

# BOLT EV 2019

CHEVROLET

Bolt EV Premier in Silver Ice Metallic  
with available features.

## AN EXTRAORDINARY VEHICLE THAT JUST HAPPENS TO BE ELECTRIC.

Bolt EV is revolutionizing the global automotive landscape as an award-winning all-electric crossover that offers up to 383 kilometres of electric range on a full charge!

Quick acceleration and plenty of passing power makes driving more fun. You'll enjoy room for up to five or up to 1603 L of maximum cargo space with the rear seat folded down.<sup>2</sup> And you'll love the way Bolt EV has been designed from the inside out, for your everyday routine and everything in between.

Respecting our environment and protecting the world around us for our children and future generations is fundamental to the Canadian Dream. That's why Chevrolet is committed to taking the lead in automotive electrification. After all, charging the battery can be as easy as plugging in a cellphone. Plus, with the perfect combination of range, utility and style, Bolt EV isn't just a great electric vehicle. It's a great vehicle, period.

<sup>1</sup> 2019 Bolt EV energy consumption and range are estimates based on GM testing in accordance with Government of Canada approved testing methods. Refer to vehicles.nrcan.gc.ca for details. Full charge required. Actual consumption, driving range and energy costs will vary based on several factors, including temperature, terrain, driving conditions, use of HVAC and/or accessories, battery age and how you drive and maintain your vehicle. <sup>2</sup> Cargo and load capacity limited by weight and distribution.

## RANGE

Bolt EV Premier in Nightfall Grey  
Metallic (extra-cost colour)  
with available features.

<sup>1</sup> 2019 Bolt EV energy consumption and range are estimates based on GM testing in accordance with Government of Canada approved testing methods. Refer to vehicles.nrcan.gc.ca for details. Full charge required. Actual consumption, driving range and energy costs will vary based on several factors, including temperature, terrain, driving conditions, use of HVAC and/or accessories, battery age and how you drive and maintain your vehicle. <sup>2</sup> Regenerative braking performance may be limited when the battery is cold or near full charge. See chevrolet.ca for details.

**GOING THE DISTANCE.** Bolt EV offers an estimated range of up to 383 km!<sup>1</sup> If your daily commute is about 80 km round trip, you'll have more than enough range to get through an average day – and you could go up to three or four days, or even more, without needing to plug in.

**CONVERT AND CONSERVE.** Regen on Demand<sup>™</sup> allows you to convert kinetic energy into energy stored within the battery for future use. A simple pull and hold of the Regen on Demand paddle on your steering wheel can decelerate your vehicle<sup>2</sup> and store energy.

**SPRINT AND MARATHON.** One Pedal Driving can help you get where you want to go efficiently. While driving in Low mode at any speed, One Pedal Driving lets you speed up and slow down by using only the accelerator pedal.<sup>2</sup> When you want to speed up, press your foot down like you normally would.

And when you want to slow down, just lift your foot off the accelerator. One Pedal Driving is designed to help you capture some of the energy from the moving vehicle and turn it back into electrical energy, which is then stored in the battery. Of course, you should always use your brake pedal if you need to stop quickly.

**1. EXPLORE YOUR OPTIONS.** Charging your Bolt EV is simple, like plugging in your cellphone, with the available 240-volt charging unit (professional installation required). This powerful charging unit can charge your Bolt EV up to five times faster<sup>1</sup> than with the 120-volt portable charge cord.<sup>2</sup>

**2. MONITOR YOUR RANGE.** The 8-in. diagonal Driver Information Centre and 10.2-in. diagonal colour touch-screen display range information. You can also find range information on the myChevrolet® mobile app.<sup>3</sup>

**3. CHARGE ON THE GO.** A DC Fast Charging provision is standard on Bolt EV. DC Fast Charging is available at conveniently located public charging stations and provides up to 144 km of range in as little as 30 minutes of charge.<sup>1</sup> Use the available myChevrolet mobile app<sup>3</sup> to find the closest DC Fast Charging station.

<sup>1</sup>Requires the 240-volt charge to be set at 32 amps with the 7.2 kW charger. <sup>2</sup>Charging rate varies based on output of the charge unit, vehicle settings and outside temperature. <sup>3</sup>Available on select Apple and Android devices. Service availability, features and functionality are subject to limitations and vary by vehicle, device and the plan in which you are enrolled. Device data connection required. Visit [onstar.ca](http://onstar.ca) for more details.

