, or in any manner, contrary to the terms of said license, or after the same shall have been revoked or suspended, such person or persons shall be liable to the same penalties and forfeitures, and to be prosecuted for in the same manner as now by law provided, in case of exercising either of said employments without license from the Court of Sessions for the county of Suffolk; and shall also be taken and deemed to have forfeited their bonds, respectively given aforesaid, upon which suits may be instituted against such licensed persons or their sureties, at the discretion of the said Mayor and Aldermen, and in such manner as they may direct, for the purpose of enforcing such forfeiture: Provided however, That all innholders, retailers, confectioners, and victuallers, shall, on being licensed as aforesaid, pay the*

same sum now required by law ; which sum shall be accounted for in the same way and manner as is now by law required.]
[Repealed by act of March 24, 1832.]

SECT. 14. *Be it further enacted,* That the Mayor and Aldermen shall have power to license all theatrical exhibitions, and all public shows, and all exhibitions, of whatever name or nature, to which admission is obtained on payment of money, on such terms and conditions as to them may seem just and reasonable ; and to regulate the same, from time to time, in such manner as to them may appear necessary to preserve order and decorum, and to prevent the interruption of peace and quiet. And any person or persons who shall set forth, establish, or promote any such exhibition or show, or publish or advertise the same, or otherwise aid or assist therein, without a license so obtained as aforesaid, or contrary to the terms or conditions of such license, or whilst the same is suspended, or after the same is revoked by said Mayor and Aldermen, shall be liable to such forfeiture, as the City Council may, by any by-law made for that purpose, prescribe.

SECT. 15. *Be it further enacted,* That all other powers now by law vested in the town of Boston, or in the inhabitants thereof, as a municipal corporation, shall be, and hereby are vested in the Mayor and Aldermen, and Common Council of the said city to be exercised by concurrent vote, each board, as hereby constituted, having a negative upon the other. More especially they shall have power to make all such needful and salutary by-laws, as towns by the laws of this Commonwealth have power to make and establish, and to annex penalties, not exceeding twenty dollars, for the breach thereof, which by-laws shall take effect and be in force from and after the time therein respectively limited, without the sanction or confirmation of any court, or other authority whatsoever ; *Provided,* That such by-laws shall not be repugnant to the constitution and laws of this Commonwealth : *And provided also,* That the same shall be liable to be annulled by the Legislature thereof. The said City Council shall also have power, from time to time, to lay and assess taxes for all purposes for which towns are by law required or authorized to assess and grant money, and also for all purposes, for which county taxes may be levied and assessed, whenever the city shall alone compose one county : *Provided, however,* That in the assessment and apportionment of all such taxes upon the polls and estates of all persons liable to contribute thereto, the same rules and regulations shall be observed as are now established by the laws of the Commonwealth, or may be hereafter enacted, relative to the assessment and apportionment of town taxes. The said City Coun-

cil shall also have power to provide for the assessment and collection of such taxes, and to make appropriations of all public moneys, and provide for the disbursement thereof, and take suitable measures to ensure a just and prompt account thereof; and for these purposes, may either elect such assessors, and assistant assessors, as may be needful, or provide for the appointment or election of the same, or any of them, by the Mayor and Aldermen, or by the citizens, as in their judgment may be most conducive to the public good, and may also require of all persons entrusted with the collection, custody, or disbursement of public moneys, such bonds with such conditions and such sureties, as the case may in their judgments require.

SECT. 16. *Be it further enacted,* That the said City Council shall have power, and they are hereby authorized to provide for the appointment or election of all necessary officers, for the good government of said city, not otherwise provided for; to prescribe their duties, and fix their compensation, and to choose a Register of Deeds, whenever the city shall compose one county. The City Council also shall have the care and superintendence of the public buildings, and the care, custody and management of all the property of the city, with power to lease or sell the same, (except the Common and Faneuil Hall,) with power also to purchase property, real or personal, in the name, and for the use of the city, whenever its interest or convenience may in their judgment, require it.

SECT. 17. *Be it further enacted,* That all the power and authority now by law vested in the Board of Health for the town of Boston, relative to the quarantine of vessels, and relative to every other subject whatsoever, shall be, and the same is hereby transferred to, and vested in the said City Council, to be carried into execution by the appointment of Health Commissioners, or in such other manner as the health, cleanliness, comfort, and order of the city may, in their judgment, require, subject to such alterations as the Legislature may from time to time adopt.

SECT. 18. *Be it further enacted,* That the Mayor and Aldermen of said city, and the said Common Council shall as soon as conveniently may be, after their annual organization, meet together in convention, and elect some suitable and trustworthy person to be Treasurer of said city.

SECT. 19. *Be it further enacted,* That the citizens at their respective ward meetings, to be held on the second Monday of 'April,' [altered to December, see page 170,] annually, shall elect by ballot, [*'a number of persons to be determined by the City Council, but not less than three in each ward, to be Firewards of said city, who together shall constitute the board*

of Firewards of said city, and shall have all the powers, and be subject to all the duties, now by law appertaining to the Firewards of the town of Boston, until the same shall be altered or qualified by the Legislature.”] [Power to choose firewards transferred to the Mayor and Aldermen, Act June 13, 1825.] And the said citizens shall, at the same time and in like manner, elect one person in each ward, to be an Overseer of the Poor; and the persons thus chosen shall together constitute the Board of Overseers for said city, and shall have all the powers and be subject to all the duties, now by law appertaining to the Overseers of the Poor for the town of Boston, until the same shall be altered or qualified by the Legislature. And the said citizens shall, at the same time and in like manner, elect one person in each ward, to be a member of the School Committee for the said city; and the person so chosen shall, jointly with the Mayor and Aldermen, constitute the School Committee for said city, and have the care and superintendence of the public schools.—[See page 173.]

