

HighPoint Launches the Industry's first 4-Bay USB 3.1 RAID5 Enclosure to Deliver up to 1000MB/s Performance

April 2018, Milpitas, CA. HighPoint is proud to launch the industry's Fastest 10Gb/s USB 3.1 RAID Enclosures – the RocketStor 6124VM for Mac and RocketStor 6124VW for Windows.

These ultra-compact, 4-Bay external USB 3.1 10Gb/s RAID enclosures support up to four 14TB SATA hard drives in one or more configurations for both Mac and PC host. HighPoint's unique performance-driven USB architecture and RAID expertise deliver an unparalleled level of speed, management capability, and ease of integration.

HighPoint's second generation RocketStor 6124V Series USB 3.1 10Gb/s RAID Enclosures are capable of delivering an astounding 1000MB/s of transfer performance – 4x faster than other USB-based RAID solutions in today's marketplace! HighPoint's Industry Proven Turbo RAID Technology enables each RocketStor 6124V series enclosure to host high-performance RAID 0 and RAID 5 arrays across four hard drives, and up to 56TB of capacity.

Easily Add RAID 5 Storage to any Mac or PC with a USB 3.1 or Thunderbolt™ 3 Connectivity

The universal nature of USB connectivity makes setup and installation a snap; the RocketStor 6124V series require only a single cable between the enclosure and host system. Customers of any experience level can easily add 56TB of storage to any Mac or PC platform with USB 3.1 Type-C connectivity.

In addition, RocketStor 6124V Series enclosures are the industry's most affordable, high-performance 4-Bay RAID 5 storage solutions for Thunderbolt™ 3 capable host platforms. RocketStor 6124V Series enclosures are fully compatible with Thunderbolt™ 3 USB-C connectors; when combined with our market proven Turbo RAID IP and 4-independent drive bays, RocketStor 6124V series is a truly viable alternative to high-priced Thunderbolt™ 3 based storage solutions.

Integrated LCD Panel for Temperature Monitoring and Fan Control

Each RocketStor 6124VM/VW features a built-in LCD screen that displays environmental conditions in real-time. Customers can quickly access the temperature of storage configurations and adjust fan speed to ensure the drives stay healthy and run optimally. In addition, a built in alarm can be set to activate in the case of temperature or enclosure related warning or failure.

Configure Arrays in 3 Easy Steps with RocketStor Manager!

Creating arrays has never been easier! Each RocketStor 6124V Series enclosure includes an easy to use, web-based management utility. The built-in Array Configuration Wizard allows users of any experience level to create any type of RAID array in three easy steps. Advanced Management Features allow customers to configure Email notification to inform one or more users of changing storage conditions while outside of the work environment, and manage storage remotely via a local network connection.

Pricing and Availability

The RocketStor 6124VM and RocketStor 6124VW enclosures will be shipping in May of 2018:

RocketStor 6124VM (for Mac) – MSRP \$369.00

RocketStor 6124VW (for Windows) – MSRP \$369.00
