

BANGKOK KNIGHTS

From the humble peasant farmers of Thailand came one of the world's most devastating forms of combat, Thai Boxing – the fastest, meanest and most exciting full contact sport in the world of martial arts.

In this unique simulation of Muay Thai (Thai Boxing) you must fight your way from the cliff ledge above your village, through the jungle and into the streets of Bangkok. Only after defeating all the street-wise opponents will you be granted the right to fight in the famous Lumpini stadium, here you will encounter the greatest exponents of the sport, the Bangkok Knights.

By using unique and innovative programming techniques you will have to combat the largest, cartoon-like, animated characters ever seen and with the action set against eight way smooth scrolling backgrounds plus state of the art music and digitised sound effects. But beware, the Bangkok Knights are not known for their chivalry. They will often surprise you with comical cheat moves and you might die laughing.