SECT. 20. *Be it further enacted,* That all boards, and officers, acting under the authority of the said corporation, and entrusted with the expenditure of public money, shall be accountable therefor to the City Council in such manner as they may direct. And it shall be the duty of the City Council to publish and distribute, annually, for the information of the citizens, a particular statement of the receipts and expenditures of all public moneys, and a particular statement of all city property.

SECT. 21. *Be it further enacted,* That in all cases in which appointments to office are directed to be made by the Mayor and Aldermen, the Mayor shall have the exclusive power of nomination; such nomination however, being subject to be confirmed or rejected by the Board of Aldermen: *Provided, however,* That no person shall be eligible to any office, the salary of which is payable out of the city treasury, who at the time of his appointment, shall be a member either of the Board of Aldermen or Common Council.

SECT. 22. *Be it further enacted,* That it shall be the duty of the two branches of the City Council, in the month of ‘*May,*’ [altered to October, see page 172,] in each year, after their annual organization, to meet in convention, and determine the number of Representatives which it may be expedient for the corporation to send to the General Court in such year, within its constitutional limits, and to publish such determination, which shall be conclusive, and the number thus determined shall be specified in the warrant calling the meeting for the election of representatives; and neither the Mayor, nor any Alderman, or members of the Common Council, shall, at the

same time, hold any other office under the city government.

SECT. 23. *Be it further enacted,* That all elections for Governor, Lieutenant Governor, Senators, Representatives, Representatives to Congress, and all other officers, who are to be chosen and voted for by the people, shall be held at meetings of the citizens qualified to vote in such elections, in their respective wards, at the time fixed by law for those elections respectively. And at such meetings, all the votes given in, being collected, sorted, counted, and declared by the inspectors of elections in each ward, it shall be the duty of the Clerk of such ward to make a true record of the same, specifying therein the whole number of ballots given in, the name of each person voted for, and the number of votes for each, expressed in words at length. And a transcript of such record, certified by the Warden, Clerk, and a majority of the Inspectors of elections in such ward, shall forthwith be transmitted or delivered by each ward clerk to the clerk of the city. And it shall be the duty of the City Clerk forthwith to enter such returns, or a plain and intelligible abstract of them, as they are successively received in the journals of the proceedings of the Mayor and Aldermen, or in some other book kept for that purpose. And it shall be the duty of the Mayor and Aldermen to meet together within two days after every such election, and examine and compare all the said returns, and thereupon to make out a certificate of the result of such election, to be signed by the Mayor and a majority of the Aldermen, and also by the City Clerk, which shall be transmitted, delivered, or returned, in the same manner as similar returns are by law directed to be made by the Selectmen of towns; and such certificates and returns shall have the same force and effect in all respects, as like returns of similar elections made by the Selectmen of towns. And in all elections for representatives to the General Court, in case the whole number proposed to be elected shall not be chosen by a majority of the votes legally returned, the Mayor and Aldermen shall forthwith issue their warrant for a new election, and the same proceedings shall be had in all respects as are herein before directed, until the whole number shall be elected, *Provided, however,* That it shall be the duty of the Selectmen of the said town of Boston, within twelve days from the passing of this Act, to call a meeting of the qualified voters of the said town to give in their ballots on the following question:—Shall the election for State and United States officers be holden in general meeting? And it shall be the duty of the Selectmen to preside at the said meeting to receive, sort, count, and declare the votes given in, and to forward a certificate of the result to the Secretary of the Commonwealth, and publish the same in

two or more of the newspapers printed in Boston; and if a majority of the votes so given in shall be in the negative, then the provisions of the preceding part of this section shall regulate the said elections in wards; but if a majority of the votes given in as aforesaid shall be in the affirmative, then the said elections for State and United States officers shall be holden in the manner prescribed by the constitution and laws of the Commonwealth, with the exception that the Mayor and Aldermen and City Clerk, shall perform the duties now required by law to be performed by the Selectmen and Town Clerk. [See page 169.]

SECT. 24. *Be it further enacted,* That prior to every election of City officers, or of any officer or officers under the government of the United States or of this Commonwealth, it shall be the duty of said Mayor and Aldermen to make out lists of all the citizens of each ward, qualified to vote in such election, in the manner in which Selectmen and Assessors of towns are required to make out similar lists of voters, and for that purpose they shall have free access to the Assessors' books and lists, and be entitled to the aid and assistance of all Assessors, Assistant Assessors, and other officers of said city. And it shall be the duty of said Mayor and Aldermen to deliver such list of voters in each ward, so prepared and corrected, to the Clerk of said ward, to be used by the Warden and Inspectors thereof at such election; and no person shall be entitled to vote at such election, whose name is not borne on such list. And to prevent all frauds and mistakes in such elections, it shall be the duty of the Inspectors, in each ward to take care that no person shall vote at such election, whose name is not so borne on the list of voters, and to cause a mark to be placed against the name of each voter on such list, at the time of giving in his vote.

SECT. 25. *Be it further enacted,* That general meetings of the citizens, qualified to vote in city affairs, may from time to time be held, to consult upon the common good, to give instructions to their representatives, and to take all lawful measures to obtain a redress of any grievances, according to the right secured to the people by the constitution of this Commonwealth. And such meetings shall and may be duly warned by the Mayor and Aldermen, upon the requisition of fifty qualified voters of said city.

SECT. 26. *Be it further enacted,* That all warrants for the meetings of the citizens, for municipal purposes to be had either in general meetings or in wards, shall be issued by the Mayor and Aldermen, and shall be in such form, and shall be served, executed, and returned at such time, and in such manner, as the City Council may, by any by-law, direct and appoint.