## DESIGN

Bolt EV Premier in Summit White  
with available features.

<sup>1</sup>The system wirelessly charges one PMA- or Qi-compatible mobile device. Some devices require an adaptor or back cover. To check for phone or other device compatibility, visit mychevrolet.ca for details.

**SMART AND STYLISH.** A crossover designed from the inside out, Bolt EV turns heads for its looks as well as its amazing range. With beautiful proportions and eye-catching details, you may have to look twice to notice that it's an electric vehicle. Sculpted bodysides and strong wheel arches project a solid presence on the road.

**DESIGNED FOR COMFORT.** The creative design seats five passengers comfortably, with ample head, shoulder and legroom. A multi-purpose front console delivers plenty of functionality with a sliding armrest and generous storage bins. Conveniently placed cupholders and available wireless charging<sup>1</sup> behind the shifter make every ride a little easier.

**ENGINEERED FOR EFFICIENCY.** The placement of the Bolt EV battery allows for increased spaciousness and easy entry and exit for you and your passengers. The rear cargo area features a deep well with an available false cargo floor for additional storage.

**1. LIVING ROOM.** Bolt EV offers easy entry and exit for five passengers and all their gear. Rear seats fold down for up to 1603 litres of maximum cargo space<sup>1</sup>, which allows easy loading of large or odd-sized items. The battery placed beneath the floor enables a flat storage surface and a very spacious passenger cabin. The rear cargo area features a deep well with a standard false cargo floor for additional storage space.

**2. DESIGNED TO PERFORM.** Michelin® Energy® Saver tires with Selfseal® technology offer low rolling resistance and are designed to self-seal in the event of a minor tread puncture such as that made by a nail. The specially engineered 17-in. wheels provide enhanced stiffness to help manage noise and vibration.

**3. POWER IN THE PALM OF YOUR HAND.** Electronic Precision Shift eliminates the need for a traditional mechanical linkage from the shifter in the cabin, providing more interior space and reduced shifting effort. Bolt EV is the first Chevrolet vehicle to offer Electronic Precision Shift, a technology that sends electronic signals to the drive system to select Reverse, Neutral, Park, Drive and Low.

<sup>1</sup> Cargo and load capacity limited by weight and distribution.

## SAFETY

**SAFETY STARTS WITH YOU.** Safety features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Visibility, weather, and road conditions may affect feature performance. Read the vehicle Owner's Manual for important feature limitations and information.

## ADVANCED TECHNOLOGY MAKES SAFETY A TOP PRIORITY.

**FRONT PEDESTRIAN BRAKING.** If the system detects that a pedestrian is directly ahead and a collision is imminent, and the driver has not already applied the brakes, the system alerts the driver and may even automatically apply the brakes to help the driver avoid or reduce the harm caused by the collision. Performance is limited at night.

Available on LT and Premier.

**LOW SPEED FORWARD AUTOMATIC BRAKING.** If the vehicle is travelling at a low speed and the system detects that a front-end collision situation is imminent while following a detected vehicle and the driver has not already applied the brakes, the system can automatically apply the brakes to help reduce the collision's severity. The system may even help avoid a collision at very low speeds. Available on LT and Premier.

### FORWARD COLLISION ALERT AND FOLLOWING DISTANCE INDICATOR.

The Forward Collision Alert feature is designed to monitor how close your vehicle is to a detected vehicle in front of you. If the system determines that a front-end collision with a detected vehicle is imminent, it is designed to alert the driver to a potential crash. The available Following Distance Indicator can provide the driver with the following time to a moving vehicle detected in front of them. Available on LT and Premier.

### LANE KEEP ASSIST WITH LANE DEPARTURE WARNING.

This camera-based system monitors road lines and can provide gentle steering wheel turns (and Lane Departure Warning alerts if necessary) to help drivers avoid unintentionally drifting out of their detected lane when they are not actively steering and their turn signal is not activated. Available on LT and Premier.

### LANE CHANGE ALERT WITH SIDE BLIND ZONE ALERT.

Radar sensors in the rear corners of the vehicle are designed to help detect fast-approaching vehicles in the adjacent lanes as well as moving vehicles in the side mirror blind zones. Amber icons in the exterior mirrors indicate a vehicle's presence. Standard on Premier, available on LT.

