PREFACE

This series is designed to help both the student and the professional player towards a mastery of contemporary musical language and instrumental techniques. To attain this challenging goal, the writer-compiler of each book — a distinguished performer in his field — has chosen interesting, important passages from the symphonic literature of the 20th Century, accompanying many excerpts with special comments and suggestions concerning artistic and technical problems.

Extensive cueing is one of the special features of this series. Cues are used to indicate to the player how exposed the part is and what instrument he should listen for in order to be able to adjust in rhythm, volume and intonation to the ensemble of the orchestra. To indicate the place in the score where a given excerpt appears, the following system is used. A Roman numeral indicates the number of the movement; the rehearsal number or letter is followed by a number that indicates the number of bars between the rehearsal number (letter) and the excerpt. For instance, III **B** + 12 indicates that the excerpt is in the third movement, 12 bars after letter **B**.

While the presentation of a complete, one-volume survey for each instrument is impossible, it is hoped, nevertheless, that this unique series will provide the player with a significant exposure to contemporary music along with the practical means to study it.

FOREWORD

The following excerpts will greatly aid the bassoon student in preparing for an orchestral career and will serve as a ready reference to players at present engaged in orchestral work.

When we speak of music of the 20th century, we must recognize that two-thirds of that century has already passed and that certain compositions have become established in the orchestral repertoire. Other compositions have been included as exercises in technical problems. In all cases, they are written in the modern idiom and will aid the student to adjust to the language and grammar of today.

It is my hope that this book will be of some value to my many colleagues — past, present and future.

To my dear teacher, the late Simon Kovar, I dedicate this effort for he was the one who introduced me to the glories of symphonic music.
