

# Championship MANAGER<sup>TM</sup> 94

## SEASON DATA DISK

**To update your copy of Championship Manager '93 to include '94 statistics you will need to have the following:**

- Your original Championship Manager '93 disks
- 3 Blank disks (Amiga/ST only)
- The '94 Season Data Disk (supplied)
- The Championship Manager '93 Manual

The 3 blank disks are needed to transform your Championship Manager '93 into the '94 version. Data on the '94 Season Disk will be read and "de-crunched" and added to the Championship Manager '93 data from your original disks.

Once the process is completed Amiga and ST owners will be left with their original Championship Manager '93 disks, three new Championship Manager '94 disks (which were previously your 3 blank disks) and the Championship Manager '94 Season Data Disk.

PC owners will have an installed version of Championship Manager '94 on their hard drives.

To play the game simply re-boot your machine with the new Championship Manager '94 Disk 1 in the drive.

**WARNING:** If using the '94 Season Data Disk for the first time you will have to select New Game. You cannot play previously saved games (ie games you have played on your original Championship Manager '93 disks).

The process you will have to go through is as follows (simply follow the on-screen prompts and everything will work perfectly).

### **Amiga and ST:**

Put your Championship Manager '94 Season Data Disk in the drive and boot the machine. You will firstly be asked to insert your blank disk 1 in DFO/A: and click the mouse button. This disk will now be formatted. You will be prompted to use the same procedure for your other two blank disks. Following this you will be asked to insert your Championship Manager '94 Season Data Disk in DFO/A:. The new season's information will be read into your machine's memory. You will then be asked to insert the original Championship Manager '93 disk into DFO/A:. Then, when prompted, insert the '94 Season Data Disk once more. Additional information will be read into the machine. Once this is completed, insert the original Championship Manager '93 Disk 3 into the machine. Then in succession you will be prompted to insert your new formatted disks 1, 2 and 3. During this procedure your new disks will be set up to run Championship Manager '94. Once this is completed all you have to do is re-boot your machine using the new Disk 1 and follow the normal loading procedure using your new disks.

### **PC:**

Insert your Championship Manager '94 Season Data Disk into the drive and type CM94. You will then be asked the name of your Championship Manager '93 directory, after which you will be prompted to insert your original Championship Manager '93 floppy disk. Once the old directory has been located you will be asked to name your new '94 directory. The '94 data will then be installed to your new directory. To run the program you will need to type CM at the new directory prompt.
