Devices to help apply stockings

The use of application aids not only assist with getting elastic compression stockings on, they can help extend the effectiveness of the garments.

Take advantage of these devices to help apply your stockings today.

medi textile gloves
Textured to allow for easy fabric control.

big butler
For the patient with a full calf.

How to care for your stockings

Proper care ensures not only that your stockings last, but also that they continue to provide maximum therapeutic benefits in your vein disease treatment.

The below medi products can assist you in proper care of your garments. Remember that clean compression equals effective compression.

medi day
care gel for daytime use comforts and keeps your skin feeling fresh all-day long. Simply smooth onto your legs every morning before donning your compression stockings.

medi night
care creme for nighttime use specifically formulated to provide the ingredients your skin needs to recuperate and regenerate overnight. Simply apply this soothing creme to your legs after removing your compression stockings.

it stays
This odorless, hypoallergenic and **easy-to-wash adhesive** securely and comfortably holds knee-highs, thigh-highs and arm sleeves in place.

medi care™ wash
Extend the life of your compression therapy products by using **medi care™ wash** every day. Our pure, organic, and biodegradable solution thoroughly removes the daily accumulation of perspiration and body oils from compression garments.

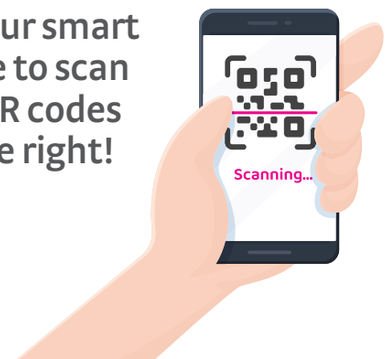
Your doctor has prescribed compression stockings

to help alleviate symptoms of your specific condition. To ensure the best therapeutic results, medical stockings should be worn every day and replaced every six months. Wear exactly as prescribed. Follow your doctor's directions for when and how long to wear your stockings.

Use your smart phone to scan the QR codes to the right!

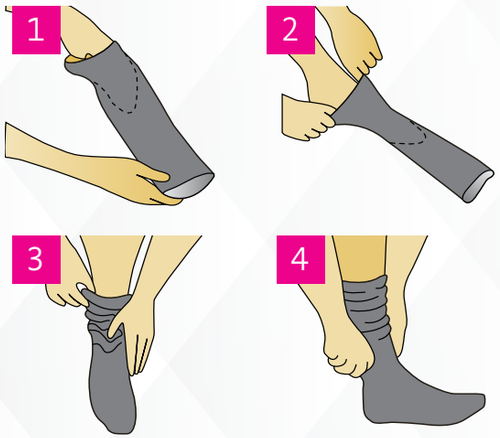


How to apply stockings

These techniques will help you apply your stockings easily and correctly. Keep in mind that swelling is less pronounced in the morning, so applying your mediven®, duomed® & Rejuva® stockings as soon as you get out of bed will make application easier.

Standard techniques

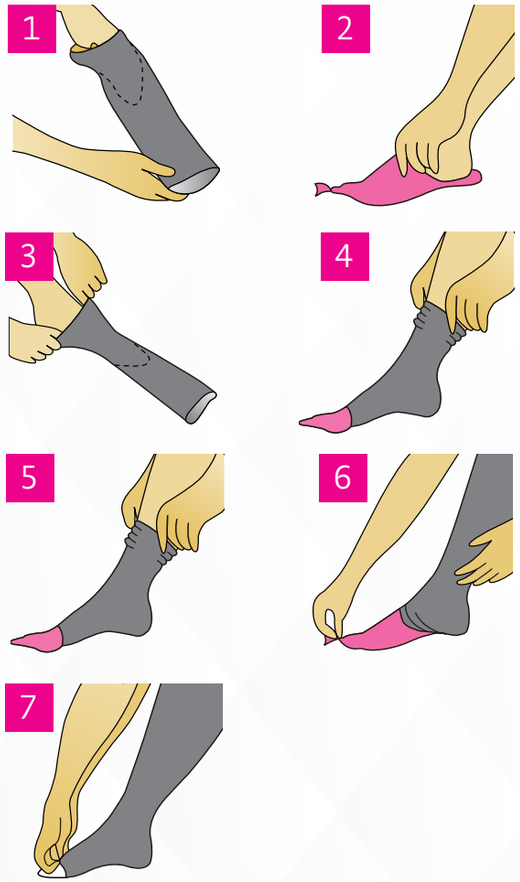
Applying closed-toe stockings.



Video available for closed-toe stockings application

Applying Open-toe Stockings

Applying open-toe stockings using an easy-on slipper.



Video available for open-toe application
