

NUCLEUS

BUB BASH

## BUG-BASH

*The time is early morning; the place a usually tidy back garden, well cared for by the humans. But to your dismay you notice that your domain has become very untidy overnight. As you look up you see swarms of insects and bugs flying about mindlessly; with no apparent intentions of helping you clear up the mess. It would appear that the 'Evil-Slug' has been up to his old tricks again, and brain-washed the insects and bugs with a wicked spell.*

*It soon dawns on you that it is going to take several days rather than hours to clean up and restore order in the garden. Quickly arming yourself with an insecticide spray gun you begin your quest.*

*Good Luck!*

## NUCLEUS

*Time is running out..... your mission, to destroy the electric power core of the synthetic planet Cetorium, which supplies all its power needs. Without their supply of energy the aliens which have been raging war over us have been defeated.*

*The only way to reach the NUCLEUS of the planet is to take on the entire planet's defence system, which no man has seen before or lived long enough to describe.*

*Get ready Star-Pilot!*
