

THE BIG DEAL

Big Business (Best in Gastronomy) has expanded into many parts of the catering industry with hamburger-bars, cafeterias and hotels.

Now, two inventors have redeveloped the famous robot Floyd as a kitchen robot to prepare food and perform standard kitchen-procedures- without cutting his fingers off! Floyd II has to deal with a wide variety of orders, including breakfast, lunch, evening dinners and snacks at all times.

You can help him by refining his 'inexperienced' programs. But act quick, be fast or you'll find yourself winding up as a dish-washer in a local BIG burger bar.
