NINETEENTH ANNUAL LIST

OF

MERCHANT VESSELS OF THE UNITED STATES,

WITH

THE OFFICIAL NUMBERS AND SIGNAL LETTERS AWARDED THEM
BY THE COMMISSIONER OF NAVIGATION,

IN ACCORDANCE WITH

THE PROVISIONS OF SECTION 4177 OF THE REVISED STATUTES;

ALSO,

LISTS AND DISTINGUISHING SIGNALS OF VESSELS OF THE UNITED STATES NAVY,
QUARTERMASTER'S DEPARTMENT, U. S. A., REVENUE MARINE,
LIGHT-HOUSE BOARD, COAST AND GEODETIC SURVEY,
AND UNITED STATES FISH COMMISSION.

FOR THE YEAR ENDED JUNE 30, 1887.

TABLE OF CONTENTS.

	Pages.
Illustration of use of signals, International Code.....	VII
Illustration of different rigs.....	XXI
Part I. Sea-going vessels (national and merchant) arranged in the order of signal groups	1-51
Part II. Sailing vessels alphabetically arranged.....	52-263
Part III. Steam vessels alphabetically arranged.....	265-344
Part IV. List of iron and steel vessels.....	345-353
Part V. List of unrigged vessels.....	355-391
Part VI. Government vessels :	
Vessels of the United States Navy.....	397, 398
Vessels of the Quartermaster's Department.....	401
Vessels of the Engineer Department.....	405-406
Vessels of the Mississippi and Missouri River Commissions	409
Vessels of the Revenue-Marine Service.....	413, 414
Vessels of the Light-House Service.....	417
Vessels of the Coast and Geodetic Survey.....	421
Vessels of the United States Fish Commission.....	421

PREFACE

TREASURY DEPARTMENT, BUREAU OF NAVIGATION,
Washington, D. C., October 10, 1887.

SIR: In compliance with the provisions of the act of Congress approved July 5, 1884, establishing the Bureau of Navigation and directing the Commissioner of Navigation to "annually prepare and publish a list of vessels of the United States belonging to the commercial marine, specifying the official number, signal letters, names, rig, tonnage, home port, and place and date of building of every vessel, distinguishing sailing vessels from such as are propelled by steam or other motive power," the nineteenth annual list of such vessels is herewith submitted, it being the fourth annual list prepared by the Bureau of Navigation, and bringing the record of the merchant vessels of the United States down to June 30, 1887.

The statement embraces 24,776 vessels of all classes, the names of which have been ascertained, distributed as follows:

Sailing vessels, 16,284.

Steam vessels, 5,692.

Unrigged vessels, 2,800.

The volume contains a separate list of the iron vessels belonging to the country, and foot-notes are added indicating the vessels whose names have been changed under the act of March 2, 1881.

Tables showing the signal flags, and illustrating their uses under different circumstances; an explanation of the system known as "the international code of signals" and "the manner of employing flags in signaling," and diagrams explaining distance signals and their manner of employment, and the rigs of vessels, are embodied in the volume.

Special attention is invited to the columns giving the dimensions of the vessels.

Signal letters are assigned to all sea-going vessels of one hundred tons or upwards. Upon application made through a collector of customs they will be granted to yachts, and, in particular cases, to other vessels, if necessary. Such letters are requisite in order to afford the means of recognition by signals at sea. To facilitate a ready reference to the signals, the list of sea-going vessels, arranged alphabetically in the order of their signal letters, is placed first in the book. (*See Part I.*) Signal letters have been assigned to 3,746 of the vessels named in the list, exclusive of vessels belonging to the Government.

The Bureau has revised the entire work, and the record of every vessel returned by the different custom-houses has been compared with the previously published list, and all changes mentioned have been noted and entered. The names of vessels lost, whose papers have been surrendered, have been stricken from the list.

The compilation exhibits the following information :

1. The official number of the vessel.
2. The signal letters.
3. The rig (*with decks and masts*).
4. The name.
5. The dimensions (*length, breadth, and depth*).
6. The tonnage (*gross and net*).
7. When built.
8. Where built.
9. Home port.

