Five clones scattered throughout the galaxy, draining your life force. You must find and assimilate them before the ship's auto-bionic functions take over completely...and render you inhuman.

Death-defying flights through Hyperspace and dangerous terrain lead to strange worlds with alien inhabitants: Migrax, Croolis-Ulv, and the beautiful and beguiling Torka. They have the information you need to find and destroy your clones—if you're clever enough to get it.

Features:

- Revolutionary graphics and visual effects
- An innovative icon-based language for interplanetary communication
- Superb music and sound effects
- Humor, challenge and intrigue
