

BATMAN™*

THE CAPED CRUSADER™*

AMIGA* INSTRUCTIONS

SYSTEM REQUIREMENTS

- Amiga Personal Computer — 500/1000/2000
- 512K; Kickstart 1.2 or higher required
- Color Monitor Required
- Joystick Required

GETTING STARTED

- Turn your computer and monitor on.
- When prompted, insert the kickstart disk.
- You will be prompted to insert a workbench disk. At this time, you should insert the BATMAN disk into the drive.

The Introductory screen will appear and the game will load automatically.

The title screen will appear, offering the options of pressing F1 for the Penguin plot, or F2 for the Joker plot.

Choose F1 or F2 and your selection will then load.

From that point on, the game plays as per the ST instructions included in the BATMAN instruction manual.
