ABOUT ME

With over **15 years** of experience in software development at both product development companies and software outsourcing services, I have the ability to develop and implement projects that meet the specific requirements of businesses across various industries. I have participated in and developed projects for large corporations such as Orange, BuyIn, FV Hospital, Duy Tan Plastics, and Mai Linh Taxi, as well as numerous other software projects, both large and small.

My strengths and key skills that lead to my success include the ability to meet diverse business requirements and satisfy all project demands. In addition to my main expertise in developing applications on the .NET platform, I also have experience in developing applications on multiple platforms such as Python, PHP, Flutter, NodeJs, Cloud Services, etc.

Beyond my success in software project development, I have experience in building, leading, and developing programming teams. I always support them in their daily work and assist in developing the career paths of team members by sharing the professional knowledge and practical experience I have accumulated.

SPECIALTIES

• **Ability to meet complex project requirements**, with **15+ years** of experience in .NET development, including Dotnet Core, Azure, SharePoint, and enterprise products using other programming languages such as Python, PHP, Flutter, NodeJS, ...

• **Understand the software development process**, participating in and supporting many positions in the software development process including technical consulting, database design, UI/UX design, application security, development, deployment, and product quality assurance.

• Success in **team-building skills** and maximizing the potential of each team member in the project.

• **Problem-solving skills** and providing appropriate solutions.

WORK EXPERIENCE

November 2022 – Present
MAI LINH CORPORATION
Principal Full Stack Developer

As a member of the application development team at Mai Linh Corporation, I had the opportunity to develop new applications that were implemented across the entire corporation to support departments such as Customer Service, Fare Verification, and Internal Management. With a creative spirit and proactive approach to technology selection, I applied the latest technologies such as .NET Core 8, Blazor, SignalR, ML.NET, Odoo 16e, Flutter, etc. to develop applications that meet the requirements. In addition, I was also assigned to continue developing existing projects in use at Mai Linh.

Some more experience gained:
- Enhanced ability in analyzing and designing applications for enterprise-wide deployment.
- Successfully technology selections and implemented cutting-edge systems.
- Collaborated with third-party companies to develop integrated applications.

August 2017 – September 2022
DXC TECHNOLOGY VIETNAM
Senior Software Engineer

After 5 years at DXC, I have significantly improved both my soft skills and technical expertise. In addition to contributing to various projects, I gained invaluable experience in software development through direct mentorship from highly experienced professionals. I received high praise for my contributions to projects such as Netherlands OM, Billing, BatchControl, Himmat, LSCP, Viewer, etc. Besides developing major projects on the .NET platform, I also worked with a range of other technologies including AngularJS, AWS, Azure, IBM Watson, etc.

Some more experience gained:
- Work directly with clients from global and community with a large team.
- Receiving training and guidance from experts in the software field.
- Improved my soft skills like leadership, training, communication, critical thinking, etc.

July 2014 – August 2017
STAND DATA
Software Development Management

Involved at the beginning of this company, I had a chance to apply all my experience to set up a completed system for a software company such as setup and configuration of the environment for software development like server, git, issue tracking and some more collaboration tools; build an agile team combine with lean thinking to improve team's technical skills; work with more business applications and more computer programming languages.

Some more experience gained:
- Improved skills for analysis, planning, design, development, testing, and maintenance of client/server and web-based applications/products and work on a wide range of projects involving the implementation of new and existing systems, solutions and processes.
- Work on different platforms like ASP.NET, ASP.NET MVC, Web services, SQL Server, JavaScript, Dashboard Application, Xcelsius Report BI, vTigerCRM, PHP, MySQL, Odoo, Django, Python, PostgreSQL, AngularJS, BootStrap, jQuery Plugins.
- Build solutions for query optimization, and BI Report for large systems.
- More experience in building and managing the developer team.

June 2010 - July 2014
OFFICIENCE
Senior SharePoint Developer

Joining my first position as a Dotnet Developer, I had the opportunity to work in an open environment where I have a lot of young talent, communicate with many technology experts, and work with multiple departments such as Data Process, Business Analysis, and Sales. During my working time, I had high credibility and was assigned to many challenging projects for big clients such as Orange, BuyIn, and FV Hospital. Through those projects, I've become more experienced in designing and implementing website and software systems, optimizing product quality, and improving project management, leadership and team-building skills. I was promoted from Dotnet Developer to Senior Developer.

Some experience gained:
- Design, develop and manage SharePoint Central application, provide custom SharePoint solutions based on some features and technologies like custom list, documents management, post discussions, external list, search service, load balancing, single sign-on, reporting service, application page, web part, web service, InfoPath form, Excel PowerPivot, custom workflow, event receiver.
- Having more experience with jQuery including UI and Plugins, Bootstrap, ASP.NET Telerik Controls and Custom Controls, MongoDB, ASP.NET MVC Framework, AngularJS, NPOI Library, SignalR WebSocket.
- Resolve technical solutions on Dotnet Projects.
- Scrum Mastering on small & medium projects.
- Improve estimation skills to help reduce risks and deliver projects on time.
- Describe SharePoint and Dotnet Technical documents.
- Coach Junior Developer about SharePoint/Dotnet/Design Patterns/Dev Tools.

August 2007 - June 2010
DATA DESIGN VIETNAM
Software Engineer

Gained valuable skills which help me in my career such as software development management using extreme programming and implementing website and software applications with Microsoft technologies like C#, ASP.NET, SharePoint Server, Office Solutions, and SQL Server.

Some experience gained:
- Experience in extreme programming practices.
- Designed and developed some SharePoint-related solutions, almost are Active-X controls which are hosted in a simple web part and communicate to SharePoint server via a custom web service.
- Got involved in an ASP.NET project using AJAX, Active Record, and Lucene Search Engine to build websites.
- Developed Microsoft Add-in products, MS Project Add-in, and MS Excel.
- Package and support deployment of releases.

OBJECTIVE

LONG TERM:

- To become a recognized technical leader within the organization and industry, contributing to the development of long-term technical strategies and roadmaps.
- Promote innovative solutions and bring efficiency to the business operations of the enterprise.

SHORT TERM:

- Successfully complete all key milestones in the project, ensuring all deliverables meet quality and timeline requirements.
- Master and improve technological skills through the latest and most advanced platforms.

EDUCATION

2016 - 2018
University of Information Technology
Master's degree, Information Technology
K11-CNTT - CH1602013 (completed courses)

2012 - 2015
HUTECH University of Technology
Bachelor's degree, English Language and Business
12D2TA02 – 1214201045

2003 - 2007
Ton Duc Thang University
Bachelor's degree, Information Technology
07TH1N
