PREFACE.

TREASURY DEPARTMENT, BUREAU OF NAVIGATION,
Washington, D. C., November 26, 1892.

SIR: In compliance with the provisions of the act of Congress approved July 5, 1884, establishing the Bureau of Navigation and directing the Commissioner of Navigation to "annually prepare and publish a list of vessels of the United States belonging to the commercial marine, specifying the official number, signal letters, name, rig, tonnage, home port, and place and date of building of every vessel, distinguishing sailing vessels from such as are propelled by steam or other motive power," the twenty-fourth annual list of such vessels is herewith submitted, it being the ninth annual list prepared by the Bureau of Navigation, and bringing the record of the merchant vessels of the United States down to June 30, 1892.

This volume contains the names of 26,541 vessels, distributed as follows:

Sailing vessels, 16,596. (Part II.)

Steam vessels, 6,880. (Part III.)

Unrigged vessels, 3,065. (Part V.)

This volume also contains:

(1) Tables showing the signal flags, and illustrating their uses under different circumstances; an explanation of the system known as "the international code of signals" and "the manner of employing flags in signaling," and diagrams explaining distance signals and their manner of employment, together with charts issued by the U. S. Coast and Geodetic Survey and the Hydrographic Office.

(2) A list of the seagoing merchant vessels, followed by the code list of the U. S. Navy, and a list of yachts belonging to citizens of the United States. (Part I.)

(3) Separate lists of the merchant sailing, steam, iron and steel, and unrigged vessels of the United States. (Parts II, III, IV, V.)

(4) Lists of vessels belonging to the Navy, the Quartermaster's Department, U. S. Army, the Engineer Department, U. S. Army, the Mississippi and Missouri River Commission, U. S. Army, the Revenue Marine, the Light-House Board, the Coast and Geodetic Survey, and to the U. S. Fish Commission. (Part VI.)

(5) Illustrations representing types of documented vessels of the United States; footnotes indicating the vessels whose names have been changed under the act of March 2, 1881, and previous statutes, and the names of iron and steel vessels printed in italics in the sailing and steam lists.

Digitized by Google

The information relating to merchant vessels is arranged as follows:

1. The official number of the vessel.
2. The signal letters.
3. The rig (*with decks and masts* of seagoing vessels).
4. The name.
5. The tonnage (*gross and net*).
6. The register dimensions (*length, breadth, and depth*).
7. The year of building.
8. The place of building.
9. The home port (*where permanent document issues*).
10. The name of the managing owner of each seagoing vessel.

Signal letters are assigned to seagoing vessels of the United States, and, upon application made through a collector of customs, they will be granted to yachts, and, in particular cases, to other vessels, if necessary. Such letters are requisite in order to afford the means of recognition by signals at sea.

E. C. O'BRIEN,
Commissioner.

Hon. CHARLES FOSTER,
Secretary of the Treasury.

THE INTERNATIONAL CODE OF SIGNALS.

Prior to the beginning of the present century, various methods had been employed for communicating intelligence at sea. About the year 1800 a system of signaling by means of flags was devised for use in the British merchant service. Fifty years later, at least ten different signal codes had been invented, the system known as Marryat's being most generally used. By reason of the confusion arising from the employment of so many methods, the British Board of Trade appointed a committee in 1855 to inquire into and report upon the subject of a code of signals to be used at sea.

The report of this committee, which was made a year later, accompanied by a Signal Code having for its object "to supply means of communication between ships of all nations and languages at sea," was favorably received by the British Government, and what is now known as the "International Code of Signals" has since been adopted by the following nations for use of national as well as merchant ships:

England, France, Germany, Russia, Brazil, Italy, Austria, Holland, Spain, Sweden and Norway, Denmark, Belgium, Portugal.

Although in general use by vessels of the United States as well as other countries, our Government has not yet formally recognized the "International Code."

The Code is practically adopted, however, and from its completeness and the general favor which it receives, appears to meet the present demand of maritime people and is gradually becoming the recognized signal language of the seas.

"No system yet devised will convey signals which can be perfectly and readily understood under *all* circumstances, and this code can only be made available and practically useful by being thoroughly understood by ship-masters and other officers on shipboard. It is therefore indispensable that masters and all subordinate officers acquaint themselves fully with the entire details and practical workings of the 'International Code,' to enable them to transmit and comprehend all signals made as far as circumstances will allow."

DESCRIPTION

The "International Code of Signals" consists of eighteen flags, all but four of which are the same as those used in "Marryat's Code," as follows:

1 Burgee, 4 Pennants, 13 Square flags, besides 1 *Code Signal* or *Answering Pennant.*

"The flags represent 18 consonants—B, C, D, F, G, H, J, K, L, M, N, P, Q, R, S, T, V, W—each of which has its special flag or pennant of varied forms and colors, as seen in the accompanying

Digitized by Google

diagram"; and it is by a combination of 2, 3, or 4 flags in one hoist that arbitrary signs are made which represent words and sentences of the same meaning in all languages.

The Signal-book which accompanies the Code is arranged in five parts, so that the combinations of flags forming the entire series of signals from B, C to F, G, M, D follow in consecutive order, and must be sought for accordingly in deciphering a signal.

Part I contains the 2-flag and the 3-flag signals of such words and sentences as are required for communications and inquiries in ordinary signaling; also the geographical and numeral signals.

Part II is the index to signals in Part I, many additional 4-flag signals being added. It is consulted when making a signal.

Part III contains boat signals and distance and semaphore signals.

Part IV contains regulations for preventing collisions at sea, warning and pilot signals.

Part V is the Code list of vessels. The four-letter combinations, from G, Q, B, C to W, V, T, S, are reserved for this purpose. Signals from G, Q, B, C to G, W, V, T—1,440 combinations—are appropriated to men-of-war and Government vessels, and H, B, C, D to W, V, T, S—53,040 combinations—are used for merchant ships of each nationality. The ensign, which must be hoisted at the peak, denotes the nation in whose ship-list the name answering to the signal letters is to be found, and the Code Pennant, hoisted under the ensign, indicates that the "International Code" is to be used.

SIGNALING.

Flags for making a signal should be hoisted at the mast-head, or where best seen.

The Code Pennant and Pennants C and D alone are used singly, and have the following significations:

The Code Pennant is the answering pennant.

