System Requirements

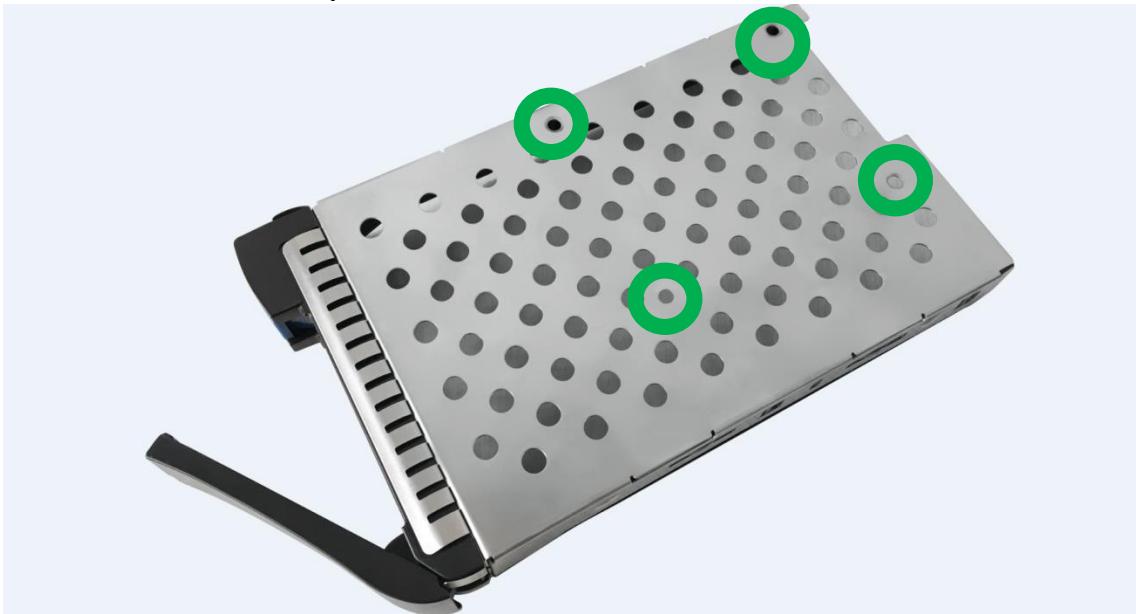

- System with a USB-C port (Thunderbolt™ 3)
- Mac OS X 10.10 and later
- Windows 8 and later

