Build your own Blue Monster or Waterloo. Your turf is a lavish 18-hole course with a choice of pro or regulation tees and every kind of shot and hazard imaginable. But with the Mean 18 Course Architect Set

you can also create courses just like Sawgrass, Spyglass Hill, Winged Foot or Muirfield – the toughest tests of golf! Carve out magnificent fairways with deep rough and narrow greens surrounded by huge sand traps. Strategically place your trees, hills and water hazards

A brilliant stroke. With lifelike animation anatomically patterned after the pros, golf becomes the sensory experience it was meant to be. In fact, Mean 18 provides the basic mechanics of a perfect stroke. Your straight left arm initiates a smooth, deliberate backswing. As your body pivots forward, you shift your weight

through your hips to complete a compact follow-through.

But the real key is in timing. When you can't get your timing right, no aspect of your game will be long and straight. When your timing is off, better use the Mean 18 lesson kit

and legs to com-
follow through.
challenge is devel-
ing and rhythm.
master this critical

the room for error.

The signs of a memorable game. At every tee there's a yardage marker stating par and distance to the pin. After each shot, distance-to-hole is noted at the bottom of the screen. A bird's eye view shows you where you've been and where you have to go. If your score is one of the top ten, congratulations. You're automatically installed into the Mean 18 Hall of Fame.

With all the golf games out there, we could have left well enough alone. But with nothing legendary in sight, we rose to the challenge and created Mean 18—the most true-to-life golf simulation game ever.

You'll never settle for par again.

No other golf game delivers the realism and playability of Mean 18. This is golf as it should be, with lifelike animation patterned after the pros and numerous strategy options. You'll sharpen your golf skills and strategy, and maybe even your real-life game.

The charge and the challenge. You approach the first tee and take in the scene: a crisp blue sky and a fairway of manicured green stretching forever. But don't be fooled by the breathtaking setting. The first hole is a 427-yard par 4, and there's plenty of rough and water between you and the pin. Your gut jumps and the adrenaline flows. You know that feeling, and Mean 18 gives it to you again and again.

The decisions that lie before you: Will you stick with your home course Bush Hill CC, or opt for one of the legendary courses—St. Andrews, Pebble Beach or Augusta National? Will you use the pro or regulation tee? Do you want to play expert mode or rely on a caddy to suggest your clubs? Will it be medal or match play? Are you going to hit a bucket of

balls or use the practice green before you tee off?

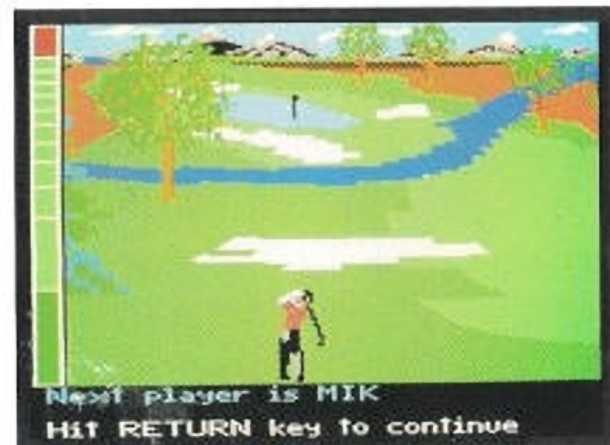

Once you've mastered the Mean 18 courses, you can design your own with **The Course Architect**. And for those players with the ten all-time best scores there's a permanent place in the Mean 18 Hall of Fame.

All the elements are there. The only question now is, do you lay up or go for broke?

Welcome to Mean 18, the most realistic golf simulation game ever, right down to the yardage markers. But don't let the flowers fool you. It's a tough course to walk, let alone play.

You get all the elements of play, including the mechanics of a perfect stroke. You can almost

feel the smooth, deliberate backswing and compact follow through. But it's up to you to develop a rhythm and avoid that shank or a hook into the rough.

Once you've mastered Mean 18—lots of luck—you can build your own course. Do you want menacing bunkers? Finishing holes right on the ocean? A tranquil lagoon or a treacherous creek? Design a relaxing round of golf or one that tests your limits.