The Pennant C is Yes.

The Pennant D is No.

The above are the only signals *made with single flags*. The *two*, *three*, and *four* flag signals have each a distinct signification, which is further indicated by the character of the top flag, thus:

Signals of 2 flags, with the *Burgee* uppermost, are Attention signals; with a *Pennant* uppermost, Compass signals; and with the *Square flag* uppermost, Danger or Distress signals.

Signals of 3 flags relate to general subjects of communication, including latitude, longitude, and time.

Signals of 4 flags, with the *Burgee* uppermost, are Geographical signals; with the *Pennant C*, *D*, or *F* uppermost, are spelling or Vocabulary signals; with the *Pennant G* uppermost, are names of men-of-war; and with a *Square flag* uppermost, are the names of merchant ships.

It is not expected that the range of signals will allow the use of a special token or signal for each merchant vessel and each man-of-war of separate nations; and, in case of the same group being assigned to two vessels of different nationalities, the nationality of the vessel can be determined by her ensign, which must, *in all cases*, be first hoisted, and which will indicate the nation in whose ship-list the name answering to the signal is to be found.

When a signal is seen and no national ship-list corresponding to the ensign shown is at hand, the signal, the nationality, the latitude, the longitude, and the date should be recorded for further communication or reference.

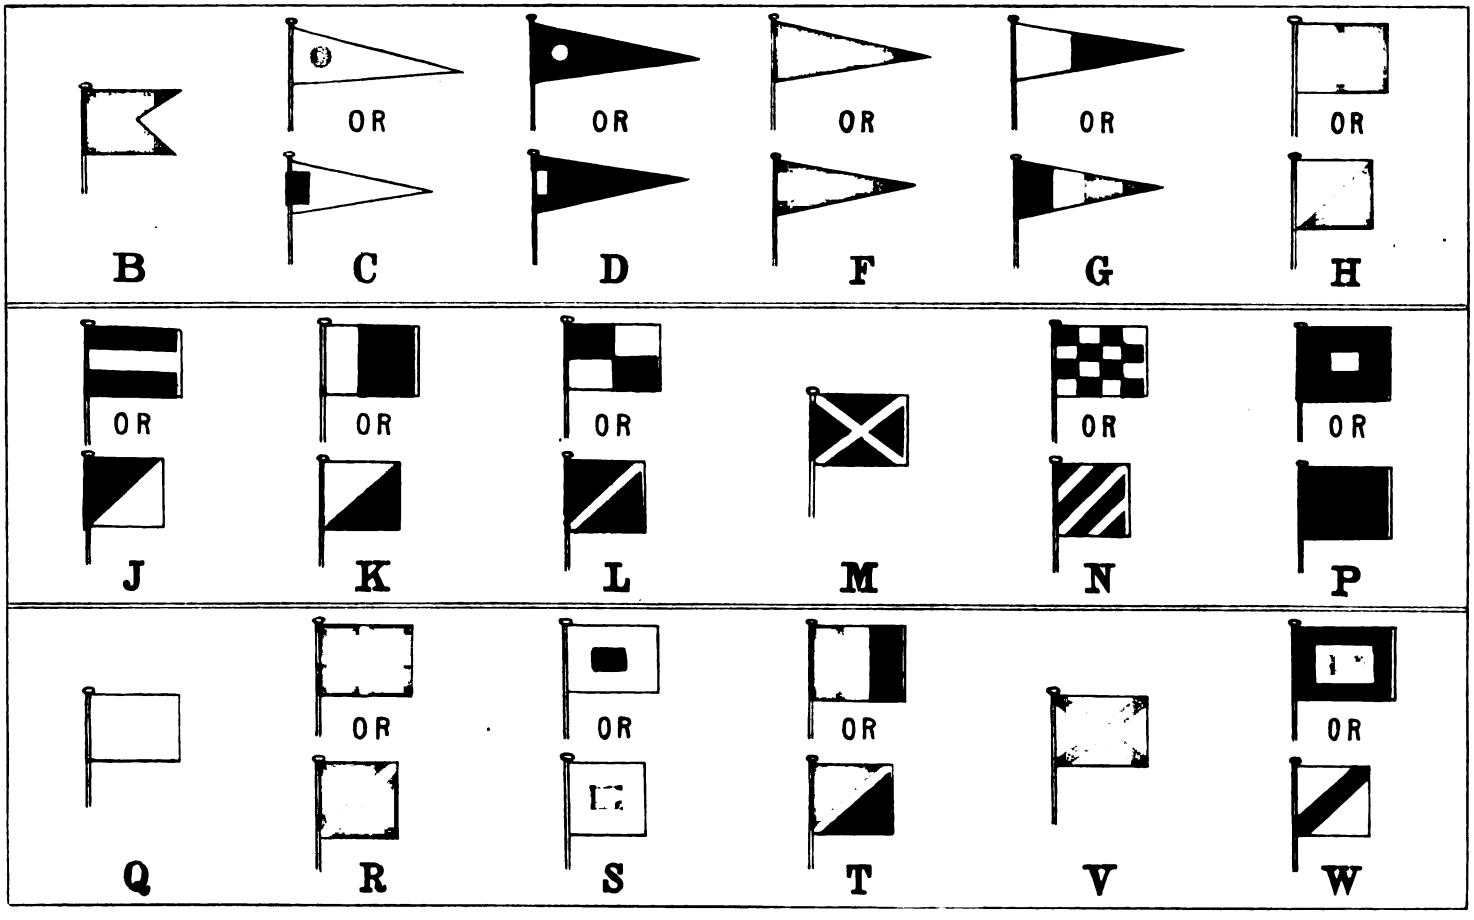
Some examples illustrating the manner of displaying the flags (in a hoist) are introduced from the official danger or distress signals used by the United States Coast Signal Service, and the "cautionary storm signals."

Digitized by Google

"CODE SIGNAL" and  "ANSWERING PENNANT."

A

N. B.—When used as the "Code Signal," this pennant is to be hoisted under the ensign; when used as the "Answering Pennant," where best seen.



Digitized by Google

To open communication by this Code, show the ensign with the following pennant under it, thus:

This signal is acknowledged on the coasts of the United States by showing the same pennant (as given above) *alone.*

This pennant, hoisted alone, also means, when signaling, "Signals seen and understood," and is to be shown in answer to every signal as soon as such signal has been seen and recognized.

