Joystick

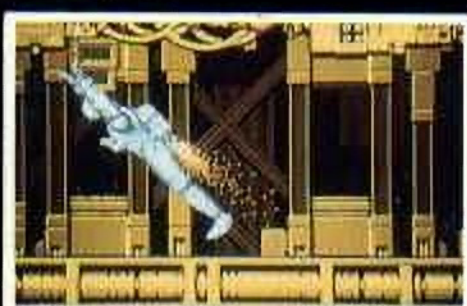

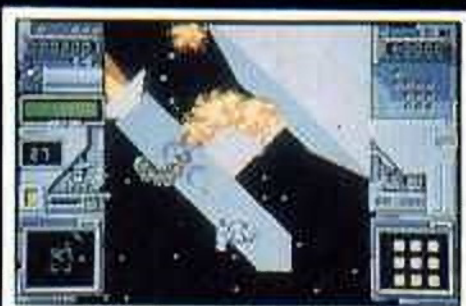

U.S. GOLD®

ROTOX™

Screenshots are only intended to be illustrative of the game play and not the screen graphics which vary considerably between different formats in quality and appearance and are subject to the computer specifications.

Screenshots from various formats.

The jolt of the landing jets, a piercing whine rapidly descending in pitch. The troopers off-load. They are Cyborg Class 2-A, approved to carry heavy energy weapons and tactical missiles for off-world combat.

Every battle means fresh new injuries, every lost limb a gleaming cybernetic replacement, to make them better, faster and stronger.

This is the proving ground for ROTOX™. Specially constructed landscapes in deepest space provide a nightmare environment of deadly machines and hostile life forms. Mistakes are fatal, but success will lead ROTOX™ to the high powered weaponry he needs to escape.

SURVIVE and you will build yourself into a lethal fighting machine. **FAIL** and your soul will wander the galaxy forever.

- 10 levels, each with a different theme which must be cleared before Rotox can proceed to the next level.
- Stunning state-of-the-art graphics and music.
- Initially armed with only a laser gun, ROTOX™ must find extra weapons as he battles through the levels.
- Weapons include scatter-bombs, grenade launchers, jet packs (lets you fly to other sections on the same level, but watch out you don't crash – your fuel is limited), heat-seeking missiles home in on your enemy.
- Features unique 360° rotating landscape technique.
