

Take a deep breath and fasten your safety harness... you're in for the thrill of a lifetime in ACROJET, your own personal aircraft. ACROJET simulates the BD-1, a one-man 200 mph plus jet aircraft that is fully aerobatic and everything a real pilot could want or handle with outstanding 3-Dimensional graphics, sophisticated instrumentation and amazing quick response aerobatic maneuverability. Experience a new level of excitement and sophistication in flight simulation. Compete with up to 3 other players in the Decathlon of Sport Aviation to achieve the title "World's Greatest Sport Pilot" - only awarded when you prove you can outfly Major Bill - MicroProse's own real fighter pilot.

ACROJET is an exciting and thrilling advanced flight simulator that will challenge even the most experienced aviator and provides thrill and excitement unknown in home computer simulations.

AcroJet™

Having combined all my events, I found Acrojet completely absorbing and very exciting. Moreover, for such a complex game, it's extremely good value for money. It's given me a taste for the aerobatic displays I used to do in the RAF - any vacancies in the Red Arrows?