Communication may then be commenced, and any message following in this paper, or found under the heading "Danger or Distress" in the International Code Signal-book, may be exchanged, strictly following the INTERNATIONAL COMMERCIAL CODE and the instructions here given below.

The above signal, asking to open communication, should be shown in every case of distress by the shore station, for it may be that the vessel has the INTERNATIONAL CODE, but, until seeing this signal, will not know she can use it.

SIGNALS ADOPTED FROM AND TO BE FOUND IN INTERNATIONAL COMMERCIAL CODE SIGNAL-BOOK.

	Want immediate assistance.		Engine or machinery disabled.
	We are coming to your assistance.		You are standing into danger.
	Do not attempt to land in your own boats.		Heavy weather coming; look sharp.
	Damaged rudder; cannot steer.		Bar impassable.

Digitized by Google

	Cast off.		Landing is impossible.
	Make fast.		Look out for a line.
	Slack away.		Endeavor to send a line.
	The berth you are now in is not safe.		Do the best you can for yourselves; no assistance can be given.
	Hold on until high water.		Lookout will be kept on the beach all night.
	Remain by the ship.		Lights or fires will be kept at the best place for coming on shore.
	Quit the vessel as soon as possible.		Keep a light burning.
	Do not quit the ship until the tide has ebbed.		I must abandon the vessel.

Digitized by Google

	I am on fire.		Want pilot; can one be obtained? (Answer, "*Yes*" or "*No.*")
	I am sinking.		Enquires Name of Signal Station.
	Want assistance; mutiny.		Repeat your signal, or place it in a more conspicuous position; it is not understood.
	Want immediate medical assistance.		Signal not understood, although the flags are distinguished.
	Want boat immediately.		I cannot make out the flags.
	Want a steam tug.		Assent—Yes.
			Negative—No.

DISTANCE SIGNALS.

Distance Signals are sometimes used when, in consequence of remoteness, or the condition of the atmosphere, it would be impossible to distinguish signals made with the Code flags in the usual way. They should on all occasions be used by ships when it is found that the Code flags cannot be read with clearness and certainty.

The characteristic of the distance signal is the ball, one ball at least appearing in every hoist of the distance Code, the other symbols being pennants, or square flags of any color.

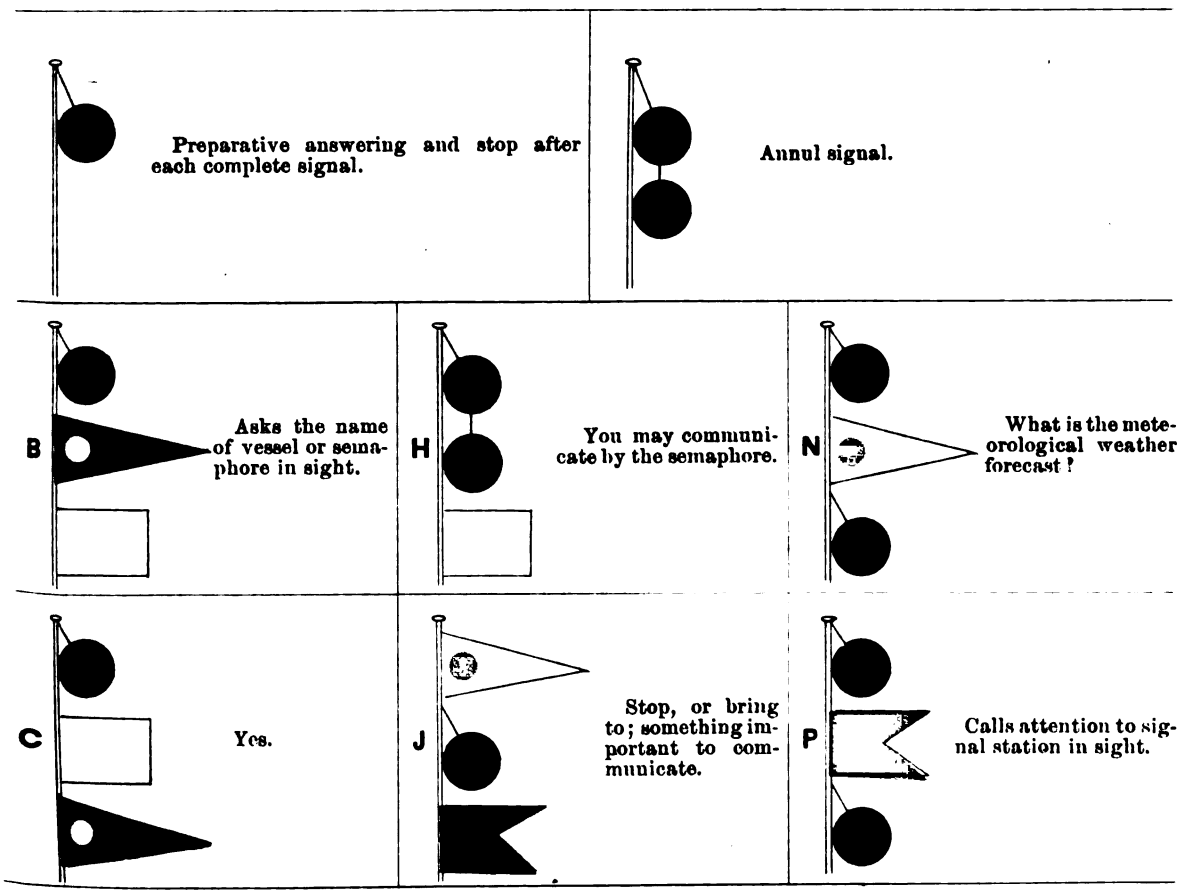
By observing the arrangement of the Distance Signal Code in the adjoining table, a knowledge of the various combinations may soon be acquired, for example:

The *first column* (B to H) contains all the combinations having the ball or balls uppermost in the hoist.

The *second column* (J to P) contains all the combinations having the ball or balls separate in the hoist.

The *third column* (Q to W) contains all the combinations having the ball or balls lowest in the hoist.

Table illustrating the Distance Signals.



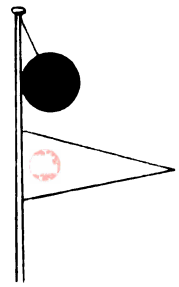
Digitized by Google

Table illustrating the Distance Signals—Continued.

