

HighPoint Now Shipping the Industry's 1st 4-Bay USB 3.1 10Gb/s RAID 5 Storage Enclosure

June 2017, Milpitas, CA – For the past two decades, HighPoint has delivered industry proven RAID Technology, Storage Solutions, I/O Connectivity Controllers and Devices to Fortune 500 Corporations, Application Providers & individual Prosumers.

HighPoint is proud to introduce the Industry's first 4-Bay RAID 5 USB 3.1 Gen 2 Storage Enclosure, the RocketStor 6114V, which is powered by HighPoint's robust and cost-effective Value RAID Technology. RAID 5 configurations hosted by the RocketStor 6114V can deliver up to 450MB/s of real-world performance – twice the throughput of ordinary USB 3.0 based storage solutions!

The Industry's Fastest and Most Cost-Effective USB RAID 5 Solution

Unlike standard USB RAID 5 enclosures, the RocketStor 6114V is powered by the latest USB 3.1 Gen 2 technology and our industry-proven Value RAID Technology, which leverages the powerful system resources of today's modern computing platforms to deliver highly affordable RAID storage solutions. This unique combination delivers up to 450MB/s of real-world transfer performance, and up to 40TB of storage, all from a single cable connection! The RocketStor 6114V Revolutionizes RAID 5 performance for USB connectivity, at an affordable price point, and was designed to accommodate a wide range applications across any Windows and Mac system with a USB-C port.

Each RocketStor 6114V includes RocketStor Manager; a user-friendly web-based management interface that allows users of any experience level to quickly & easily configure, monitor and maintain RAID arrays and individual drives, all from a single, unified software suite. In addition, the RocketStor 6114V seamlessly integrates LED features, an audible alarm, & intelligent cooling apparatus to ensure your storage investments stay healthy & accessible.

Easily Connects to any computer with a Thunderbolt™ 3 USB-C, USB 3.1 Type-C, or USB 3.0 Type-A Port

The universal nature of USB connectivity makes setup and installation a snap; the RocketStor 6114V requires only a single cable between the enclosure and host system, and can be easily connected to a wide range of computer platforms and connector types. The integrated USB 3.1 Gen 2 technology allows the RocketStor 6114V to be used with Thunderbolt™ 3 USB-C connectors, and is fully backwards compatible with USB 3.0/3.1 Gen1 Type-C ports. In addition, the enclosure can be used with USB 3.0 Type-A connectors via the included cable adapter.

Shipping and Availability

The RocketStor 6114V is available from HighPoint's North American Retail and Distribution partners, and will be shipping the 2nd week of July 2017.

RocketStor 6114V (4-Bay USB 3.1 10Gb/s RAID 5 Storage Enclosure) – North American MSRP \$299
USB-C31-1MC (USB-C to USB-C cable; 1M length)

About HighPoint Technologies

HighPoint was founded in 1995. For over 20 years, we've dedicated ourselves towards the design, manufacture and deployment of quality RAID HBA's and RAID Storage Management Solutions. Our devoted team of experienced hardware and software engineers bring years of Storage RAID technology expertise to NVMe, SAS, SATA, Thunderbolt™ and USB storage and connectivity applications.

HighPoint strives to bring high-performance, quality storage and connectivity solutions to the marketplace at the industry's best prices. We firmly believe that you do not have to sacrifice performance, versatility or reliability for affordability.
