DEFEAT THE CURSE OF THE ANCIENT EGYPTIANS.

It is 1930 and you have just landed your biplane next to a pyramid dedicated to Re, the sun god. The sun is hot and time is short. For in just two hours the moon will totally eclipse the sun, activating an ancient curse cast upon the Egyptians.

Unless you find Re's shrine inside this great pyramid the moon will explode and shower the earth with meteorites. And life as we know it will be destroyed.

With time fast running out and armed with only a revolver, wrist watch, compass and water bottle you must tread your tortuous way through the pyramid.

The 3D Freespace technique creates superb gameplay, giving you first person perspective. There are not only devious puzzles to be solved, but risks to be taken and decisions made.

Total Eclipse is a totally captivating adventure which will keep you inside the great pyramid for a long, long time.
