

COMMODORE
64/128K Cass.

CARRIER COMMAND

RAINDIRD

STRIKE!-ATTACK!

From the depths of the ocean, vast energies force molten lava to the surface, leaving volcanic islands to cool in the steaming waters. This new land offers a rich supply of elements and materials exhausted elsewhere on the planet and vital to continued life. It is no surprise to learn that a foreign power is attempting to occupy the islands and grab the resources exclusively for themselves.