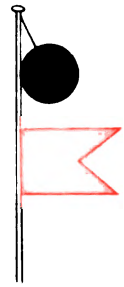
D		No.	K		Have you any telegrams or dispatches for me?
Q		Vessel asks for orders by telegraph from owner, Mr. – . at.			
F		Repeat signal, or hoist in a more conspicuous place.	L		Want a pilot. Can I have one?
R		Report me by telegraph to my owner, Mr. —, at.			
G		Cannot make out your flags, come nearer, or make distance signals.	M		Want a tug. Can I have one?
S		Send the following message by telegraph.			
T		Send the following message by the signal letters through the telegraph.	V		–.–.–.–.–
W		–.–.–.–.–			

Digitized by Google

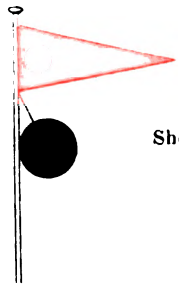
In addition to these, the following distance signals composed of two symbols have the special signification annexed :



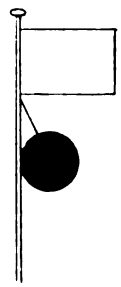
You are running into danger.



Fire or leak ; want immediate help.



Short of provisions ; starving.



Aground ; want immediate assistance

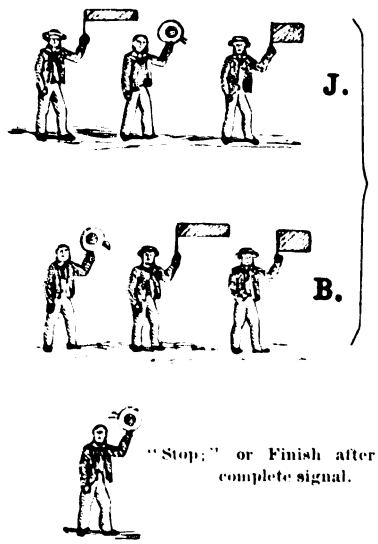
BOAT SIGNALS.

The Symbols for Boat Signals are:—

1. Two *square* flags, or handkerchiefs, or pieces of cloth.
2. Two long strips of cloth, or parts of a plank, or pieces of wood longer than broad.
3. Two balls or hats, or round bundles, or buckets.

With these any of the Distance Signals can be made—holding the Symbol at Arm's length; and the Signal is to be *made from right to left*, and *read from left to right*, thus:—

Equivalent to Ball above Pennant, or "You are running into danger."



Signifying "Accident: want a Surgeon."

"Stop;" or Finish after each complete signal.

In making Boat Signals it is important to use only the proper means to attract attention, and to avoid those that may occasion confusion, or misinterpretation.

SEMAPHORES.

There are many semaphores established on the French, Italian, Portuguese, and some on the Spanish and Austrian coasts, where only the international Code of Signals are now used. Where practicable these semaphores have means of communicating by telegraph with each other and with the chief metropolitan lines and foreign stations.

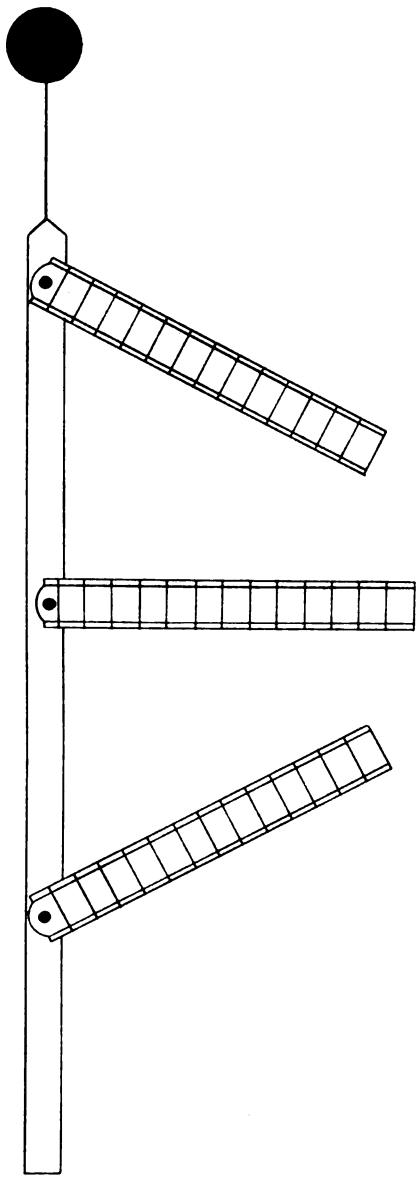
Passing ships are able to exchange communication with the semaphores, and when required their messages are forwarded to their destination according to the fixed tariff. On the coasts of Great Britain there are signal stations which offer the same facilities to passing vessels.

Digitized by Google

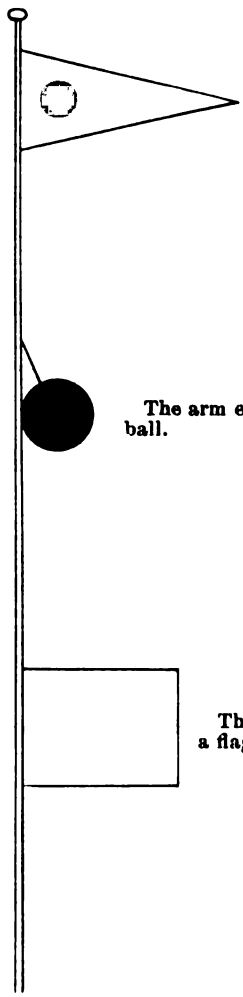
The Semaphore and corresponding Distance Signal.

SEMAPHORE SIGNAL.

DISTANCE SIGNAL.



The disc at the top of the semaphore signal mast remains in position shown while signals are being made by the code.



The arm of the semaphore signals pointing downwards has the same meaning as the pennant.

The arm extended horizontally represents a ball.

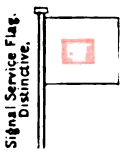
The arm pointing upwards represents a flag.

The semaphore signals must be read off as distance signals as shown above.

