

CRIME CITY

AMIGA

IF...

The pressure is on in this thrilling role-playing adventure game.
Your father is in jail for murder — and only you can save him from the hangmans noose!

CRIME CITY

You have only a very short time to prove your father innocent of a murder he's been jailed for . . . or he faces the Death Sentence!

Use his Private Eye's office to run your own investigation. You'll need to hack into his computer files, phone his contacts, talk to some strange people — and do some legwork around town looking for vital clues! All this will take cash — so you'd better strike lucky on the StockMarket, or you'll have to borrow from the loan shark!

Crime City is a deep game crammed with locations to explore — all beautifully drawn, and full of objects to examine & collect and people to speak to (in person and by phone!). And beware — the game is also truly interactive: people's attitudes towards you depend on your behaviour in the game! Crime City is the first game from IF..., a brand new label specialising in quality fantasy adventure & roleplaying games.
