RAFFLES

ENTER THE ILLUSION!

Get lost in a house . . . a house more real than anything you've experienced on a computer before. Lured in by its owner, you must find every gem hidden within its walls before it will release you. But beware! There are real traps, genetically enhanced monster-mice, and a puzzle in every room that will keep you glued to this game for months to come. So be warned! Featuring the most realistic portrayal of a house ever, using the revolutionary 'World Maker' technique to allow you to pick up, move and use virtually every object you find!

Screen shots from Atari ST version.
