

QUICK START CARD

This Quick Start Card contains details on loading and playing Prehistorik. For complete details on game play and goals, please consult the manual.

Prehistorik for Amiga 500, Amiga1000/2000/3000

GETTING STARTED

If you have an Amiga 512 K with an external drive, please disconnect it before launching the game.

AMIGA 1000 512 Kc

Switch on monitor and then the computer. Insert KICKSTART 1.2 or 1.3 in the internal drive (DFO). After loading Kickstart, the Amiga will ask you for WORKBENCH. At this point the loading sequence is the same as for other types of Amiga shown below.

AMIGA 500/3000/2000/1000 (follow above steps first).

At the WORKBENCH prompt, insert the PREHISTORIK disk in drive 1 and the game will load.

COMMANDS

F2 Music on/off
F3 Sound effects on/off
F9 Sound filter
F10 Pause

You can move either Prehistorik with a joystick or with the keyboard:

Keyboard

Key Up Jump/Climb up a ladder
Key Right Go Right
Key Left Go Left
Key Down Go Down/Go into a cave
Space bar Hit

Joystick

Up Jump/Climb up a ladder
Right Go Right
Left Go Left
Down Go Down/Go into a cave
Fire Button Hit

- . Tandy RAM - 640 K
- . Graphics - Tandy, Hercules, CGA, EGA or 16-colour VGA
- . Sound Blaster, Adlib or MT32
- . DOS - 2.0 or higher
- . Disk Drive - 5.25 or 3.5 inch

GETTING STARTED

Floppy Disk Users

Switch on monitor and then the computer and insert MS/DOS (or PC/DOS) disk in first internal disk drive. Your computer will read the system and will display the on screen prompt A:>

Remove the MS/DOS disk from the drive and insert the PREHISTORIK disk 1 in the same drive. Type PREHISTO then press ENTER.

Hard Disk Users

If MS/DOS is on the hard-disk, it loads automatically. Once it is loaded, type A:. The computer displays A>. Type PREHISTO then press ENTER.

Copying the Program onto your Hard Disk

Prehistorik has an install program that lets you copy the program onto your hard drive. Insert Disk 1 in drive A. Type A: and press Enter.

Type INSTALL C: and press Enter. We refer to the Hard Disk as the C: drive. If your Hard Disk is something other than drive C, substitute C with the correct drive letter.

The install program automatically creates a subdirectory called PREHISTORIK and copies the files into this subdirectory. You'll be prompted to insert the remaining disks (5 1/4 versions only).

After loading the files, type PREHISTORIK to choose the PREHISTORIK directory. Type PREHISTO then press ENTER.

Prehistorik is designed to automatically detect your computer setup and to load the game to take the best advantage of your system. However, the program may have difficulties in detecting your setup. For this reason, after loading the game for the first time, you will access a number of menu screens in which you will have to define your computer setup. All these parameters will then be saved on your system disk.

After this, these parameters will be automatically loaded. If you want to access the menu screens, just type PREHISTO R.

WARNING: do not remove the disk from the internal drive because the computer needs it to initialise protection.

COMMANDS

F2 Music on/off
F3 Sound effects on/off
F10 Pause
ESC Back to DOS

You can either move Prehistorik with a joystick or with the keyboard:

Keyboard

Key Up / 8 : Jump/Climb up a ladder
Key Right / 6 : Go Right
Key Left / 4 : Go Left
Key Down / 2 : Go Down / Go into a cave
Space bar : Hit

Joystick

Up Jump/Climb up a ladder
Right Go Right
Left Go Left
Down Go Down/Go into a cave
Fire Button Hit

Note: If 2 joysticks are connected, port 1 is given priority.

Prehistorik for ATARI ST 520/1040, MEGA ST2 and MEGA ST4 (with TOS in ROM)

GETTING STARTED

Ensure that your computer is switched off and no cartridge is inserted.

Insert the PREHISTORIK disk 1 in the first drive and switch on the computer. The game will load automatically.

The game contains 2 disks. These disks may be used with single-sided or double-sided disk drives. If you use a double-sided disk drive, digitalized music will be read during the opening screen.

During the game play, you are prompted to change disks when necessary.

COMMANDS

F1 Frequency 50 Hz/60Hz
F2 Music on/off
F3 Sound effects on/off
F5 Quit
F10 Pause
Space bar Swap opening screens

You can only move Prehistorik with a joystick:

Joystick

Up Jump/Climb up a ladder
Right Go Right
Left Go Left
Down Go Down/Go into a cave
Fire Button Hit