And, in the case of steamers, the nominal and indicated horse-power.

Lists of vessels belonging to the Navy, the Revenue Marine, the Light-House Board, the Coast and Geodetic Survey, and the United States Fish Commission, will be found at the end of the volume.

List of naval vessels and yachts arranged according to signal letters follow list of sea-going merchant vessels.

The home port is the place where the permanent marine document issues.

CHARLES B. MORTON,
Commissioner of Navigation.

Hon. CHARLES S. FAIRCHILD,
Secretary of the Treasury.

INTERNATIONAL CODE.

Practically all the leading nations, in a meeting held at London in 1855, have decided for use on the high seas a system which had been invented by the same gentleman to avoid confusion arising from the use of different signals by a committee in 1855 to prepare a code for use on the sea.

The report of this committee, which was having for its object "to supply a system of signals for use at sea," was favorably received, and the "International Code of Signals" was adopted by Great Britain, as well as merchant ships:

England, France, Germany, Russia, Prussia, Denmark, Belgium, Portugal.

Although in general use by vessels of the United States, the Government has not yet formally recognized the "International Code."

The Code is practically adopted, however, and the vessel on which it receives, appears to meet the present demand for a uniform signal language of the seas.

"No system yet devised will convey signals with certainty under all circumstances, and this code can only be made effectually and thoroughly understood by ship-masters and other officers and crew, so that masters and all subordinate officers acquaint themselves with the practical working of the 'International Code,' to enable them to give and receive signals made as far as circumstances will allow."

DESCRIPTION.

The "International Code of Signals" consists of eight colors, the same as those used in "Marey's Code," as follows:

1 Bargee, 4 Pennants, 13 Square flags, besides 1 *Code* pennant.

"The flags represent 18 consonants—B, C, D, F, G, H, J, K, L, M, N, P, Q, R, S, T, V, W—each of which has its special flag or pennant of varied forms and colors, and is accompanied

THE INTERNATIONAL CODE OF SIGNALS.

Prior to the beginning of the present century, various methods had been employed for communicating intelligence at sea. About the year 1800 a system of signaling by means of flags was devised for use in the British merchant service. Fifty years later, at least ten different signal codes had been invented, the system known as Marryat's being most generally used. By reason of the confusion arising from the employment of so many methods, the British Board of Trade appointed a committee in 1855 to inquire into and report upon the subject of a code of signals to be used at sea.

The report of this committee, which was made a year later, accompanied by a Signal Code having for its object "to supply means of communication between ships of all nations and languages at sea," was favorably received by the British Government, and what is now known as the "International Code of Signals" has since been adopted by the following nations for use of national as well as merchant ships :

England, France, Germany, Russia, Brazil, Italy, Austria, Holland, Spain, Sweden and Norway, Denmark, Belgium, Portugal.

Although in general use by vessels of the United States as well as other countries, our Government has not yet formally recognized the "International Code."

The Code is practically adopted, however, and from its completeness and the general favor which it receives, appears to meet the present demand of maritime people and is gradually becoming the recognized signal language of the seas.

"No system yet devised will convey signals which can be perfectly and readily understood under *all* circumstances, and this code can only be made available and practically useful by being thoroughly understood by ship-masters and other officers on shipboard. It is therefore indispensable that masters and all subordinate officers acquaint themselves fully with the entire details and practical workings of the 'International Code,' to enable them to transmit and comprehend all signals made as far as circumstances will allow."

DESCRIPTION.

The "International Code of Signals" consists of eighteen flags, all but four of which are the same as those used in "Marryat's Code," as follows :

1 Burgee, 4 Pennants, 13 Square flags, besides 1 *Code Signal* or *Answering Pennant*.

"The flags represent 18 consonants—B, C, D, F, G, H, J, K, L, M, N, P, Q, R, S, T, V, W—each of which has its special flag or pennant of varied forms and colors, as seen in the accompanying

diagram"; and it is by a combination of 2, 3, or 4 flags in one hoist that arbitrary signs are made which represent words and sentences of the same meaning in all languages.

The Signal-book which accompanies the Code is arranged in five parts, so that the combinations of flags forming the entire series of signals from B, C to F, G, M, D follow in consecutive order, and must be sought for accordingly in deciphering a signal.

