REVERSE

EPYX®

DEFENDER® IS BACK WITH A BIG SCORE TO SETTLE...

Blast lunar bogies before they
jettison quintuplets.

Fly through a virus-ridden
computer. It's enough to
crash your system.

Use a smart bomb.
Kills bugs dead.

Don't eat green snow.

You've rescued mankind
from relentless packs of space
vermin. Now you've got a gutful of
revenge. For all those times your
smart bombs ran out and alien death
squad moved in... for all those times
you were caught in mutant swarms with
your shields down... for the humanoid pals
you lost to those puke space fiends...

IBM PC and Amiga screens shown.
