# F-15 STRIKE EAGLE II

# F-15 STRIKE EAGLE II

F-15 Strike Eagle II, the latest and greatest in the long line of superb MicroProse flight simulations, recreates the high-tech surroundings of the USAF's premier dogfighting and strike jet.

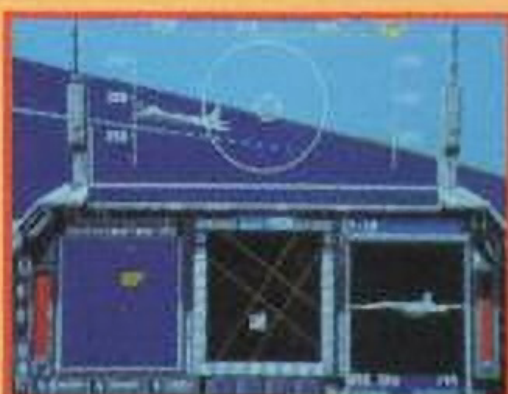

**F**ly missions in up to six real world arenas, from the Persian Gulf to Vietnam, Central Europe to the Middle East and the North Cape to North Africa, giving you a total flying area of nearly half a million square miles. Each area contains hundreds of missions, and each mission will differ depending on your chosen tactics, even if you fly it twice!

Four levels of difficulty will help you to learn quickly - and optional autopilot landings will allow you to concentrate on airborne action. The controls are simple, effective, and easy to remember. It's a great flight sim for beginners and experts alike.

An amazing ten viewpoints give you the opportunity to view the fast flowing 3-D environment from virtually anywhere around your plane - and a unique "Director" option can be used to automatically change the view for you, so that you're always looking right at the centre of the action.

The newest smart weaponry and laser-guided armaments are primed for launch - it's your job to make sure that you're in the right place at the right time, and avoiding the constant enemy attack being thrown at you.

Enemy pilots and missile crews act and react intelligently and quickly. Success depends on making the right moves - and making them fast. F-15 Strike Eagle II puts you in the hottest seat of them all - Take a look for yourself.