SECT. 27. *Be it further enacted,* That for the purpose of organizing the system of government hereby established, and putting the same into operation in the first instance, the Selectmen of the town of Boston, for the time being, shall seasonably, before the second Monday of April next, issue their warrants for calling meetings of the said citizens in their respective wards, qualified to vote as aforesaid, at such place and hour as they shall think expedient, for the purpose of choosing a Warden, Clerk, and five Inspectors of Elections, and also to give in their votes for a Mayor and eight Aldermen, for said city, and four Common Councilmen, three Firewards, one Overseer of the Poor, and one member of the School Committee, for each ward; and the transcripts of the records of each ward, specifying the votes given for Mayor and Aldermen, Firewards, Overseers, and members of the School Committee, certified by the Warden, Clerk, and a majority of the Inspectors, of such ward, shall at said first election, be returned to the said Selectmen of the town of Boston, whose duty it shall be to examine and compare the same. And in case said elections shall not be complete at the first election, then to issue a new warrant, until such election shall be completed, and to give notice thereof, in the manner herein before directed, to the several persons elected. And at said first meeting, the Clerk of each ward, under the present organization, shall call the citizens to order, and preside until a Warden shall be chosen; and at said first meeting, a list of voters in each ward, prepared and corrected by the Selectmen of the town of Boston, for the time being, shall be delivered to the Clerk of each ward, to be used as herein before directed.

SECT. 28. *Be it further enacted,* That so much of the act heretofore passed, relative to the establishment of a Board of Health for the town of Boston, as provides for the choice of members of the said Board, and so much of the several acts relative to the assessment and collection of taxes within the town of Boston, as provides for the election of Assessors, Assistant Assessors, also all such acts, and parts of acts, as come within the purview of this act, and which are inconsistent with, or repugnant to the provisions of this act, shall be, and the same are hereby repealed.

SECT. 29. And whereas by the laws of this Commonwealth, towns are authorized and required to hold their annual meetings some time in the months of March or April, in each year for the choice of town officers; and whereas such meeting, in the month of March in the present year, for the town of Boston, would be useless, and unnecessarily burthensome: Therefore,

Be it further enacted. That the annual town meetings, in the months of March or April be suspended, and all town officers now in office shall hold their places until this act shall go into operation.

SECT. 30. *Be it further enacted,* That nothing in this act contained shall be construed as to restrain or prevent the Legislature from amending or altering the same, whenever they shall deem it expedient.

SECT. 31. *Be it further enacted,* That this act shall be void, unless the inhabitants of the town of Boston, at a legal town meeting, called for that purpose, shall by a written vote, determine to adopt the same within twelve days.

At a legal meeting of the freeholders and other inhabitants of the town of Boston, holden at Faneuil Hall, on Monday the 4th day of March, A. D. 1822.

This meeting was called in conformity to the 23d and 21st sections of an act, entitled "An act to establish the City of Boston," passed on the 23d day of February, 1822.

The Selectmen presiding, the Chairman submitted the following questions to the qualified voters of the town, and requested them to write *yes* or *no*, against each question.

1st Question. Will you accept the Charter granted by the Legislature, entitled "An act to establish the City of Boston?"

2d Question. Shall the elections for State and United States officers be holden in general meeting?

Voted, That the Poll be closed at 3 o'clock.

At the close of the Poll it appeared that the whole number of ballots given in on the first question was

	4,678
namely, Yeas, 2,797	<u> </u>
Nays, 1,881	4,678
Majority, 916 for accepting the Charter.	

The whole number of votes given in on the second question, was

	4,700
namely, Yeas, 1,887	<u> </u>
Nays, 2,813	4,700

Majority 926 against electing State and United States officers in general meeting.

The state of the votes was declared by the Chairman of the Selectmen, and then the meeting was dissolved.

ALTERATIONS OF, AND AMENDMENTS TO, THE CITY
CHARTER.

Extract from "An Act, providing for filling vacancies in the Board of Aldermen, &c." [*Passed June 12, 1824.*]

SECT. 6. *Be it further enacted*, That in case of the death or resignation of any member of the Board of Aldermen, the citizens of Boston shall have power to fill such vacancy at any regular meeting that may thereafter be convened for that purpose.

An Act, in further addition to an Act entitled "An Act establishing the City of Boston." [*Passed Jan. 27, 1825.*]

SECT. 1. *Be it enacted by the Senate and House of Representatives, in General Court assembled, and by the authority of the same*, That the election of the Mayor, Aldermen, and Common Councilmen, and such other officers of the city of Boston, as are now by law to be chosen on the second Monday in April annually, shall in future be made on the second Monday in December annually, and the said officers so chosen shall hold their respective offices for the same term of time, and the same proceedings shall be had in relation to such elections as is provided in and by the Act, entitled, "An Act establishing the City of Boston," to which this is in addition: *Provided nevertheless*, That the next choice of the said city officers shall be made at such time, and in such manner, as are prescribed in and by the Act aforesaid, and the officers so elected shall severally hold their offices until the first Monday of January next, any thing in this act to the contrary notwithstanding.

SECT. 2. *Be it further enacted*, That the officers chosen under and by virtue of this Act, shall enter on the duties of their respective offices on the first Monday of January in each year, and shall be liable to all the duties and restrictions, and shall exercise all the powers to which the said officers are respectively subject or entitled, under and by virtue of the Act to which this is in addition, and all other Acts having relation to this subject matter.

SECT. 3. *Be it further enacted*, That this Act shall be void, unless the inhabitants of the City of Boston, at any general meeting duly warned by public notice, of at least fourteen days, by the Mayor and Aldermen, shall, within sixty days from the passing hereof, by written vote adopt the same.

SECT. 4. *Be it further enacted*, That all the provisions of the Act to which this in addition, or of any other Act inconsistent with the provisions of this Act, shall be, and hereby are repealed.

At a general meeting of the inhabitants of the City of Boston, held at Faneuil Hall, on the 25th day of February, Anno Domini, 1825.

The meeting was called for the purpose of giving in the written votes upon the adoption of the Act of the Legislature, entitled "An Act in further addition to an Act entitled an Act establishing the City of Boston."

Voted, That the poll be closed at one o'clock, P. M.

At the close of the Poll it appeared that the whole number of ballots given in was

	102
namely, Yeas,	100
Nays,	2—102

So the same was decided in the affirmative.

ATTEST, S. F. M'CLEARY, *City Clerk*.