Part I contains the 2-flag and the 3-flag signals of such words and sentences as are required for communications and inquiries in ordinary signaling; also the geographical and numeral signals.

Part II is the index to signals in Part I, many additional 4-flag signals being added. It is consulted when making a signal.

Part III contains boat signals and distance and semaphore signals.

Part IV contains regulations for preventing collisions at sea, warning and pilot signals.

Part V is the Code list of vessels. The four-letter combinations, from G, Q, B, C to W, V, T, S, are reserved for this purpose. Signals from G, Q, B, C to G, W, V, T—1,440 combinations—are appropriated to men-of-war and Government vessels, and H, B, C, D to W, V, T, S—53,040 combinations—are used for merchant ships of each nationality. The ensign, which must be hoisted at the peak, denotes the nation in whose ship-list the name answering to the signal letters is to be found, and the Code Pennant, hoisted under the ensign, indicates that the "International Code" is to be used.

SIGNALING.

Flags for making a signal should be hoisted at the mast-head, or where best seen.

The Code Pennant and Pennants C and D alone are used singly, and have the following significations:

The Code Pennant is the answering pennant.

The Pennant C is Yes.

The Pennant D is No.

The above are the only signals *made with single flags*. The *two, three, and four flag signals* have each a distinct signification, which is further indicated by the character of the top flag, thus:

Signals of 2 flags, with the *Burgee* uppermost, are Attention signals; with a *Pennant* uppermost, Compass signals; and with the *Square flag* uppermost, Danger or Distress signals.

Signals of 3 flags relate to general subjects of communication, including latitude, longitude, and time.

Signals of 4 flags, with the *Burgee* uppermost, are Geographical signals; with the *Pennant C, D, or F* uppermost, are spelling or Vocabulary signals; with the *Pennant G* uppermost, are names of men-of-war; and with a *Square flag* uppermost, are the names of merchant ships.

It is not expected that the range of signals will allow the use of a special token or signal for each merchant vessel and each man-of-war of separate nations; and, in case of the same group being assigned to two vessels of different nationalities, the nationality of the vessel can be determined by her ensign, which must, *in all cases*, be first hoisted, and which will indicate the nation in whose ship-list the name answering to the signal is to be found.

When a signal is seen and no national ship-list corresponding to the ensign shown is at hand, the signal, the nationality, the latitude, the longitude, and the date should be recorded for further communication or reference.

Some examples illustrating the manner of displaying the flags (in a hoist) are introduced from the official danger or distress signals used by the United States Coast Signal Service, followed by the signals used at the Life-Saving Stations and the "cautionary storm signals":

THE HULL AND RIG OF VESSELS.

The term *rig*, when applied to vessels, generally refers to the number and kind of masts and style of sails that are carried, but the term is also sometimes used indiscriminately to designate the class of hull or the complete vessel in her entirety. Thus it may be said of a vessel that she has a ship's hull with the rig of a brig, meaning that the hull may be of a build that does not correspond with the style of rig. In such cases the rig prevails over the hull in giving the name of the vessel's species, and she is called a brig; but in some compound names, as "*sloop-schooner*," the word "*sloop*" expresses the build of hull and the word "*schooner*" the style of rig.

A gradual change resulting from the inventions and improvements made during the past century has been going on in the rig of American vessels as well as in those of other countries. Some new rigs have been found to be better adapted to some waters, and changes have been made to suit the increased size of vessels, which have proved to be more serviceable in certain trades.

But while old rigs have been abandoned and new ones added, the names applied to them have not in all cases been uniform throughout the country.

Some localities may adopt certain rigs as more desirable for certain trades, but it is important that they should be designated by the same nomenclature at all the ports. While recognizing the styles of rig where best known and adopted, in order to counteract any tendency to use local names, more especially for new rigs, a brief description of those most generally known and acknowledged is inserted here, and diagrams intended to illustrate the different styles of rig now in use are subjoined.

SHIP.

