Emlyn Hughes

INTERNATIONAL SOCCER

Bursting with high-speed arcade action, **Emlyn Hughes International Soccer** offers the most realistic gameplay ever seen on a home computer. No wonder Commodore Computing voted it **Best 64 Game of the Year!**

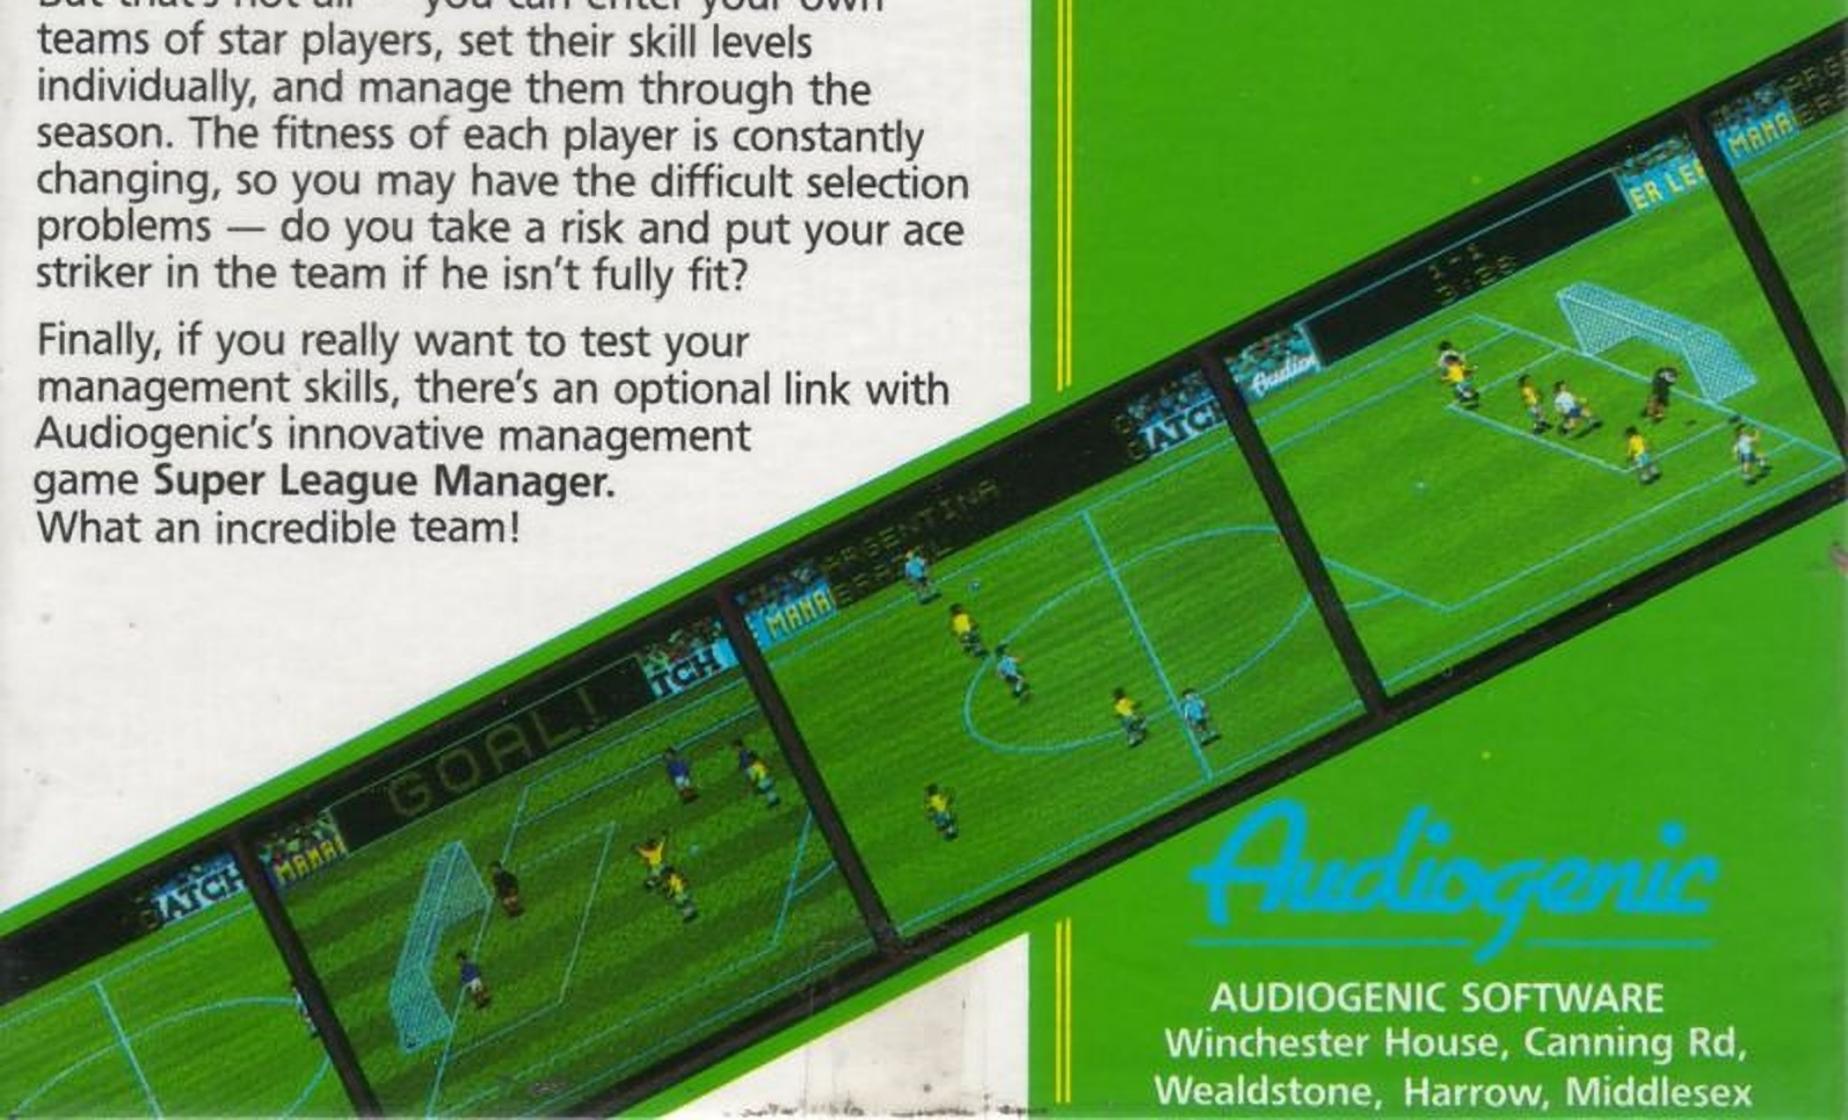

You can almost sense the thrill of the crowd as the goalkeeper tips a dipping shot over the bar! Stand back and for a moment you'll believe that you are watching a real match on TV! Sophisticated artificial intelligence makes the play incredibly realistic, with diving headers and sliding tackles, even barging, side-stepping and backheels, plus free-kicks, throw-ins, goalkicks, corners and penalties!

But that's not all — you can enter your own teams of star players, set their skill levels individually, and manage them through the season. The fitness of each player is constantly changing, so you may have the difficult selection problems — do you take a risk and put your ace striker in the team if he isn't fully fit?

Finally, if you really want to test your management skills, there's an optional link with Audiogenic's innovative management game **Super League Manager**. What an incredible team!

- Fast, smooth scrolling; amazing lifelike animation
- Incredible range of controls, yet unbelievably easy to play
- Players have individual skill factors and fitness levels
- Artificially intelligent computer-controlled players add realism
- Enter your own teams and players
- Wide choice of strips*
- Music by Dave Whittaker, incredible digitised* sound by Graham Blighe
- Optional datalink to *Super League Manager*

*Atari ST and Amiga; other versions may vary
