Wembley Rugby League offers you the chance to take your team through to the Challenge Cup Final, and lead them to victory before a capacity crowd in the world's most famous stadium.

Never before has there been such a realistic simulation of rugby league, one of the toughest and most challenging sports ever devised. All of the key features of the game are faithfully represented - tackles, scrums, penalties, conversions, and, of course, the play - the - ball.

But it's not all about arcade action. Rugby league is not only a game of skill and power, it's also one of strategy and cunning. With one eye on the scanner you'll be able to plan your play to best exploit your side's strengths - and the opponents' weaknesses. There's even a range of preset moves that you can use to try to fool the opposition, and break through their defences.

To gain an even better perspective of the game, switch to the 'blimp' view that reduces the scale and enlarges the visible playing area four times! Or analyse a move or try with an instant replay (you can even save your best tries to disk!).

- arcade - action with lifelike animation •
- preset moves help you plan your strategy •
- one or two can play (up to four on Amiga with suitable adaptor) •
- joystick controlled on Amiga; keyboard option on PC •
- instant replays can be saved to disk •
- two display options including strategic 'blimp view' •