Aside from the generic name of *ship*, which applies to all species of vessels, we have the term applied to the *rig* of the largest class of sailing vessels, which has for a long period been known among sailors to designate a three-mast vessel having lower masts, topmasts, and topgallant masts with yards (square-rigged) on each mast, and having a bowsprit.

The term "lofty ships" was formerly applied to all classes of square-rigged vessels.

When the large, modern merchant ships began to be built the double topsail rig (which was an American invention) was introduced, and more latterly the four-mast ship, now quite common, for the long iron ships built in Great Britain. The ship carrying four masts is generally fore-and-aft rigged on the after mast.

In the diagrams, No. 1 shows the modern four-mast, double-topsail ship rig, and No. 2 represents the old style whole-topsail rig.

XXIV

BARK.

The bark or *barque* (from the Latin *barca*) is a rig similar to that of the ship, excepting that it has only fore-and-aft sails (no yards) on the mizzen mast.

Barks are commonly smaller than ships, although some vessels of 1,000 to 1,500 tons are so rigged for sake of economy. They generally carry double topsails.

The diagram No. 3 exhibits the ordinary modern bark rig.

BARSENTINE, ALSO SPELLED BARKANTINE AND BARQUANTINE.

The term is derived from the word "barque," and properly signifies a small bark.

The barkentine is fitted with three masts, square-rigged with yards on the foremast only, and fore-and-aft sails on the main and mizzen masts.

Barkentines are generally constructed with great length in proportion to their breadth, and on the lakes are built to suit the peculiar navigation of those narrow waters.

Diagram No. 4 shows the rig of the ordinary barkentine, as known in American waters.

BRIG.

According to Admiral Smyth, this word is from the Celtic, and was first applied to ferry-boats, meaning "passage over the water." The brig is now a two-mast square rigged vessel. There are several kinds of brigs:

(1) The *full-rigged brig*, which is a rig nearly similar to that of the *snow* of former times, having fore and main lower masts, topmasts, and topgallant masts, and yards on each, with or without a square mainsail, and carrying also a trysail.

(2) The *hermaphrodite* or *half brig*, which is a vessel with a brig's foremast and a schooner's mainmast, square-rigged forward and fore-and-aft rigged aft. Diagram No. 5 represents the full-rigged brig, and No. 6 the hermaphrodite brig.

BRIGANTINE.

This word, which is probably a diminutive of "brig," is employed in the French to designate the fore-and-aft mainsail used in small vessels.

The brigantine rig (or brig-schooner) is similar to the hermaphrodite, excepting that brigantines carry a light topsail on the mainmast above the large fore-and-aft mainsail. The term is variously applied by seamen of different European nations to a peculiar sort of vessel of their own marine. At some ports on the Pacific coast a hermaphrodite brig rigged with a large three-cornered mainsail without a gaff but an overlapping fore-and-aft topsail whose sheet hauls out to the boom is improperly called a brigantine. The brigantine rig is becoming quite rare in American waters.

Diagram No. 7 is designed to illustrate a brigantine under sail.

SCHOONER.

A name applied to vessels of fore-and-aft rig of various sizes. Schooners have two or more long lower masts without tops, and are sometimes fitted with light square topsails, especially at the fore; but these are giving way to the fore-and-aft gaff topsails, which are better adapted to the American coast.

XXV

The schooner used to be the rig chiefly for small vessels, but some of the more modern schooners measure 800 and 1,000 tons, and carry three and four masts.

In the diagrams, No. 8 represents the *topsail schooner* of two masts and No. 9 the *fore-and-aft schooner* of four masts. No. 11 gives a view of the ordinary American *pilot boat*, which, in most of the ports, is a small, two-mast fore-and-aft schooner-rigged vessel with pointed ends, but with suitable beam for sailing and working to windward.

SLOOP.

The sloop is a vessel with only one mast, and a bowsprit carrying a fore-and-aft mainsail and jib, which, being set on the forestay, is called the foresail. The sloop is one of the oldest style of vessel known to the trade of this country, and is (with some local variations in the cut of sails) a rig that is more or less employed in the commerce of the entire globe. Diagram No. 12 shows the sloop rig.

CUTTER.

