

A full-page background image of Jack Nicklaus in mid-swing on a golf course. He is wearing a white polo shirt with blue and yellow stripes on the sleeves, a red vest, and dark blue trousers. He is holding a golf club with a white glove on his left hand. The background is a detailed, painterly illustration of a golf course with rolling hills, sand traps, and a line of trees in the distance.

JACK NICKLAUS' UNLIMITED GOLF & COURSE DESIGN ACCOLADE

Supports: Amiga
500, 1000, 2000, 2500

Requires: 1 Meg
Mouse

Off-Disk Copy Protection

Designed by Ned Martin, Sculptured Software. This program supports all Jack Nicklaus add-on Course Disks.

"PLAY ANY GOLF COURSE IN THE WORLD OR DESIGN YOUR OWN."

"Building a golf course is a total expression of all the golf I've played and the courses I've seen around the world.

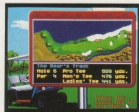

"Jack Nicklaus' Unlimited Golf & Course Design" lets you share some of the thrill I get as player and designer. It gives you the ability to play state-of-the-art computer golf on any

number of courses that you can easily create.

"Like me, I think you'll find that this simulation captures the complete golf experience. From sculpting landscape to playing magnificent, finished courses—this is truly golf from the ground up."

Jack Nicklaus

Play The Bear's Track, designed exclusively for Accolade by Jack Nicklaus. "I created The Bear's Track using the game's Course Design feature. Here, you'll find 16 great tests of shot-making and strategy."

Play Muirfield Village, Ohio—site of Jack's annual Memorial Tournament. "The twelfth... similar to the twelfth at Augusta National, except that there's water from tee to green. I love this hole."

Play the most feature-filled golf game available. "Instant-replays and reverse-angle replays, updated statistics, a hole-in-one club, variable wind and course conditions, plus faster drawing speeds make this the standard in computer golf."

Play on undulating greens, easily "read" with the Break Grid. "Line up your putt with or without the grid—but as you can see, keeping it on allows you to get an exact sense of the break of the green."

Create your own signature courses, starting with a plot of land. "First, I rough out an 18 hole 'loop' through the terrain. That's known as 'routing a course,' and in my game you can do your routing instantly."

Create totally unique holes, or recreate golf's greatest holes. "I enjoy giving each hole its own character—adding bunkers, water, hills and trees to offer the player as much variety and challenge as possible."

Create courses laden with well-placed obstacles. "I've included trees, vegetation, rocks and houses for placement—plus a drawing tool that allows you to create new objects, like railroad ties."

Create picturesque backgrounds with a built-in paint feature. "Why not 'simulate' each of your surrounding landscapes? The paint feature allows you to render courses in desert hues, spring greens or warm fall colors."

Create an unlimited number of golf courses. "Your first course. The beauty of this game is that the design feature is so incredibly easy to use... you can play your completed holes in an instant."