An Act providing in certain cases for the Election of Mayor of the City of Boston. [*Passed June 5, 1830.*]

SECT. 1. *Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same,* That whenever, on examination by the Mayor and Aldermen of the City of Boston, of the returns of votes given for Mayor at the meetings of the wards holden for the purpose of electing that officer, last preceding the first Monday of January, in each year, no person shall appear to have a majority of all the votes given for Mayor, the Mayor and Aldermen, by whom such examination is made, shall make a record of that act, an attested copy of which it shall be the duty of the City Clerk to produce and read, on the first Monday of January, in the presence of the Members returned to serve as Aldermen and Common Councilmen; and thereupon the oaths prescribed by law may be administered to the members elect, by any one of the Justices of the Supreme Judicial Court, or any Judge of any Court of Record holden in said city, or by any Justice of the Peace for the county of Suffolk; and thereupon the members of the Board of Aldermen shall proceed to elect a chairman, and the Common Council a president, in their respective chambers, and being respectively organized, shall proceed to business in the same manner as is provided in the tenth section of the city charter in case of the absence of the Mayor:—And the Board of Aldermen shall forthwith issue their warrants for meetings of the Citizens of the respective wards, for the choice of a Mayor, at such time and place as they shall judge most convenient; and the same proceedings shall be had, in all respects, as are directed in and by the provisions of the fifth section of the city charter, and

repeated from time to time, until a Mayor shall be chosen, by a majority of all the voters voting at such elections.

SECT. 2. *Be it further enacted,* That in case any person elected Mayor of said City shall refuse to accept the office, the same proceedings shall be had in all respects, as are herein before directed in cases wherein there has been no choice of Mayor, until a Mayor be chosen by a majority of votes. And in case of the unavoidable absence by sickness or otherwise, of the Mayor elect, on the first Monday in January, the City Government shall organize itself in the mode herein before provided, and may proceed to business in the same manner as if the Mayor were present.

SECT. 3. *Be it further enacted,* That this act shall be void, unless the inhabitants of said City of Boston, at a legal city meeting, called for that purpose, shall by a written vote, determine to adopt the same, within twelve days from the time of the passing of this act.

At a general meeting of the inhabitants of the City of Boston, qualified as the law directs, held at Faneuil Hall, on Wednesday, the sixteenth day of June, Anno Domini, 1830.

The meeting was called for the purpose of receiving the written votes yea or nay, for or against the act of the Legislature, passed on the fifth day of June instant, entitled "An Act providing in certain cases for the election of Mayor of the City of Boston."

The act above mentioned was read by the Moderator.

Voted, That the poll be closed at half past 12 o'clock.

At the close of the poll, the votes being sorted and counted, it appeared that the whole number was 73

namely, 68 yeas,
5 nays,

73

The same was declared in the affirmative, and the act adopted unanimously.

A true Copy. Attest, S. F. M'CLEARY, *City Clerk.*

An Act in further addition to an Act, entitled "An Act establishing the City of Boston." [*Passed June 17, 1831.*]

Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, That the time for the City Council of the City of Boston to meet in Convention, in order to determine the number of Representatives which it may be expedient for said City

to send to the General Court, shall be in the month of October instead of May, in each year, any thing in the act to which this is in addition, to the contrary notwithstanding.

An Act in further addition to an Act establishing the City of Boston.

SECT. 1. *Be it enacted by the Senate and House of Representatives, in General Court assembled, and by the authority of the same,* That the School Committee of the City of Boston shall consist of the Mayor of said City, of the President of the Common Council of said City, and of twenty-four other persons, two of whom shall be chosen in each ward of said City, and who shall be inhabitants of the wards in which they are chosen; said twenty-four members to be chosen by the inhabitants, at their annual election of municipal officers.

SECT. 2. *Be it further enacted,* That so much of the act to which this is in addition, as is inconsistent with the provisions of this act, is hereby repealed: *Provided, however,* that the present School Committee of said city shall continue in office, until a new committee shall be chosen under the provisions of this act. [This act passed April 7, 1835, and subsequently adopted by the citizens.]

An Act for the further regulation of the erection of Wooden Buildings in the City of Boston.

SECT. 1. *Be it enacted by the Senate and House of Representatives, in General Court assembled, and by the authority of the same,* That, from and after the passing of this act, no wooden building of more than sixteen feet in height, from the ground or foundation thereof, shall be erected in the said city of Boston, except under the following limitations and restrictions, namely: the dimensions of such building, on the ground, not to exceed twenty-five feet by fifty feet; or, being in any other proportion, not to cover more than twelve hundred and fifty superficial feet of land; the walls not to exceed twenty feet in height from the under side of the sills, which sills may be three feet six inches above the level of the street, to the eaves of the roof; the roof in the highest point thereof not to rise more than thirty-two feet from the under side of the sills aforesaid, and there shall be at least one scuttle at or near the highest point of said roof.

SECT. 2. *Be it further enacted,* That when two or more such two story buildings as are provided for in this act, shall be erected in connection, or within three feet of each other, or within three feet of any other wooden building, more than sixteen feet in height, there shall be an entire brick or stone wall between them, commencing from the foundation of said

wall, and carried to the height of twelve feet above the level of the street, at least twelve inches in thickness, and the residue of said wall shall be of at least eight inches in thickness, and in case any openings are made through said walls, the same shall be secured against fire by iron doors applied to such openings: *Provided*, that such brick or stone walls may be dispensed with by consent, in writing, of the Mayor and Aldermen of the city of Boston, on what are commonly called the neck lands, in said city: *Provided, also*, that nothing in this act shall in any way affect that part of the said city called South Boston, or repeal any of the provisions of the existing law relative to the erection of buildings in that place: and, *Provided, further*, that that part of the said city of Boston, known by the name of East Boston, shall be entitled to the same rights and privileges as to the erection of wooden buildings, which now belong to that part of said city called South Boston.

