# 50 YEARS OF GLOBAL CONFLICT

CAMPAIGN II HERALDS A NEW GENERATION  
OF WAR SIMULATIONS

JONATHAN GRIFFITHS'

## CAMPAIGN II

### STRATEGY AND 3-D SIMULATION

Expert military consultant William Owen, from recent conflicts, has brought his knowledge to bear on computer gaming with an end result that looks and feels more realistic than ever before. All aspects involved in the running of an army have been considered, so that now you can place yourself in command of either side, at any level in the Chain of Command. Over 130 templates of the most significant military

forces from 56 different nations of the last 50 years have been included to gain an insight into real conflicts such as Korea, Vietnam, and Operation Desert Storm. Enter the battle field in one of the 152 military vehicles. Tanks, APC's, Helicopters can all be controlled using weapons from wire-guided missiles, rockets, homing missiles, and machine guns supported by laser rangefinders, tracer rangefinders, night vision and gun stabilizers.

- Campaign II has emerged as the most comprehensive simulation with new improved strategy, at any level in the Chain of Command (C.o.C.), closely resembling that of a real military situation.
- Hands-on action as you fly helicopters in air-to-ground or air-to-air attacks.
- Deploy the animated infantry during fierce battlefield action in a new improved 3-D environment.
- Featuring all the modern weapons systems: guided missiles, rockets, homing missiles, laser rangefinders, gun stabilizers, and night sights.

CAMPAIGN WAS BIG • CAMPAIGN WAS GOOD

CAMPAIGN II IS BIGGER, BETTER AND QUITE SIMPLY  
THE MILITARY SIMULATION OF THE YEAR!

System Requirements: Commodore Amiga, A500, A500+, A600, A600HD, A1000, A1200, A1500, A2000 & A3000, Workbench 1.2 or Higher, 1MB RAM Required, Mouse and Keyboard Control Required

Commodore  
Amiga
