

CES Access Point Directory

The Coordinated Entry System (CES)

The Coordinated Entry System (CES) facilitates the coordination and management of Los Angeles County's crisis response system's resources that allows users to make data-informed decisions from available information to efficiently and effectively connect people to interventions that will rapidly end their homelessness. CES ensures that the highest need, most vulnerable households in the community are prioritized for services and that the housing and supportive services in the system are used as efficiently and effectively as possible.

Service Planning Areas (SPAs)

Los Angeles County is organized into eight (8) regional Service Planning Areas (SPAs). To learn more or determine eligibility for CES, contact an Access Point or Lead Agency within the SPA in which you or the individual seeking services currently reside(s) or stay(s) most frequently.

What is a Lead Agency?

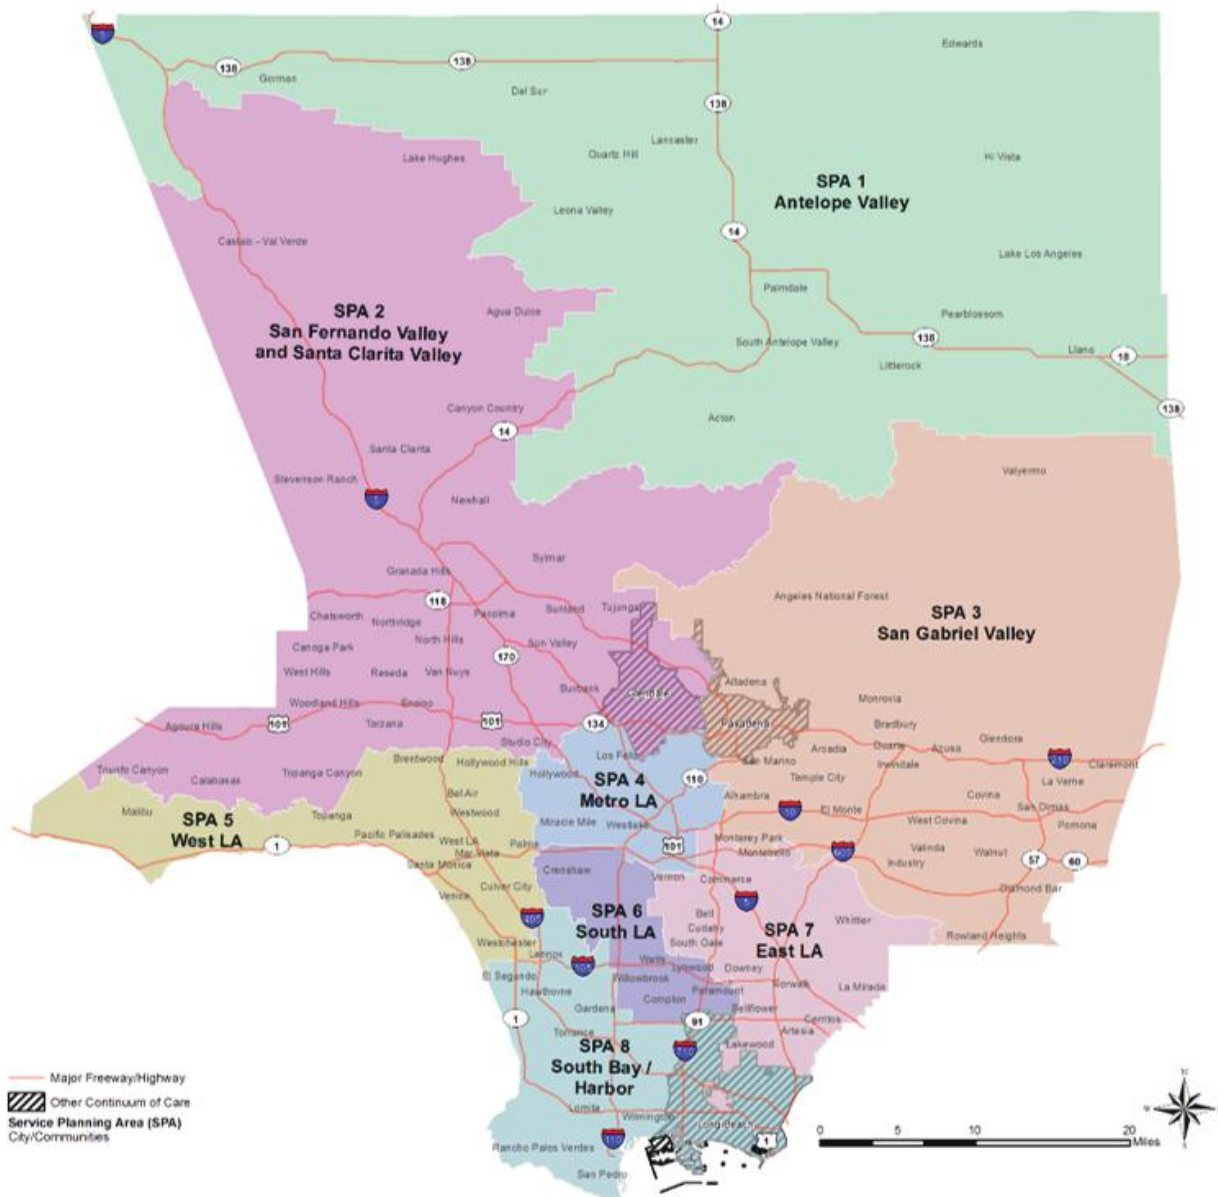

Within each SPA, a lead agency is designated to manage CES processes and coordination efforts. SPA lead agencies can serve as a point of contact for questions about how CES operates, and where to go for assistance within the SPA.

What is an Access Point?

Agencies throughout the SPA serve as access and/or entry points into CES. At an access point, individuals may be asked for personal information or to complete an assessment to determine potential eligibility for resources. Please note, due to limited housing resources, connections to housing resources is dependent on multiple factors including eligibility, availability of resources, and prioritization policies.

Many access point agencies operate multiple programs: the hours and information included on this resource list are specific to hours in which the agencies provide referrals and screening assessments for CES.
