ROCKFORD

THE ARCADE GAME

TM

Congratulations! You are just about to buy the most addictive piece of games software ever released. "ROCKFORD" is based on BOULDER DASH but it is not just another version of BOULDER DASH. ROCKFORD has been developed by ARCADIA SYSTEMS for their Coin-op Arcade cabinets. This version brings all that arcade action and quality into your home!

There are four levels on each of five different worlds with four screens on each level. It all adds up to eighty totally different playing screens. Take up the challenge as you guide ROCKFORD through the puzzles and take on the role of cowboy, spaceman, doctor, chef and hunter.

We have also packed in digitized sound effects and music, as well as special animated sequences depicting your success, failure and demise. All this detail, and the fiendishness of the brand new puzzles, really does make ROCKFORD the ultimate challenge for your computer.

Meanwhile read what the press says:
