TAITOTM

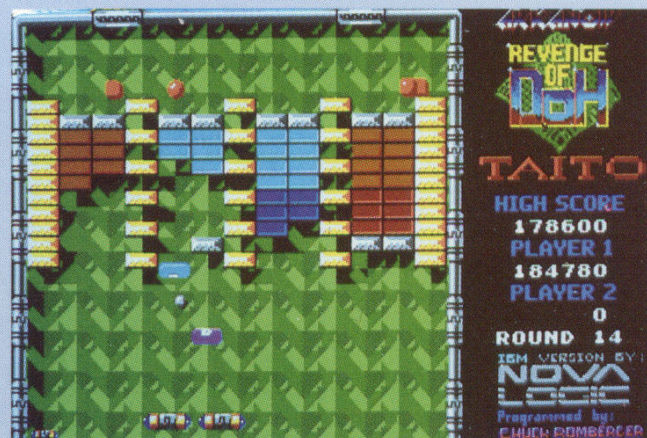

HE'S BACK. HE'S MAD.

HE WANTS REVENGE.

Eons ago, you battered DOH into an intergalactic pulp and escaped. But a scrap of DOH's core energy survived... And now DOH's hurtling toward you across space and time in the Xorg, a huge spaceship that's crashed into our universe from an unknown dimension. Use your ultra-fast reflexes and intense concentration to get to the core of the Xorg without pounding your ship to interstellar scrap. Or take a break from battle. Create your own force barriers with the Arkanoid Construction Set™, the latest in intergalactic dimension-building tools. If you're good enough, you'll get through. And come face to face with the force of DOH.

Use the Arkanoid Construction Set™ on either your IBM or Apple IIGS computer to build your own force barriers. — Actual IBM EGA/VGA screen.

Bash loose energy capsules to ultra-charge your ship, the VAUS2. — Actual IBM EGA/VGA screen.

Control a dozen super-powered energy balls at once—if you're fast enough. — Actual Tandy 1000 screen.
