AN ILLUSTRATED ADVENTURE GAME

CRITICAL MASS™

On June 1st, the United Nations received the following message:
"Good morning. Just thought I'd drop a line to let you know that precisely at 8 p.m. on June 9th, I'll be destroying the world's five largest cities with thermal nuclear weapons. It ought to be a real blast! Sorry, but that's about all I can tell you. Thanks for your time and have a nice day!"

The delegates gathered quickly. How could this demented person be found and stopped? The task would require someone who could understand how the sicko thought. Well, naturally, they thought of you! Hurry now, you've got just nine days to prevent this heinous crime and save 50 million lives. That is, unless you've got something more important to do.

Critical Mass is an ingenious action-adventure game that combines challenging riddles with fast action sequences. This great combination along with the innovative plot puts Critical Mass in a class all by itself.
