CITADEL

The Citadel - once an ordinary bridge-head known as BID4 5512 at the outer region of the universe guarding 23rd century Earth's interests, now the site of the most dangerous mission . . .

. . . your mission!

The Citadel was used as a secret military laboratory experimenting on prisoners of war before communications broke down and a task force was sent to restore contact with the Citadel. On approach the space transporter carrying the task force team is destroyed - you are the sole survivor, left alone millions of miles from civilisation. Handle the pressure and fight your way through the Citadel or die at the hands of the mutated prisoners.

- Huge rendered intro sequence.
- 20 gruesome levels to battle your way through.
- Two difficulty settings.
- Choose from six powerful weapons.
- Blast your way through mutants in a game full of bloody guts and gore.
- Variable setups possible to optimise the game for your system, from A500 to A4000.
- The programme makes use of any configuration, including processor upgrades and memory expansions.
- Fully hard disk installable.

Suffer torture and death or achieve the impossible and get away with your life and post traumatic stress disorder . . . The Citadel. Hell.
