

Why the Electoral College is massively needed and infinitely more fair

than democratic majority mob rule. Please do your own homework on why our forefathers struggled to devise this always fair process of Presidential elections. The top map shows the counties where Trump won. The bottom map is a 3D representation of the same statistics where LA, NYC, Baltimore, Seattle, Chicago, Miami and a few other high population areas overwhelmed the entire rest of the country in "popular vote". Near every one of those high population places are entirely democrat run slums. In CA the supermajority democrats have made it near impossible for a Republican to even appear on a ballot by multiple manipulations of gerrymandering and custom "democrat" voting laws. Any Republican winning any election in CA overcomes massive obstacles few can endure let alone overcome. To contrast, a republican winning in CA would be like Trump winning election to becoming the Chairman of China's communist party.

Election 2016: County-Level Results