SECT. 3. *Be it further enacted*, That, if any person or persons shall violate the provisions of this act, such person or persons, on conviction thereof, in any court competent to try the same, shall forfeit and pay for every such offence, a sum not less than fifty, nor more than five hundred dollars, and shall be liable to a like prosecution and penalty for each and every year after such conviction, until such building or buildings, erected contrary to the provisions aforesaid, shall be removed or made to conform thereto; and the said penalties and forfeitures incurred by virtue of this act may be recovered by indictment, to the use of the City of Boston, or by an action of debt in any Court competent to try the same, one half to the use of the person or persons who shall sue therefor, and the residue to the use of the said city.

SECT. 4. *Be it further enacted*, That it shall be the duty of the Board of Engineers of the said city, to cause suits to be commenced without delay against each and all who shall violate the provisions of this act, and to prosecute the same to final judgment.

SECT. 5. *Be it further enacted*, That all acts and parts of acts respecting the erection of wooden buildings in the City of Boston, excepting such only as relate in any way to brick or stone buildings, be, and the same are hereby repealed. [This act passed April 8th, 1835, and subsequently adopted by the citizens.]

Chelsea.

This town was formerly a Ward of Boston. Incorporated, 1738; pop. 770; r. ps. 187; val. \$118; s. m. \$700. It lies from Boston about 6 miles N.E. across Charles river, and 6 miles E. of Charlestown. The *U. S. Marine Hospital* in this town, is on a large plot of ground, in a delightful and airy situation, and affords a comfortable retreat for sick and disabled seamen. Charles Turner, *Superintendent*; Charles H. Stedman, *Physician*. Point Shirley, in this town, extending southeasterly forms the northern part of Boston harbor. Winnesimet Ferry, leading from the foot of Hanover-street, in Boston, to this town, is probably the oldest establishment of the kind in America. The first grant was given to Thomas Williams, in 1631. The distance across Charles river is about a mile and a half. Neat and commodious steamboats are continually running across this delightful stream, making the *Winnesimet* of the Indians, the *Hoboken* of Boston. *Cl*—Horatio Algier, Edward J. WORCESTER COUNTY.

THIS county was incorporated in 1731. Population, in 1820, 73,635—1830, 84,365; r. ps. 21,850; val. \$109 77. Area, 1500 square miles. Central lat. $42^{\circ} 23'$ N.; lon. $71^{\circ} 47'$ W. This county crosses the state from New-Hampshire on the north, to Connecticut and Rhode-Island on the south. It is bounded W. by the counties of Franklin, Hampshire, and Hampden, and E. by Norfolk and Middlesex counties. This is the largest county in the state. Its territory is larger than the state of Rhode-Island, and its population is greater than that of the state of Delaware. Its surface is rather undulating than hilly. The soil is generally strong, and produces all kinds of grain, grasses, fruits, &c. common to its climate. Its water power is abundant in almost every town, and perhaps in no section of New-England are the interests of agriculture, commerce and manufactures more completely blended, nor can there be found better resources for their united support. Its principal rivers are the Blackstone, Quinabaugh, Nashua, Ware, Millers, and Mill. There are in this county 55 towns, and 56 inhabitants to a square mile.

Ashburnham.

This town lies on the height of land between the Connecticut and Merrimack, and is well watered by large ponds. It was formerly called "Dorchester Canada," and is 50 miles N. W. of Boston, 30 N. of Worcester, and 35 W. of Lowell. Inc. 1765; pop. 1403; r. ps. 407; val. \$1 49; s. m. \$600. *Cl*—George Goodyear, c; 1 soc. m; 1 soc. u; 1 soc. b. *Phs*—N. Pierce, William H. Sterling.

First settled about 1721. Taken from Lancaster, 1781. It lies 40 miles W. of Boston, 12 N. of Worcester, and 6 S. W. of Lancaster. This town is watered by Still river, and several ponds which afford good fish. The manufacture of chairs is carried on here to a great extent. Pop. 1789; r. ps. 471; val. \$2 20; s. m. \$800; *Cl*—Peter Osgood, c; 1 soc. u. *Phs*—P. T. Kendall, L. Allen. *Att*—Alexander Dustin. *Pm*—Thomas H. Blood.

Sturbridge.

This town is well watered by *Quinneboag* river, on which are two cotton mills in successful operation, and other manufactories. Good fishing in the ponds. It lies 60 miles W. S.

W. of Boston, 18 S. W. of Worcester, and 48 N. W. of Providence. On the line of Connecticut. This town is about 16 ms. N. E. of *Stafford Springs*, in Connecticut. These springs are much visited. One contains a large portion of hydrogen gas and some iron. The other is chalybeate. These waters are doubtless useful in many diseases. Both sick and well receive good accommodations. Stafford is 26 miles N. E. of Hartford. Pop. of Sturbridge, 1688; r. ps. 431; val. \$2 34; s. m. \$800. Inc. 1738. *Cl*—Joseph S. Clark, c; Addison Parker, b. *Phs*—Jacob Carey, Jr. Hosea Wheeler, Calvin P. Fisk. *Att*—George Davis. *Pm*—Alvin Allen.

Sutton.

This is a pleasant town and extensively engaged in manufacturing. It is watered by the Blackstone river, and the Blackstone canal passes through it. Here are 3 Cotton Mills, 2 Woolen and other factories. Soap-stone. Granite. "Purgatory Cavern" in this town is a great curiosity. It is a fissure in Gneiss, nearly half a mile long, in most parts partially filled by the masses of rock that have been detached from the walls. The sides are often perpendicular, and sometimes 70 feet high; being separated from each other about 50 feet. (See Hitchcock's Geology, p. 106.) Persons visiting this cavern must guard against rattlesnakes. *Cl*—D. L. B. Goodwin, e; Job B. It lies 44 miles W. by S. of Boston, 9 S. by E. of Worcester, and 15 S. W. of Hopkinton Springs.

Templeton.

