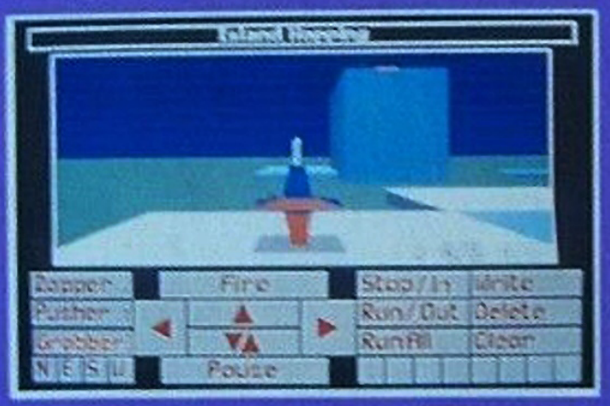
TOWER OF BABEL

Tower of Babel is an intricate 3D strategy game involving an interconnecting network of towers, platforms and lifts all rendered in solid 3D with innovative light and shading techniques. Take control of robot spiders and program them to solve problems and puzzles and interact with other creatures, such as Pushers, Zappers and Grabbers. Alternatively, real time control is available to you at any time for instantaneous reaction to the game's developments.

For the more adventurous among you, there is a complete game designer, allowing the construction of your own series of towers, platforms and lifts. Attempt to fox your friends with your own fiendishly difficult creations. More than just a game, more than just a puzzle – Tower of Babel is a whole new concept in strategy gaming.



- ☐ Interactive strategy game featuring lifelike, solid 3D shaded graphics.
- ☐ Programmable and realtime control available simultaneously.
- ☐ Intricate, brain teasing puzzles to solve in each network.
- ☐ In-built game designer allowing complete control over every game parameter and network layout.