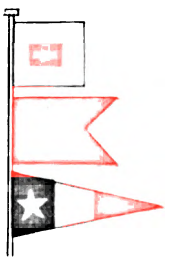
Digitized by Google

UNITED STATES SIGNAL SERVICE STATION AT LIFE-SAVING STATIONS.

The following flag, thus—



shown over any station-number flags, will be used to designate a full signal station of the United States, from which any communication received will be transmitted by telegraph to destination. This flag will always be hoisted above the station-number flags when the station number of such full station is shown, thus :



ANY MESSAGE signaled by the International Code, as adopted or used by England, France, America, Denmark, Holland, Sweden and Norway, Russia, Greece, Italy, Germany, Austria, Spain, Portugal, and Brazil, received at these telegraphic signal stations, will be transmitted and delivered to the address on payment, either at the station or at place to which addressed, of the telegraphic charge. All messages received from or addressed to the War, Navy, Treasury, State, Interior, or other official Department at Washington, are telegraphed without charge.

Ships' official numbers, shown and recognized at stations thus designated, are reported to Washington by telegraph.

The flag flown below the United States national colors indicates a full signal station connecting by telegraph, but not a life-saving station.

General messages to be telegraphed will be taken only at stations flying either three flags as first given above, or the American flag with the distinctive "Signal Service Flag," as above stated.

The distinctive Signal Service flag flown ALONE indicates a United States Signal Service station anywhere, not necessarily, however, connecting by telegraph.

Digitized by Google

WEATHER BUREAU.

CAUTIONARY, STORM, WIND-DIRECTION, AND INFORMATION SIGNALS.

The signals adopted by this bureau for announcing the approach of wind storms are as follows:

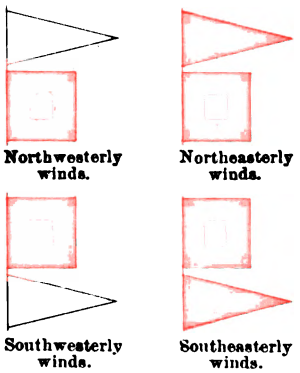
(1) A CAUTIONARY SIGNAL (displayed only at stations on the lakes). A red flag (eight feet square) with white center (four feet square) indicates that the winds expected will not be so severe but well-found, seaworthy vessels can meet them without danger.

(2) A STORM SIGNAL.—A red flag (eight feet square) with black center (three feet square) indicates that the storm is expected to be more severe.

(3) A RED PENNANT (five feet hoist and twelve feet fly) displayed with the flags indicates easterly winds—that is, from northeast to south, inclusive.

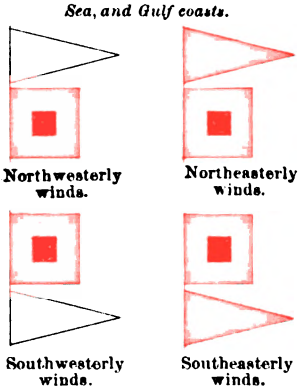
CAUTIONARY SIGNAL.

Displayed at stations on the Lakes only.



STORM SIGNAL.

Displayed at stations on the Lakes, Sea, and Gulf coasts.



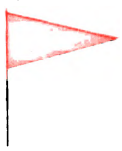
(4) A WHITE PENNANT (five feet hoist and twelve feet fly) displayed with the flags indicates westerly winds—that is, from north to southwest, inclusive.

(5) WHEN RED PENNANT is hoisted *above* cautionary or storm signal, winds are expected from the NORTHEAST QUADRANT; when *below*, from the SOUTHEAST QUADRANT.

(6) WHEN WHITE PENNANT is hoisted *above* the cautionary or storm signal, winds are expected from the NORTHWEST QUADRANT; when *below*, from the SOUTHWEST QUADRANT.

(7) NIGHT SIGNALS.—By night a red light will indicate easterly winds; a white *above* a red light will indicate westerly winds.

INFORMATION SIGNAL.

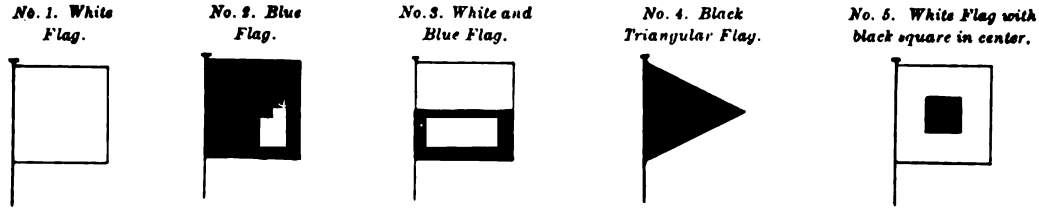


THE INFORMATION SIGNAL consists of a red pennant and indicates that the displayman has received information of a storm covering a limited area, dangerous only for vessels about to sail to certain points. The signal will serve as a notification to shipmasters that important information will be given them upon application to the displayman.

To adapt the signals to the varying interests of the maritime community, the new system will take into consideration the fact that westerly winds of high velocity with clearing weather are less dangerous than those from easterly quarters with freezing weather.

Digitized by Google

WEATHER SIGNALS.



No. 1. White Flag. Clear or fair weather.

No. 2. Blue Flag. Rain or snow.

No. 3. White and Blue Flag. Local rains.

No. 4. Black Triangular Flag. Temperature signal.

No. 5. White Flag with black square in center. Cold wave.

Number 1, white flag, six feet square, indicates clear or fair weather. Number 2, blue flag, six feet square, indicates rain or snow. Number 3, white and blue flag (parallel bars of white and blue), six feet square, indicates that local rains or showers will occur, and that the rainfall will not be general. Number 4, black triangular flag, four feet at the base and six feet in length, always refers to temperature; when placed above numbers 1, 2, or 3 it indicates warmer weather; when placed below numbers 1, 2, or 3 it indicates colder weather; when not displayed, the indications are that the temperature will remain stationary, or that the change in temperature will not vary more than four degrees from the temperature of the same hour of the preceding day from March to October, inclusive, and not more than six degrees for the remaining months of the year. Number 5, white flag, six feet square, with black square in center, indicates the approach of a *sudden* and *decided* fall in temperature. This signal is not to be displayed unless it is expected that the temperature will fall to forty-two degrees, or lower, and is usually ordered at least twenty-four hours in advance of the cold wave. When number 5 is displayed, number 4 is always omitted.