This is a very pretty town, of uneven surface, but much good land. It is watered by branches of Miller's and Chickapee rivers, and has many excellent mill sites. Here is a woolen factory, a hoe factory and a foundry. Considerable Palm Leaf is manufactured. It lies 60 miles W. N. W. of Boston, 26 N. W. by N. of Worcester, and 28 S. E. of Keene, N. H. Pop. 1551; r. ps. 418; val. \$2 01; s. m. \$700. *Cl*—Charles Wellington, and Mr. Bates, c; I v. soc. b. *Phs*—J. W. D. Osgood, Mason Spooner. *Att*—Edward Kirkland. *Pm*—Artemas Lee.

Upton.

This town was set off from Sutton, Mendon, and Hopkinton in 1735. Pop. 1157; r. ps. 302; val. \$1 46; s. m. \$600.

A branch of the Blackstone rises from a pond in this town. Good orchards. It lies 35 miles W. S. W. of Boston, 15 S. E. of Worcester, and 7 S. W. of Hopkinton Springs. *Cl*—D. B. Bullard, b; Benjamin Wood, c; 1 soc. u; 1 soc. m. *Ph*—John Starkweather. *J. P*—Ezra Wood, Elisha Bradish, Eli Warren. *Pm*—Eli Warren.

Uxbridge.

The waters of Mumford river and of the Blackstone river and canal pass through this town, and afford it valuable and extensive hydraulic powers. Here are five Woolen Factories, two large Cotton Mills, and a machine shop. Iron ore. Granite. The Indian *Wacuntug*. This town is very pleasant and very flourishing. It lies 40 miles S. W. of Boston, 17 S. by E. of Worcester, and 24 N. N. W. of Providence. Inc. 1727; pop. 2086; r. ps. 440; val. \$2 93; s. m. \$600. The Blackstone Bank has a capital of \$100,000. B. Taft, Jr. *Pt*. Ward.

This town was formerly part of Worcester, Sutton, Leicester and Oxford, and was named in honor of Artemas Ward, the first Major General in the Revolutionary War, who died at Shrewsbury, Oct. 28, 1800. It was inc. 1778; pop. 690; r. ps. 172; val. 85 cts.; s. m. \$400. It is watered by French river, and its soil is well adapted to agricultural purposes. It lies 45 miles W. S. W. of Boston, and 5 S. by W. of Worcester. *Cl*—John Paine, b; M. G. Pratt, c. *Ph*—Daniel Green. *J. P*—John Clark, Solomon Sibley, Thomas Drury, Jr. *Pm*—Lyman Gale.

Warren.

This town was incorporated by the name of Western in 1741. In 1834, its name was changed to that of Warren. It lies 60 miles W. by S. of Boston, 23 S. S. W. of Worcester, and 26 N. E. by E. of Springfield. Pop. 1889; r. ps. 311; val. \$1 62; s. m. \$600. It is watered by the Chickapee, and is 7 miles S. E. of Ware. *Cl*—1 soc. u; 1 soc. c. *Ph*—Nelson Carpenter. *J. P*—Harvey Sessions, Pardon Keys, J. Bacon, and others. *Pms*—Nathan Hathaway. *South R. Hodges*.

Webster.

This town was set off from Dudley and Oxford, and incorporated, in 1852. French river, and a large pond emptying into it, gives this place water privileges of 20 feet head, and of great power and constancy. There are in this town 3 woolen factories, and 4 large cotton mills, a machine shop, &c. &c. It lies 50 miles W.S.W. of Boston, 16 S. of Worcester, 45 E. by S. of Springfield, and 28 N.W. of Providence. The remnant of the Dudley tribe of Indians reside here. Their number is about 40; but few of them are of pure blood. They own some land and receive a stipend from the State. *Cl*—Mr. Gove, b; 1 soc. m. *Phs*—Charles Negus, John W. Tenny. *J. P*—Geo. B. Slater. *Pm*—Jonathan Day.

Westborough.

This is a pleasant town, 32 miles W. of Boston, (by railroad) 10 E. of Worcester, and 3½ N.W. of Hopkinton Springs. It was formerly a part of Marlborough, and was inc. 1717; pop. 1438; r. ps. 378; val. \$174; s. m. \$700. It is of good soil and well watered by branches of Concord and Sudbury rivers. Large ponds; good fishing. Granite. Considerable manufactures of shoes and edge tools. *Cl*—Hosea Hildreth, and 1 v. soc. c; A. King, b. *Phs*—Benjamin Pond, Jr. and Dr. Rising. *Atts*—N. Harrington, O. Peters. *Pm*—Onslow Peters.

West Boylston.

Set off from Boylston, in 1808. First settled about 1720. The Nashua river as it passes through this town affords a good water power. It is of excellent soil, well cultivated, and very pleasant. Here are 3 cotton mills, a machine shop, and other smaller factories. Pop. 1053; r. ps. 245; val. \$120; s. m. \$500. *Cl*—Elijah Payne, P. R. Russell, c; 1 soc. b. *Phs*—Sherman Smith and Dr. Griggs. *J. P*—Robert B. Thomas, Joseph White. *Pm*—T. Davis.

Westminster.

This town lies on the range of high lands which separate the waters of the Connecticut and Merrimac. From the village a prospect is presented of lake and mountain with all the varied scenery which renders a New England town peculiarly delightful. Several streams, rising from large ponds in this town and its neighborhood, produce a considerable water power which is improved for manufactories of various kinds. These waters are so elevated and constant, that, with a small

expense, they might be rendered exceedingly valuable. They deserve the particular attention of those in search of mill sites in this part of the state. This town lies 50 miles W.N.W. of Boston, 20 N. by W. of Worcester, and 7 miles S.W. of Fitchburgh. Inc. 1759; pop 1695; r. ps. 430; val. \$1 85; s. m. \$800. *Cl*—Charles Hudson, u; Cyrus Mann, c; 1 soc. b. *Phs*—John White, Flavel Cutting. *Att*—Simon Sanderson. *Pm*—Timothy Dotey.

