In the 1990s our national nightmares are haunted by wild-eyed political extremists, greedy and ruthless drug lords, and lunatic military dictators. For too long we have felt powerless to stop them.

But now, award-winning game designer Sid Meier takes us around the globe with super-spy Max Remington to challenge these threats and neutralize their shadowy schemes of terrorism, smuggling and extortion.

A seasoned veteran of modern, hi-tech undercover operations, Remington always obeys the two main rules of Covert Action:

1. Use your Intelligence.

2. If Rule one fails, use your other weapons.
