## Copy Protection

Conan the Cimmerian comes on fully copyable diskettes. You can make backups as you wish. Please do not abuse this policy by giving copies to others who have not purchased the game.

At some point during play, a dialog box will appear, asking the user to "solve" a "Riddle of Steel" on a certain page in the documentation. Below the page number five icons will be displayed in random order. The user must then turn to the given page and click on the icon-symbols in the exact order they appear on that page.

**PLEASE NOTE:** The copy protection symbol that appears on page one is incorrect. The correct symbol appears below.