Winchendon.

This town is watered by Miller's river, on which are a cotton and woolen factory. The mineral spring in this town is not much visited. It was inc. 1764; pop. 1463; r. ps. 361; val. \$1 72; s. m. \$700. It is a pleasant town, and lies 60 miles N.W. by W. of Boston, 34 N.N.W. of Worcester, and 16 N. W. by W. of Fitchburgh. *Cl*—Caleb Brown, b; 1 v. soc c; 1 soc. m. *Phs*—Alva Godding, and Dr. Fay. *J. P*—Wm. Dunbar, Enoch Kidder, Mark Whitcomb, and others. *Pm*—M. Whitcomb.

Worcester.

This town was incorporated in 1684, but in consequence of Indian hostilities the first town-meeting was not held until 1722. This part of the country was called by the Indians *Quinsigamond*, and *Tatmuck* and *Bogachoak* hills were Indian residences. The central situation of the town, both in regard to the county and state, the fertility of its soil and that of the surrounding country; the salubrity of its climate, and the industry, intelligence and wealth of its people, have long since entitled it to the honor of being called the chief town of "the Heart of the Commonwealth." The town is situated in a valley and surrounded by hills of gentle acclivity. It is well built and beautifully shaded, and travellers, from every direction, are delighted with its neatness and beauty.

A number of the streams which form the head waters of the Blackstone meet in this town, and furnish a considerable water power. Here are 4 woolen factories, 2 cotton mills, a number of large machine shops, paper mills, a wire and screw factory, and large establishments for the manufacture of carriages, and various other articles. This is the centre of a large inland trade. The Blackstone canal passes from this town to Providence, a distance of 45 miles. It was opened in 1828, and cost \$600,000. Its dividends are merely nominal. See *Columbian Traveller*, &c. p. 24.

The *State Lunatic Hospital*, is a handsome building, admirably conducted, and is an institution honorable to human nature. It is a receptacle for all persons arraigned as criminals,

but found to have committed the offences in a state of insanity;—of paupers, and of those who are so furiously mad as to render their continuance at large dangerous to the community. Although the worst cases of insanity are found here, yet experience has proved that there are very few cases of derangement which may not be ameliorated by the kindly influences of humane treatment. The average recoveries hitherto has been 55 3-4 per cent. This institution was established in 1832. The number received to Dec. 1, 1834, was 165 males—107 females, total, 272. There remained, at that time, 118, which is about the average number of patients. The cost of maintaining the Hospital from Dec. 1, 1833, to Nov. 30, 1834, was \$15,840. The Hospital is about being enlarged, and thereby its usefulness extended. Samuel Woodward, M.D. *Superintendent*. George Chandler, *Assistant Physician and Apothecary*. Mrs. Sophia Hitchcock, *Nutron*.

This town is the seat of many religious, literary and philanthropic societies.

The *American Antiquarian Society*, was founded in 1812. By the liberality of the late Isaiah Thomas, L.L.D. one of its first benefactors, a spacious hall was erected in 1820, for the reception of its large and valuable cabinet of antiquities and its library of about 12,000 volumes of American publications, particularly of all works pertaining to American history, and literature generally. Mr. Thomas was the father of New-England printers. He published the first newspaper in this town, in 1775, and, a few years after, the first bible in America. He was a gentleman of great patriotism and liberality. He was born in Boston, January 19, 1749, and died in this town, April 4, 1831. There are three banks in this town with a capital of \$400,000, and two mutual fire insurance companies. Population, 1820, 2,962—1830, 4,172. May 1, 1835, 6,624; r. ps. 1231; val. \$10 83. It lies in N. lat. 42° 23' and W. lon. 71° 44'. It is 394 miles from Washington, 40 W. of Boston. 51 E. of Northampton. 38 S. W. of Lowell, and 41 N.N.W. of Providence. *Cl*—Aaron Bancroft, Alonzo Hill, R. A. Miller, and 1 v. soc. c; F. A. Militia, and Synopsis of the Laws.

We promised on page 9, to say something more of the Militia, and to give a synopsis of the laws passed at the last session of the Legislature; but as the subject of the former is not of general interest, and the latter principally of a local character, they are omitted.

Massachusetts Hospital in Boston, and McLean Asylum for the Insane at Charlestown.

These departments of the *Massachusetts General Hospital*, although separately located, are one Institution, and was incorporated, 1811 It is under the management of a Board of 12 Trustees, and a Board of 5 Visitors. The funds of the Institution, including the munificent donations of the late John McLean, Esq. and Miss Mary Belknap, is about \$120,000.

Hospital in Boston. The number of patients received into this House since its establishment, to June, 1835, was 5,658. The average number of sick in the House is about 45. The average annual cost to the Institution, for each patient, for five successive years, was \$1 62, a week. Whilst no patients pay more than three dollars a week, (except a few who have extra rooms and attendants,) nearly two thirds of the whole number are entirely free; consequently those who do not pay, receive \$1 62, and those who do pay receive \$1 62 a week from the funds of this noble charity. *Acting Surgeons*, John C. Warren, George Hayward. *Acting Physicians*, James Jackson, John Ware, Walter Channing. *Superintendent*, Gamaliel Bradford, M. D. Cost of the land and buildings, \$144,500.

