CURSE of BABYLON™

*Here's your chance to
save the world!*

The world of Babylon, that is. A world cursed by zombies, rock creatures, giant blue lizards and hordes of other monsters.

Fate has chosen *you* to conquer these intruders and restore peace to Babylon. You start with only a knife and leather sheath — not much when you've got a gargoyle in your face.

So stock up on arms, magic potions, and fireballs. If all else fails, try a little brute force.

You'll need all the help you can get to crush your enemies. Run, jump and climb your way through dark forests and ghastly dungeons. Your magic and life stats appear on the screen, so you'll know when to attack. And when to run and hide. But be careful — that "rock" you crawl under could be alive!

This hit from Japan will bring you hours of adventure. So, check your armor and let the battle begin.

12 increasingly complex levels with over 150 rooms to explore.

13 magical items to help in your quest.

Arcade style action driven by 7 incredible soundtracks.