2. When displayed on poles the signals should be arranged to read downward; when displayed from horizontal supports a small streamer should be attached to indicate the point from which the signals are to be read.

Digitized by Google

Digitized by Google

LIFE-SAVING SIGNALS.

The following signals, recommended by the late International Marine Conference for adoption by all institutions for saving life from wrecked vessels, have been adopted by the Life-Saving Service of the United States:

1. Upon the discovery of a wreck by night, the life-saving force will burn a red pyrotechnic light or a red rocket to signify, "You are seen; assistance will be given as soon as possible.

2. A red flag waved on shore by day, or a red light, red rocket, or red Roman candle displayed by night, will signify, "Haul away."

3. A white flag waved on shore by day, or a white light slowly swung back and forth, or a white rocket or white Roman candle fired by night, will signify, "Slack away."

4. Two flags, a white and a red, waved at the same time on shore by day, or two lights, a white and a red, slowly swung at the same time, or a blue pyrotechnic light burned by night, will signify, "Do not attempt to land in your own boats; it is impossible."

5. A man on shore beckoning by day, or two torches burning near together by night, will signify, "This is the best place to land."

CYCLONES.

[Pilot Chart, Hydrographic Office.]

"RULE 1.—*If the squalls freshen without any shift of wind*, you are on or near the storm track: heave-to on the starboard tack and watch for some indications of a shift, observing the low clouds particularly; if the barometer fall decidedly (say half-an-inch) without any shift, and if wind and sea permit, run off with the wind on the starboard quarter and keep your compass course.

"RULE 2.—*If the wind shift to the right*, you are to the right of the storm track: put the ship on the starboard tack and make as much headway as possible until obliged to lie-to (starboard tack).

"RULE 3.—*If the wind shift to the left*, you are to the left of the storm track: bring the wind on the starboard quarter and keep your compass course; if obliged to lie-to, do so on the port tack.

"GENERAL RULES, GOOD FOR ALL NORTHERN HEMISPHERE STORMS.—In scudding always keep the wind well on the starboard quarter, in order to run out of the storm. Always lie-to on the coming-up tack. Use oil to prevent heavy seas from breaking on board.

THE HULL AND RIG OF VESSELS.

The term *rig*, when applied to vessels, generally refers to the number and kind of masts and style of sails that are carried, but the term is also sometimes used indiscriminately to designate the class of hull or the complete vessel in her entirety. Thus it may be said of a vessel that she has a ship's hull with the rig of a brig, meaning that the hull may be of a build that does not correspond with the style of rig. In such cases the rig prevails over the hull in giving the name of the vessel's species, and she is called a brig; but in some compound names, as "*scow-schooner*," the word "*scow*" expresses the build of hull and the word "*schooner*" the style of rig.

A gradual change resulting from the inventions and improvements made during the past century has been going on in the rig of American vessels as well as in those of other countries. Some new rigs have been found to be better adapted to some waters, and changes have been made to suit the increased size of vessels, which have proved to be more serviceable in certain trades.

But while old rigs have been abandoned and new ones added, the names applied to them have not in all cases been uniform throughout the country.

Some localities may adopt certain rigs as more desirable for certain trades, but it is important that they should be designated by the same nomenclature at all the ports. While recognizing the styles of rig where best known and adopted, in order to counteract any tendency to use local names, more especially for new rigs, a brief description of those most generally known and acknowledged is inserted here, and diagrams intended to illustrate the different styles of rig now in use are subjoined.

SHIP.

Aside from the generic name of *ship*, which applies to all species of vessels, we have the term applied to the *rig* of the largest class of sailing vessels, which has for a long period been known among sailors to designate a three-mast vessel having lower masts, topmasts, and topgallant masts with yards (square-rigged) on each mast, and having a bowsprit.

The term "lofty ships" was formerly applied to all classes of square-rigged vessels.

When the large, modern merchant ships began to be built the double topsail rig (which was an American invention) was introduced, and more latterly the four-mast ship, now quite common, for the long iron ships built in Great Britain. The ship carrying four masts is generally fore-and-aft rigged on the after mast.

In the diagrams, No. 1 shows the modern four-mast, double-topsail ship rig, and No. 2 represents the old style whole-topsail rig.

Digitized by Google

BARK.

The bark or *barque* (from the Latin *barca*) is a rig similar to that of the ship, excepting that it has only fore-and-aft sails (no yards) on the mizzen mast.

Barks are commonly smaller than ships, although some vessels of 1,000 to 1,500 tons are so rigged for sake of economy. They generally carry double topsails.

The diagram No. 3 exhibits the ordinary modern bark rig.

BARKENTINE, ALSO SPELLED BARKANTINE AND BARQUANTINE.

The term is derived from the word "barque," and properly signifies a small bark.

The barkentine is fitted with three masts, square-rigged with yards on the foremast only, and fore-and-aft sails on the main and mizzen masts.

Barkentines are generally constructed with great length in proportion to their breadth, and on the lakes are built to suit the peculiar navigation of those narrow waters.

Diagram No. 4 shows the rig of the ordinary barkentine, as known in American waters.

BRIG.

According to Admiral Smyth, this word is from the Celtic, and was first applied to ferry-boats, meaning "passage over the water." The brig is now a two-mast square-rigged vessel. There are several kinds of brigs:

(1) The *full-rigged brig*, which is a rig nearly similar to that of the *snow* of former times, having fore and main lower masts, topmasts, and topgallant masts, and yards on each, with or without a square mainsail, and carrying also a trysail.

(2) The *hermaphrodite* or *half brig*, which is a vessel with a brig's foremast and a schooner's mainmast, square-rigged forward and fore-and-aft rigged aft. Diagram No. 5 represents the full-rigged brig, and No. 6 the hermaphrodite brig.

BRIGANTINE.

This word, which is probably a diminutive of "brig," is employed in the French to designate the fore-and-aft mainsail used in small vessels.

The brigantine rig (or brig-schooner) is similar to the hermaphrodite, excepting that brigantines carry a light topsail on the mainmast above the large fore-and-aft mainsail. The term is variously applied by seamen of different European nations to a peculiar sort of vessel of their own marine. At some ports on the Pacific coast a hermaphrodite brig rigged with a large three-cornered mainsail without a gaff but an overlapping fore-and-aft topsail whose sheet hauls out to the boom is improperly called a brigantine. The brigantine rig is becoming quite rare in American waters.

