

Activon[®]
 Manuka honey
 The Natural Wound-Healing Solution

medi. I feel better.

Activon[®]

Manuka honey

Activon Manuka Honey, unique to New Zealand, is made from the nectar gathered by bees from the *Leptospermum Scoparium* plant.

Activon Manuka Honey promotes four essential wound healing functions, which are often found individually in other types of dressings.

Creating A Positive Wound Environment

- Manuka Honey has a pH of ~3.9 (acidic), creating an inhospitable environment for bacteria growth.
- Low pH levels improve tissue oxygenation which increases resistance to infection and promotes healing.
- Manuka Honey contains high levels of Methylglyoxal, yielding powerful healing properties.

Aids in Odor Control

- Helps odor at the source (bacteria), rather than masking it.
- The removal of malodor can help improve patient confidence and mental well-being.

Autolytic Debridement

- 100% Manuka Honey creates a moist wound environment, facilitating autolysis by drawing fluid/exudate from the wound through powerful osmotic action, while simultaneously rehydrating devitalized tissue.
- Safe and effective debridement and desloughing.

Granulation and Epithelialization

- Promotes growth of granulation tissue by drawing up nutrients from the interstitium.
- Provides glucose to cells that promote epithelialization across the wound.

Activon[®] Tube

With Activon[®] Manuka Honey

Description

Activon[®] Tube contains 100% Manuka honey.

Indications

Activon[®] Tube may be applied to any type of wound and is especially useful for cavity wounds. Can be applied directly to a wound bed or on a primary dressing.

Product	SKU	Sizes	Pack Sizes
Activon[®] Tube 100% Medical Grade Manuka honey	CR4493	20g	12

Activon[®] Tulle

With Activon[®] Manuka Honey

Description

Activon[®] Tulle is a knitted viscose mesh impregnated with 100% Manuka honey. NEW manufacturing process better distributes honey for easier application & better coverage

Indications

Activon[®] Tulle is ideal for shallow wounds that need debriding of necrotic tissue.

Product	SKU	Sizes	Pack Sizes
Activon[®] Tulle Knitted viscose mesh with 100% Manuka honey	CR4135 CR4136	2in x 2in 4in x 4in	5 5
