

## **HighPoint Launches the World's first Thunderbolt™ 2 SATA Adapters to Support 8 eSATA Devices**

August 2014, Milpitas, CA. HighPoint Technologies RocketStor SATA Adapters deliver twice the performance and four-times the storage capability compared to other eSATA Hubs in today's marketplace.

### **World's First Thunderbolt™ 2 8-Drive eSATA Hubs**

The RocketStor 6328L and 6324L are the simplest and fastest way to upgrade existing SATA storage for use with Thunderbolt™ 2 platforms, and deliver significant performance and capacity advantages over Thunderbolt™ hubs, which offer only half the speed and one-fourth of the storage capability. These affordable, high-performance storage adapters provide 20Gb/s of uncompromised transfer bandwidth and are capable of supporting up to eight SATA hard drives or SSD's via eSATA and Mini-SAS connectivity.

**Dedicated Performance Architecture:** Unlike conventional PCIe Expansion Chassis and first generation Thunderbolt™ hubs, the Thunderbolt™ 2 bandwidth provided by RocketStor 6328L/6324L eSATA hubs is dedicated to storage performance. Storage devices hosted by RocketStor adapters do not have to share resources with other I/O devices, and can operate at peak performance.

**Palm-Sized, Compact Storage Solution:** Each lightweight, all-aluminum chassis measures only 7" in size, weighs little more than 2 pounds, and can easily rest in the palm of your open hand! The small-footprint design is ideal for any workstation environment; whether in the field, studio or home, and is the perfect storage companion for Apple's latest Thunderbolt™ 2 computing platforms.

**Versatile Storage Configurations:** RocketStor 632xL eSATA hubs are capable of supporting any industry standard SATA hard drive and SSD via eSATA and Mini-SAS connectivity.

**Unbeatable Value:** RocketStor 632xL eSATA hubs are the industry's most cost effective Thunderbolt™ 2 powered 4 and 8 drive storage solutions. The 4-Channel RocketStor 6324L is priced to move with an MSRP is \$299, and the 8-channel RocketStor 6328L offers even more value with an MSRP of only \$399! Conventional Thunderbolt hubs may save you a few dollars, but only support up to two drives and cut performance in half!

**RocketStor 6328L** - Dual Thunderbolt™ 2 Ports / Dual external Mini-SAS Ports (SFF-8088) - High-speed eSATA Hub for up to 8 eSATA devices. North American MSRP: USD \$399.

**RocketStor 6324L** - Dual Thunderbolt™ 2 Ports / Single external Mini-SAS Port (SFF-8088) - High-speed eSATA Hub for up to 4 eSATA devices. North American MSRP: USD \$299.

**Why Choose HighPoint?**

For the past 19 years, HighPoint Technologies has been a pioneering force in the storage industry, delivering a wide range of storage controllers for all levels of production; from Chipsets & RAID HBA to today's external Storage & Adapter Device Solutions. Our hardware and FW engineering teams have been at the forefront of the storage industry for the better part of two decades. We specialize in performance oriented user-application focused design, development and manufacture, and continuously work to improve our products based on direct feedback from our valued customers. Over the years, we have forged strong alliances and technology partnerships with industry-leading storage providers, which enable us to quickly deliver the latest in storage technology to the global marketplace.

**Product Design Philosophy:** Taking the Complexity and High Cost out of today's Cutting Edge Storage Technology HighPoint understand the importance and appeal of high performance in today's marketplace. HighPoint's mission is to deliver quality, cutting storage performance at affordable price points - from business and professional media applications, to personalized solutions for the home enthusiast and power user.
