THE TETRIS PEOPLE

Just When You Thought You'd Broken The Habit.

Oh no. It's here. The super sequel to the best-selling Tetris®, the insidious Soviet

addiction that hooked the West.

Super Tetris™ keeps the basic Tetris objective of arranging falling blocks with as much speed and agility as possible. But we've added explosive new twists. Now, you

must work your way to the bottom of each level's deep, scrolling pits. And with only a limited number of pieces, each must be strategically dropped.

Earn falling bombs that either blast you down to hidden treasures or destroy your mistakes. Buried treasure squares reward you with additional blocks or clear a path to the surface as they rise.

When you reach the bottom of each level's challenging pit, you go to

the next level of action, with deeper pits, faster falling pieces and more elusive treasures.

Super Tetris. It's a super test of your nimbleness, nerves and strategy.

- Brilliant VGA graphics in 256 colors (in high resolution for Windows).
- Rousing Russian music for supported sound cards.
- Timed games for comrades who can't stop.
- Two-player competitive, cooperative and head-to-head modes.
- No more all-nighters—save games and come back.
- Ten levels of difficulty.

Screens shown are from IBM VGA and Windows™ 3.0 Super VGA versions.

Sure, the cold war is over. But blast away your mistakes with falling bombs anyway.

To the bold go the spoils: Super Tetris rewards you for uncovering buried treasure squares.

Battle a friend in the same pit! Special competitive and head-to-head modes let you duke it out Super Tetris style.