Diagram No. 7 is designed to illustrate a brigantine under sail.

SCHOONER.

A name applied to vessels of fore-and-aft rig of various sizes. Schooners have two or more long lower masts without tops, and are sometimes fitted with light square topsails, especially at the fore; but these are giving way to the fore-and-aft gaff topsails, which are better adapted to the American coast.

Digitized by Google

The schooner used to be the rig chiefly for small vessels, but some of the more modern schooners measure 800 and 1,000 tons, and carry three and four masts.

In the diagrams, No. 8 represents the *topsail schooner* of two masts and No. 9 the *fore-and-aft schooner* of four masts. No. 11 gives a view of the ordinary American *pilot boat*, which, in most of the ports, is a small, two-mast fore-and-aft schooner-rigged vessel with pointed ends, but with suitable beam for sailing and working to windward.

SLOOP.

The sloop is a vessel with only one mast, and a bowsprit carrying a fore-and-aft mainsail and jib, which, being set on the forestay, is called the foresail. The sloop is one of the oldest style of vessel known to the trade of this country, and is (with some local variations in the cut of sails) a rig that is more or less employed in the commerce of the entire globe. Diagram No. 12 shows the sloop rig.

CUTTER.

A small sloop-rigged vessel, sharp built, with a straight bowsprit running out parallel with the deck, and having large sails. She carries a fore-and-aft mainsail, stay foresail, flying jib, and topsail. Large cutters, 400 to 500 tons, have been constructed for naval use and made to carry yards with every sail that can be set on one mast, even to sky sails, moon-rakers, star-gazers, etc. The modern cutter-yacht generally carries a flying gaff topsail. The name cutter applies as much to the sharp build of the vessel's hull as to the particular rig. Diagram No. 13 affords a view of the cutter.

LUGGER.

Luggers are vessels generally with one mast (though sometimes two or three), having quadrilateral or four-cornered fore-and-aft sails bent to a hoisting yard, the luff being about two-thirds the length of the after leech. The French *chasse-marée* or lugger, used for fishing and coasting purposes, carries two or three masts and is of 200 to 300 tons capacity. In this country the lugger is generally a small vessel with one mast, used for the oyster trade on the Mississippi River and adjacent waters. The diagram No. 14 represents one of these vessels navigated by one man.

LATEEN.

The lateen rig is similar to the lug rig, excepting that the sail is triangular, a long yard which hoists obliquely to a stout mast forming the luff.

The lateen rig is much used by small craft in the Mediterranean and in some of the larger size which have more than one mast. The sails brail up in case of need.

In New Hampshire, and waters in that vicinity, there is a long, shallow boat decked the entire length and having a "cuddy" or small cabin. This vessel, which is flat-bottomed and uses a lee board, is called a gondola (gundlow) and carries a large picturesque lateen sail hoisted on a yard sometimes 60 to 70 feet in length. On the Pacific coast the lateen rig is in common use for pleasure craft and small fishing vessels. Diagram No. 15 represents one of the latter class.

SCOW.

The scow is a vessel used in the shoal waters of nearly all the States, but principally on the lakes.

Digitized by Google

Scows are built with flat bottoms and square bilges, but some of them have the ordinary schooner bow. They are fitted with one, two, and three masts, and are called *scow sloop* or *scow schooner*, according to the rig they carry. Some of them carry bowsprits. The diagrams No. 16 and No. 17 represent one of each class of scow. The distinctive line between the scow and regular-built schooner is, in the case of some large vessels, quite obscure, but would seem to be determined by the shape of the bilge, the scow having in all cases the angular bilge instead of the curve (futtock) bilge of the ordinary vessel.

CAT.

A rig supposed to be derived from the Brazilian catamaran that allows of one sail only, an enormous fore-and-aft mainsail spread by a boom and gaff and hoisted to the one mast stepped near the stem. The cat rig is much employed on Long Island Sound for small coasting and fishing vessels. It is also a favorite rig for pleasure vessels, being easily handled, but is not suited to a heavy sea and rough weather. Diagram No. 18 exhibits the cat rig.

SHARPIE.

A vessel of 20 to 40 feet in length, used by the oystermen of Connecticut and New Jersey, and also for general pleasure purposes. The sharpie is built sharp, with a flat bottom, and carries a center-board. The rig of the sharpie is peculiar and the vessel might be termed a cat-rigged schooner. The diagram No. 19 shows the rig of the Connecticut *sharpie*. The Ohio *sharpie*, used on the lakes for fishing purposes, has the same rig, excepting that they generally carry gaffs.

YAWL.

The yawl is properly a ship's boat, resembling the pinnace. It is more commonly propelled by oars, but there is a certain rig applied to them by a British customs act known as the yawl rig, and in use by some American as well as foreign yachts.

It resembles the cutter rig, except that it has a jigger-mast at the stern, which carries a small lug-sail, the main boom traversing just clear of it; many small fishing boats on the lakes now have this rig. The diagram No. 20 illustrates the yawl rig.

CATAMARAN.

A pleasure boat constructed on the plan of the vessel of that name used on the Brazilian coast. The American catamaran has a double hull and carries the cat rig. The catamaran of the Madras and Ceylon coasts is made of three logs 20 to 30 feet long, 2 to 3 feet apart, secured by spreaders and lashings. They carry large sails and are very fast sailers. Diagram No. 21 is designed to represent the catamaran as rigged on the Atlantic sea-board.

CHARTS.

The United States Coast and Geodetic Survey issues charts on suitable scales of all the important bays and harbors on the coasts of the United States; also general and sailing charts for making passage from any one port of the United States to another.

These charts have been carefully compiled from original trigonometric and hydrographic surveys, and from all recent reliable data, so that they are practically corrected to date of issue, which will be found stamped in the lower left-hand corner of each chart. The information necessary to keep the charts corrected to date is published in the form of a monthly Notice to Mariners issued by the Coast and Geodetic Survey Office, and which will be sent to any address upon application to the Superintendent.

The following simple rules will be found to be an easy guide for the practical use of charts:

DIRECTIONS FOR USING COAST AND GEODETIC SURVEY CHARTS.

(1) *To measure distances.*—Draw a pencil line over the distance to be measured, set the dividers to a convenient distance on the scale of nautical miles, and measure the length of the pencil line. A mile is the same length all over the chart.