McLean Asylum. This establishment is located on a beautiful rise of ground, in Charlestown, near East Cambridge, and about a mile and a half from the City Hall. The buildings are large and are exceedingly well adapted to their philanthropic design. They cost about \$186 000. This House was opened for patients on the 6th of October, 1818, and from that time to January 1, 1834, 1015 patients were received. Of this number, 234 were married, and 340 unmarried, males; 233 married, and 173 unmarried, females. Of this number, 70 were from 10 to 20 years of age: 616 from 20 to 40, (of which 368 were males, and 248 females;) 191 from 40 to 50; 91 from 50 to 60; and 47 from 60 to 80. Of this number 362 recovered; 143 were much improved, 140 benefitted, 89 died, 21 eloped, 193 were not improved, and 67 remained in the Asylum. Of this number, 112 had been intemperate; 122 had insane ancestors, and 59 had near collaterals, but no ancestors stated as insane. The average current expenses of each patient at this Asylum, is estimated at \$4 50 a week. The lowest rate for which patients belonging to this State are received, is \$3 a week—from other States \$4 50 a week. The number of patients received from January 1, 1834, to June 19, 1835, was 150. The number of patients at the latter date, was 88, which was a greater number than at any former period. RUFUS WYMAN, M. D. was Superintendent and Physician from the commencement of the Asylum to May, 1835, to whom the public is much indebted for the great intelligence and fidelity by which he has advanced its usefulness. *Superintendent and Physician*, Thomas G. Lee. *Steward*, Columbus Tyler. *Matron*, Mrs. Tyler. *Assistant and Apothecary*, Edward Rowland.

Belonging to, and surrounding this Asylum, are about 15 acres of land appropriated to courts and gardens. These are laid out with gravelled walks; the former are furnished with summer houses, and the latter are ornamented with groves of fruit and ornamental trees, shrubbery and flowers. Surrounding the lower garden and within the enclosure, is a carriage path, where patients are taken to ride. In the centre is a small fresh water pond containing several hun-

dead gold and silver fish, and immediately contiguous, is a summer house where the patients at times resort for games and amusements.

The system of moral treatment adopted and pursued, is founded upon principles of elevated benevolence and philanthropy, and an acquaintance with human nature and the capabilities and wants of the insane. The previous tastes, habits and pursuits, and the present inclinations and feelings of each individual, are habitually consulted. A library for the use of the patients has recently been purchased, and those of them who are disposed to read, are permitted at stated periods to send in their names and the number of the book desired; the list is examined and approved by the physician, and the books are distributed by the librarian. In the same way, writing materials are distributed, and patients are engaged in keeping journals—writing sketches of their lives—poetry—addressing letters to their friends and in drawing, &c. Some engage in games, as bowling—throwing the ring—battledore—graces—jumping the rope—chess—draughts—back-gammon, &c., or are occupied in walking and riding into the country, or in making fishing excursions in the company of their attendants; while others are working on the farm and in the garden. The female patients besides being employed in various kinds of needle and ornamental work, are engaged in various domestic labors. About 30 of the quiet and convalescent patients now regularly attend the religious exercises of the family, and a portion of them join in the vocal and instrumental music of the occasion; a part of this number also attend church on the Sabbath in company with the nurses and attendants, and dine with the family. A regulated intercourse with the family and society is regarded as an important auxiliary in the means of cure, and on suitable occasions they are invited into the house, where parties are made for their special amusement and benefit.

New-England Institution for the Education of the Blind, in Boston.

This Institution was incorporated in 1829; but little was accomplished until 1832, when Dr. Howe returned from Europe, accompanied by a blind teacher; manifesting that zeal in the cause of the blind which had distinguished his philanthropic labors, in another sphere, in a distant land. He opened a school with six blind young scholars. The progress of those children was so great, and the value of an Institution of the kind so apparent, that Legislatures and citizens, generally, became much interested. By public and private donations, particularly by the influence of Ladies in several parts of New England, and by the munificent gift of a splendid building in Pearl Street, by the Hon. Thomas H. Perkins, the Institution has increased, both in reputation and funds, with unparalleled success. The scholars are instructed in all those branches common in other schools, and some of them in the higher branches of literature. Music is the study of all. Mechanical labors are taught and enjoyed by the pupils. Musical instruments of all kinds, and other implements are provided for their convenience and use. A printing press is established, and several books have been printed in embossed letters, which are superior to any in Europe. It is exceedingly delightful to see these interesting youth, whose lives once seemed a dreary waste, and witnessing their

improvement in acquiring useful knowledge, partaking of all those recreations, natural and proper for their age, sex, and condition, and fitting themselves for useful stations in society. The annual expense to those who pay is \$150. There have been admitted into the Institution, 58; 43 now remain. It is estimated that the number of blind, of all ages, in the United States, exceeds 7000. The Institution is managed by a Board of Trustees, and is patronized by the Governments of all the New-England States. *Director*, S. G. Howe, M. D. *Professor of Music*, L. Mason. *Teacher*, E. Trencher. *Master Workman*, J. Pringle. *Matron*, Mrs. Smith.

Eye and Ear Infirmary.

This Institution was commenced in Boston, by Drs. Jeffries and Reynolds, in 1824, from a conviction of its utility and importance, derived from what they had seen and known of similar establishments in Europe. Those gentlemen conducted the establishment at their own expense for some time, during which large numbers received the most important benefits. In 1827, by the philanthropic exertions of these and other gentlemen, an Act of Incorporation was obtained, and some funds were raised. As early as 1828, 2,610 cases were treated at the Infirmary, of which about five sixths were cured. Of those cases about one sixth were for diseases of the Ear. Since that time the number of applicants has increased annually; and this Institution, whose merits are not surpassed by any other in the city, cannot fail of receiving that patronage it so richly deserves. *Physicians*—John Jeffries, Edward Reynolds.

Votes for Governor.

The Subscriber having taken commodious rooms in a central part of Boston, hereby gives notice to his friends and the public that he will attend to the sales of all publications which may be entrusted to his care, or ordered to be purchased, for a moderate commission, with fidelity and despatch.

As the water power of New England is immense, and when duly appreciated will be considered the basis of her wealth and prosperity; and as this species of property is more and more sought for, the Subscriber proposes to those who have water rights for sale, to leave with him plans of the same, describing particularly their power at the dryest season of the year, and all other information concerning them which purchasers may desire.

The location and business of the Subscriber, and his knowledge of most parts of New-England, induces him to believe that he can be useful to his fellow citizens in their negotiations in this respect, and of other real estate. In all future publications by the Editor of this work, in regard to New England, it is proposed to devote some pages to Advertisements of Real Estate.
