

# Lords of the Realm<sup>TM</sup>

Epic Medieval Strategy

*Impressions*

Presenting medieval pageantry on a sweeping scale....

# Lords of the Realm™

"A game this rewarding has to be a labour of love." PC Gamer

"..They've got a winner here." Strategy Plus

Leap into our medieval tapestry and the grandeur of a unique strategy epic. The English throne lies empty in 1268 A.D. You and 5 lords are locked in a struggle for the crown. Reap the benefits of successful feudal governing, castle-building, castle-sieging, and land battles to conquer your rivals and claim the kingdom.

Keep your serfs fed and happy. Assign them to farming, herding, building, military and other tasks. Design your own castles or build them using actual historical blueprints. Then lay siege to your neighbours' castles and fight out land battles in tactical detail.

No other medieval strategy game delivers this much in all areas of game play! Exquisite 256 colour graphics and extensive animations combine with period music to offer an authentic atmosphere unprecedented in strategy gaming.

Armies march, castles grow, livestock prosper and crops ripen on this close-up view!

A siege begins in one of the many animated scenes

## Take the Challenge: Go for the Crown

### FEATURES