(2) *To set a course.*—Draw a pencil line where it is intended for the vessel to go. Put one edge of the parallel rulers on a straight portion of this track line, and slip the rulers until an edge is over the compass center nearest the middle of the track line, then draw a light line over the compass and read the course indicated. This will be the magnetic course or the compass course if there is no local deviation of the vessel's compass. If there is a compass error, apply it to the magnetic course, so as to get the compass course for that particular vessel.

If the line be long, divide it into small parts, and take the course for each portion from the compass nearest its center.

For Mercator's projection use above directions, with the exception that the distance must be measured at the side of the chart over the middle latitude, as the length of a nautical mile varies with the latitude, and no general scale of miles can be given.

The curves of depths will be found useful in giving greater prominence to outlying dangers. It is a good plan to trace out the curve next greater than the draught of the vessel using the chart with a colored pencil, and regard this as a "danger curve" which is not to be crossed without precaution.

For vessels drawing less than 18 feet the edge of the sanding is a well marked danger line; for greater draughts the 24-foot and the 30-foot curves can be used.

In connection with charts, United States Coast and Geodetic Survey "Tide Tables" and United States Coast and Geodetic Survey "Coast Pilot" volumes will be found useful.

THE UNITED STATES HYDROGRAPHIC OFFICE CHARTS, PUBLICATIONS, ETC.

The United States Hydrographic Office issues general sailing charts of the world; coast and harbor charts of all countries outside of the United States; sailing directions and notices to mariners covering all parts of the world, and the Monthly Pilot Chart of the North Atlantic Ocean.

BRANCH HYDROGRAPHIC OFFICES.

For the purpose of gathering and disseminating information upon subjects connected with navigation, branch hydrographic offices have been established in the following cities:

Boston, Custom-house; New York, Maritime Exchange; Philadelphia, Maritime Exchange; Baltimore, Custom-house; Norfolk, Custom-house; Savannah, Custom-house; New Orleans, Maritime Association; San Francisco, Merchants' Exchange; Portland (Oregon), Chamber of Commerce, 31 First street; Port Townsend (Washington).

These offices are supplied with all publications of the Hydrographic Office and Coast Survey, and those of the British Admiralty of ground not covered by the publications of the two U. S. Offices; and any information which may be derived from these or other sources is at the disposal of the the maritime community, or others interested in maritime affairs, free of charge.

Copies of the following publications are furnished upon application: Weekly Notice to Mariners, U. S. Beacon and Buoy List, U. S. Light List; copies of the North Atlantic Pilot Chart and its supplement, the Weekly Hydrographic Bulletin, are supplied to all coöperating with this office in obtaining the information covered by them. Standard barometers and thermometers with which the ship's instruments may be compared, are kept at each branch office.

All persons connected with navigation are earnestly requested to join with the Hydrographic Office in endeavoring to extend the scope and usefulness of this work and render it as valuable as possible to the maritime interests.

VICKERY & CO., 124 Main street.
Wilmington, N. C.—GODFREY HART, 24 South Front street.
W. N. HARRISS, with GEORGE HARRISS & CO., North Water street.
Charleston, S. C.—W. A. WILSON, 115 East Bay street.
Savannah, Ga.—J. P. JOHNSON, custom-house.
W. S. CHERRY & CO., 89 Bay street.
Fernandina, Fla.—J. W. HOWELL, custom-house.
Jacksonville, Fla.—HORACE DREW.

AGENTS IN UNITED STATES—Continued.

Titusville, Fla.—ROBERT RANSON.
Palm Beach, Fla.—BRELSFORD BROS.
Key West, Fla.—ALBERT BROST, office of light-house inspector.
Tampa, Fla.—BABBITT & CO., Franklin street.
Tarpon Springs, Fla.—C. D. WEBSTER, 83 and 85 Tarpon avenue.
Apalachicola, Fla.—J. E. GRADY.
Pensacola, Fla.—HENRY HORSLER & CO., 706 and 708 South Palafox street.
Mobile, Ala.—J. R. EDWARDS.
CHAMBERLAIN & CO.
Pascagoula, Miss.—JAMES I. FRIAR.
New Orleans, La.—FRIGERIO & SCHULLY, 85 Royal street.
L. FRIGERIO, 161 Canal street.
WOODWARD, WIGHT & CO., 38, 40, 42 Canal street.
Galveston, Texas.—CHARLES F. TRUBE.
Chicago, Ill.—RAND, MCNALLY & CO., 148-154 Monroe street.
Eureka, Cal.—JAMES E. MATHEWS.
San Diego, Cal.—DODGE & BURBECK, Cor. Fifth and D streets.
San Pedro, Cal.—W. L. BANNING.
Los Angeles, Cal.—STOLL & THAYER CO., 139 South Spring street.
Santa Barbara, Cal.—H. A. C. MCPHAIL.
San Francisco, Cal.—S. S. ARNHEIM, 8 Stuart street.
DILLON & SON, 310 California street.
LOUIS WEULE, 418 Battery street.
Astoria, Oregon.—GRIFFEN & REED.
Portland, Oregon.—J. K. GILL & CO., 28 and 30 First street.
Port Townsend, Wash.—JAMES JONES.
WATERMAN & KATZ.
Tacoma, Wash.—E. C. VAUGHAN.
BOERINGER & CO.
Seattle, Wash.—G. DAVIES & CO.
W. H. PUMPHREY.

AGENTS IN FOREIGN PORTS.

St. John's, Newfoundland.—GARRETT BYRNE.
Port Hawkesbury, N. S.—ALEXANDER BAIN.
Halifax, N. S.—ROBERT H. COGSWELL.
St. John, N. B.—J. & A. MCMILLAN.
Hamilton, Ontario.—HUNTER & GRANT.
Nassau, Bahamas.—T. DARLING & CO.
Turks Island.—E. J. D. ASTWOOD.
Havana, Cuba.—EDWIN W. WILSON, 41 and 43 Obispo street.
Cienfuegos, Cuba.—JUAN B. CARBO, U. S. vice-consul.
St. Thomas, W. I.—J. P. THORSEN.
Kingston, Jamaica.—JAMES GALL.
Barbados, W. I.—G. ANCIAUX, U. S. consulate.