Enclosure Setup

1. If using 3.5" HDDs, use the 3.5" mounting screws to connect the HDDs to the tray in the locations shown below

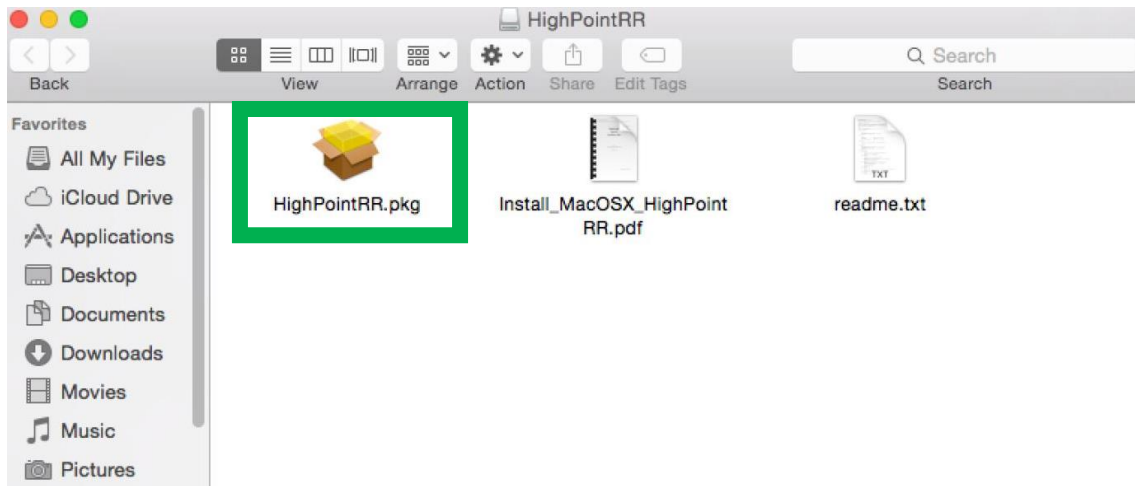

2. If using 2.5" SSDs, please use the 2.5" mounting screws to connect the SSDs to the tray in the locations shown below

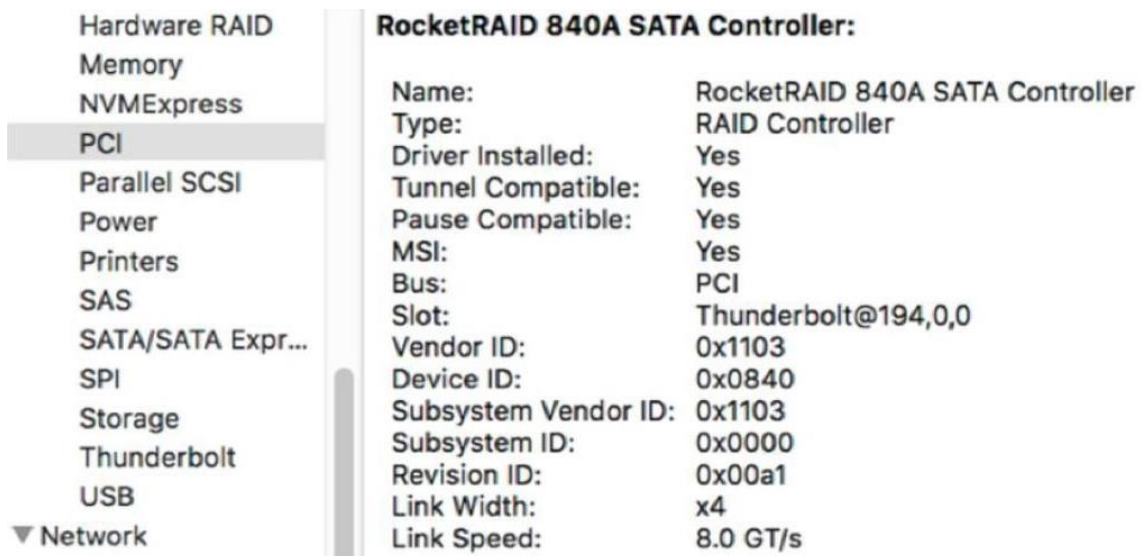

3. Connect the RocketStor 6674T to the host system with the Thunderbolt™ cable, and then connect the RocketStor 6674T to both power receptacles
4. With the power cord connected to the power source, turn on the RocketStor 6674T using the power switch on ("I" position) on the rear panel

Setting up the RocketStor 6674T (Mac)

1. Go to http://www.highpoint-tech.com/USA_new/series-rs6674t-download.htm to download and extract both folders from the Mac Software Package
2. Mount and enter the **RSWebGUI_Mac** folder and run the installation file
3. Mount and enter the driver folder and run the **HighPointRR.pkg** installation file

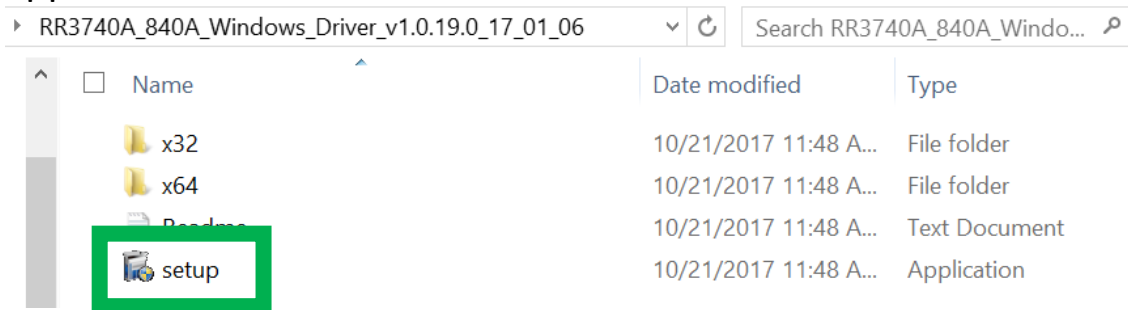

4. After installation, restart your computer
5. Select the **Apple** logo in the top left of the screen and select **About this Mac**. Then, select the **System Report** button.
6. Select the **PCI** tab on the left and double check the RocketRAID 840A SATA Controller is detected to ensure the driver is installed

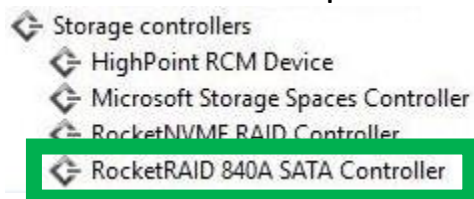

Setting up the RocketStor 6674T (Windows)

1. Go to http://www.highpoint-tech.com/USA_new/series-rs6674t-download.htm to download and extract both folders from the Windows Software Package

2. Enter the **RocketStor_Manager_Win** folder and run the **HighPointRocketStor Management.exe** file to install the HighPointRocketStor Manager, which allows you to analyze the RAID array
3. Enter the Windows driver folder and run the **setup.exe** application

4. After installation, restart your computer
5. To double check the installation, first right click on the **Windows start logo** and select **Device Manager**
6. Then, under **Storage Controllers**, make sure RocketRAID 840A SATA Controller is present