**REAR VISION CAMERA.** When the transmission is in Reverse, the Rear Vision Camera with dynamic guiding lines allows the driver to view objects directly behind the vehicle via the screen in the centre stack. So it's easier to back up or park.

**REAR PARK ASSIST.** This feature is designed to alert the driver, when in Reverse, by sounding an audible alert and providing visual indication on the Rear Vision Camera display when it detects certain stationary objects in close proximity behind the vehicle. Standard on Premier, available on LT.

**INTELLIBEAM® HEADLAMPS.** When oncoming headlamps are sensed or when tail lamps are detected in front of the vehicle, the available IntelliBeam high beam assist intuitively adjusts between low and high beams. Available on LT and Premier.

**SURROUND VISION.** This feature can help you parallel park and manoeuvre at low speeds into tight garage spaces with ease. That's because you get twice the view when you look at just one screen. Using four strategically placed cameras, Surround Vision creates a virtual bird's-eye view of the areas immediately surrounding your Bolt EV. All camera viewpoints simultaneously merge to transmit a clear side-by-side digital image to the display screen. Standard on Premier.

**REAR CAMERA MIRROR.** This technology projects a wide-angle view of the area behind your Bolt EV. The driver can easily toggle between the mirror surface and a video screen that provides a view without the obstruction of head restraints, rear-seat passengers or cargo. Standard on Premier.

*Safety or driver assistance features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Visibility, weather and road conditions may affect feature performance. Read the vehicle Owner's Manual for more important feature limitations and information.*

**A WORD ABOUT THIS BROCHURE** Some of the equipment shown or described throughout this brochure may be available at extra cost. We have tried to make this brochure comprehensive and factual. We reserve the right, however, to make changes at any time, without notice, in prices, colours, materials, equipment, specifications, models and availability. Specifications, dimensions, measurements, ratings and other numbers in this brochure and other printed materials provided at the dealership or affixed to vehicles are approximates based upon design and engineering drawings and prototypes and laboratory tests. Your vehicle may differ due to variations in manufacture and equipment. Since some information may have been updated since the time of printing, please check with your Chevrolet dealer for complete details. General Motors of Canada Company reserves the right to lengthen or shorten the model year for any product, for any reason, or to start and end model years at different times. Certain vehicle features may lose their usefulness over time due to obsolescence from technological changes. Unless otherwise noted, all claims based on the latest available competitive information. Excludes other GM vehicles.

**POWERTRAIN** Chevrolet products are equipped with engines and/or propulsion systems produced by GM Powertrain or other suppliers to GM worldwide. The powertrain components in Chevrolet products may also be used in other GM makes and models.

**ASSEMBLY** Chevrolet vehicles and their components are assembled or produced by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. We sometimes find it necessary to produce Chevrolet vehicles with different or differently sourced components than originally scheduled. Since some options may be unavailable when your vehicle is assembled, we suggest you verify that your vehicle includes the equipment you ordered and that, if there were changes, they are acceptable to you.

**SPARE TIRE INFORMATION** There is no standard jack or spare tire in the Chevrolet Bolt EV. Your vehicle has a tire sealant and compressor kit that uses a liquid tire sealant to temporarily seal up to a 6 mm (.25 in.) puncture in the tread area of the tire. After using the tire inflator kit, it is recommended that you take the tire to an authorized retailer for inspection and repair as soon as possible, but at least within 160 kilometres of driving. The tire sealant cannot seal and inflate sidewall damage, punctures larger than 6 mm (.25 in.), or a tire that has unseated from the wheel. The sealant can only be used on one tire and for one time before its expiration date.

### AN IMPORTANT NOTE ABOUT ALTERATIONS AND WARRANTIES

Installations or alterations to the original equipment vehicle (or chassis) as distributed by General Motors are not covered by the New Vehicle Limited Warranty. The special body company, assembler, equipment installer or upfitter is solely responsible for warranties on the body or equipment and any alterations (or any effect of the alterations) to any of the parts, components, systems or assemblies installed by GM. General Motors is not responsible for the safety or quality of design features, materials or workmanship of any alterations by such suppliers.