A small sloop-rigged vessel, sharp built, with a straight bowsprit running out parallel with the deck, and having large sails. She carries a fore-and-aft mainsail, stay foresail, flying jib, and topsail. Large cutters, 400 to 500 tons, have been constructed for naval use and made to carry yards with every sail that can be set on one mast, even to sky sails, moon-rakers, star-gazers, etc. The modern cutter-yacht generally carries a flying gaff topsail. The name cutter applies as much to the sharp build of the vessel's hull as to the particular rig. Diagram No. 13 affords a view of the cutter.

LUGGER.

Luggers are vessels generally with one mast (though sometimes two or three), having quadrilateral or four-cornered fore-and-aft sails bent to a hoisting yard, the luff being about two-thirds the length of the after leech. The French *chasse-marée* or lugger, used for fishing and coasting purposes, carries two or three masts and is of 200 to 300 tons capacity. In this country the lugger is generally a small vessel with one mast, used for the oyster trade on the Mississippi River and adjacent waters. The diagram No. 14 represents one of these vessels navigated by one man.

LATEEN.

The lateen rig is similar to the lug rig, excepting that the sail is triangular, a long yard which hoists obliquely to a stout mast forming the luff.

The lateen rig is much used by small craft in the Mediterranean and in some of the larger size which have more than one mast. The sails brail up in case of need.

In New Hampshire, and waters in that vicinity, there is a long, shallow boat decked the entire length and having a "cuddy" or small cabin. This vessel, which is flat-bottomed and uses a lee board, is called a gondola (gundlow) and carries a large picturesque lateen sail hoisted on a yard sometimes 60 to 70 feet in length. On the Pacific coast the lateen rig is in common use for pleasure craft and small fishing vessels. Diagram No. 15 represents one of the latter class.

SCOW.

The scow is a vessel used in the shoal waters of nearly all the States, but principally on the lakes.

XXVI

Scows are built with flat bottoms and square bilges, but some of them have the ordinary schooner bow. They are fitted with one, two, and three masts, and are called *scow sloop* or *scow schooner*, according to the rig they carry. Some of them carry bowsprits. The diagrams No. 16 and No. 17 represent one of each class of scow. The distinctive line between the scow and regular-built schooner is, in the case of some large vessels, quite obscure, but would seem to be determined by the shape of the bilge, the scow having in all cases the angular bilge instead of the curve (futtock) bilge of the ordinary vessel.

CAT.

A rig supposed to be derived from the Brazilian catamaran that allows of one sail only, an enormous fore-and-aft mainsail spread by a boom and gaff and hoisted to the one mast stepped near the stem. The cat rig is much employed on Long Island Sound for small coasting and fishing vessels. It is also a favorite rig for pleasure vessels, being easily handled, but is not suited to a heavy sea and rough weather. Diagram No. 18 exhibits the cat rig.

SHARPIE.

A vessel of 20 to 40 feet in length, used by the oystermen of Connecticut and New Jersey, and also for general pleasure purposes. The sharpie is built sharp, with a flat bottom, and carries a center-board. The rig of the sharpie is peculiar and the vessel might be termed a cat-rigged schooner. The diagram No. 19 shows the rig of the Connecticut *sharpie*. The Ohio *sharpie*, used on the lakes for fishing purposes, has the same rig, excepting that they generally carry gaffs.

YAWL.

The yawl is properly a ship's boat, resembling the pinnace. It is more commonly propelled by oars, but there is a certain rig applied to them by a British customs act known as the yawl rig, and in use by some American as well as foreign yachts.

It resembles the cutter rig, except that it has a jigger-mast at the stern, which carries a small lug-sail, the main boom traversing just clear of it; many small fishing boats on the lakes now have this rig. The diagram No. 20 illustrates the yawl rig.

CATAMARAN.

A pleasure boat constructed on the plan of the vessel of that name used on the Brazilian coast. The American catamaran has a double hull and carries the cat rig. The catamaran of the Madras and Ceylon coasts is made of three logs 20 to 30 feet long, 2 to 3 feet apart, secured by spreaders and lashings. They carry large sails and are very fast sailers. Diagram No. 21 is designed to represent the catamaran as rigged on the Atlantic sea-board.
