Consider the following before you install the driver 4

Perform the following steps to install the Windows 8 driver 4

Thank You 8

Customer Support 9

Consider the following before you install the driver:

- If you want to use the RocketRAID controller for primary storage you will need to make sure the bootable partition is less than 2TB. You will need to have the Windows 10 driver put on a USB, CD disc, or DVD disc.
- If you want to use the RocketRAID controller as secondary storage download the latest drivers from the HighPoint website and follow the steps below.

Perform the following steps to install the Windows 8 driver.

1. Boot the Microsoft Windows 10 OS. Right click the Windows logo and then select the “Device Manager” from the pop-up menu.

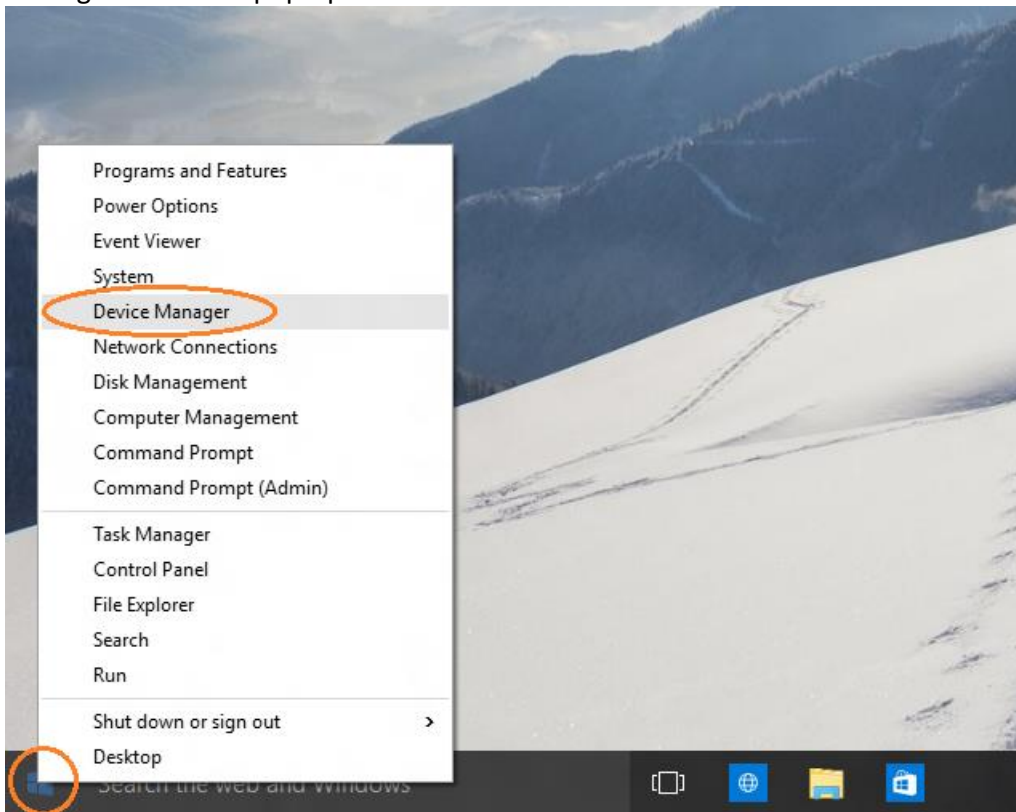

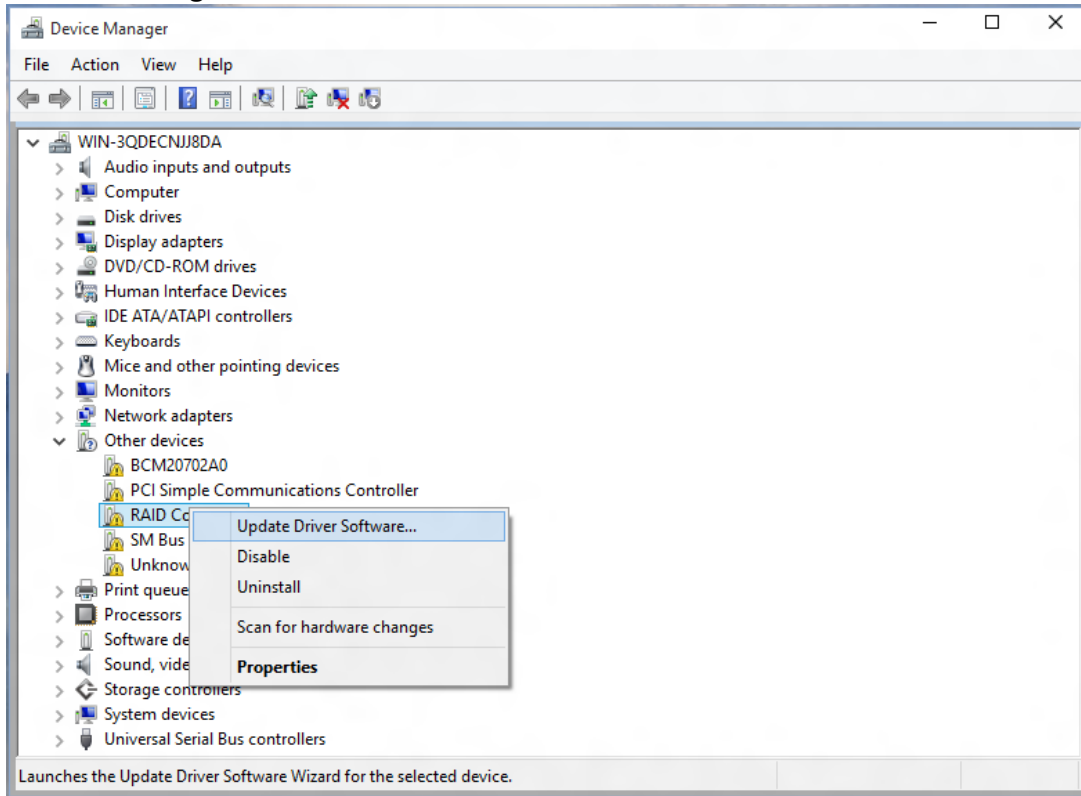

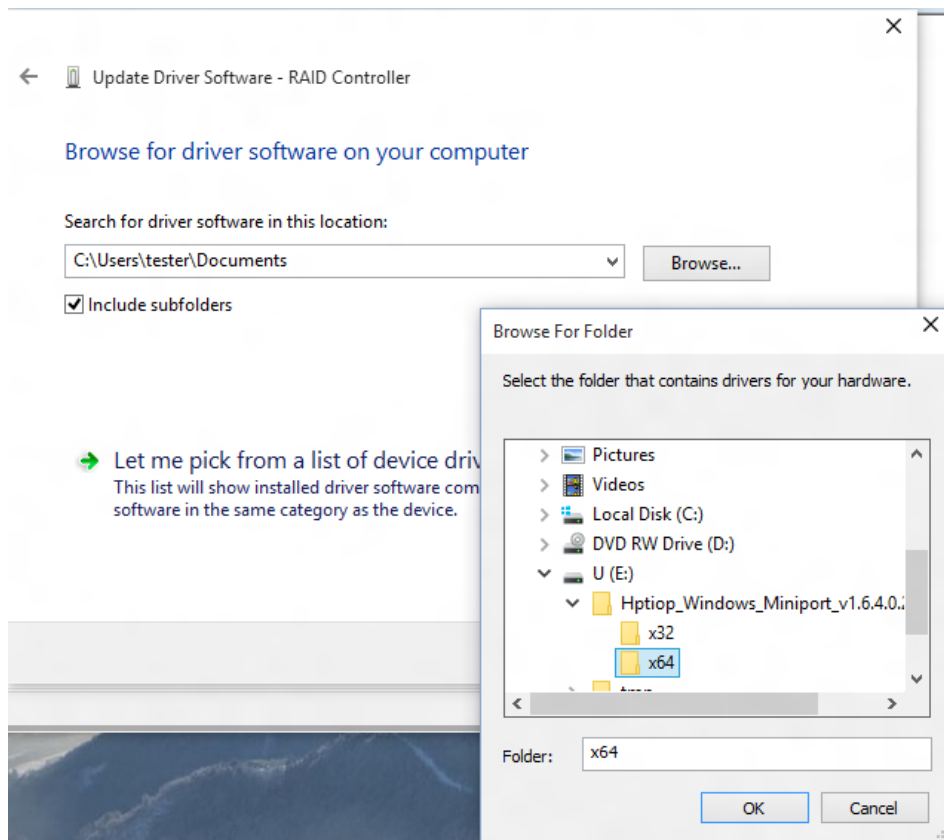

Figure 1: Device Manager

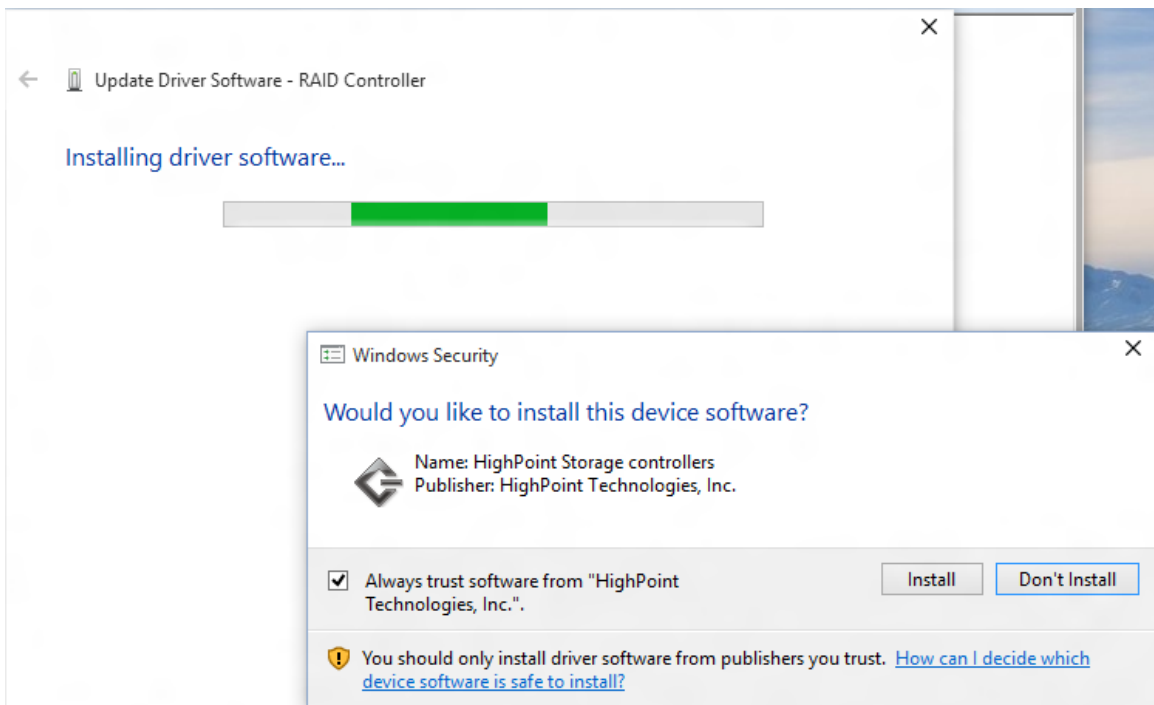

2. Locate the RAID Controller from the Device Manager. Right click the RAID Controller device and select Update Driver Software from the pop-up window.

Figure 2: Update Driver Software Option

3. In the Update Driver Software wizard, select Browse My Computer to locate the updated driver. When the driver is found, click **Install** to confirm.

Figure 3: Install Button

4. The installation wizard presents progress screens and announces the completion of the installation.
5. After the driver is installed, reboot the system if required.

Thank You

Thank you for purchasing HighPoint product. We appreciate your support, and welcome any questions, comments or product suggestions you may have.

Customer Support

If you encounter any problems while utilizing RocketRAID series host adapters, or have any questions about this or any other HighPoint Technologies, Inc. product, feel free to contact our Customer Support Department.
