For the AMIGA™ Computer

Flight Simulator II

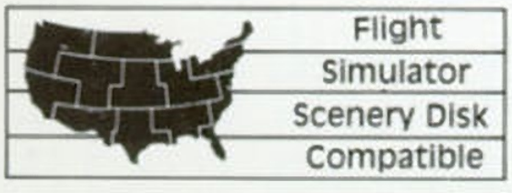
by Bruce Artwick & Chris Green

Put yourself in the pilot's seat of a Cessna 182 single-engine aircraft and head for the skies! Or fly a Gates Learjet 25G! High speed 3D graphics provide a spectacular panoramic view as you practice takeoffs, landings, and aerobatics. Complete documentation gets you airborne quickly even if you've never flown before. And when you think you're ready, you can test your flying skills with the "World War I Ace" aerial battle game. Flight Simulator II features include:

- 120 airports in five different scenery areas: New York, Chicago, Seattle, Los Angeles, and San Francisco.
- Day, dusk, and night flying modes.
- User-variable weather with cloud layers, fog, winds, and turbulence.
- Full flight instrumentation.
- VOR, ILS, ADF, and DME avionics.
- Multiple 3D window views with aspect ratio and zoom control.
- Multiple viewpoints including cockpit, tower, map, and spot plane views.
- A special multi-player option that allows two or more players using separate machines to fly with each other via modem port connectors.

for the Amiga™ Computer

Requires:
- 512K minimum memory.
- A mouse.
- Color or monochrome monitor.
- Joystick optional.



Program Number AM-FS2
