

CORPUS DELICTI

Union Memorial Hospital, Lakeville, CT

Summary of findings from Coroner's Examination

Name Robner, Marshall		File No. H657/SJ43.1		Date 7/8/82		
Sex Male	Race Caucasian	Color of Eyes Brown	Color of Hair Gray	Ht 5'11	Wt 192 lbs.	Distinguishing Marks None
Apparent Cause of Death Drug overdose (Ebullion)						

Front

Back

There were no injuries or marks of a suspicious nature, except a small bruise on the left temple (consistent with falling to the floor from a chair).

Analysis of the blood of the deceased revealed a blood level of 27mg% for Ebullion. The therapeutic range of this drug is normally 4 to 6mg%. A fatal dose, while not specified by the manufacturer, has been found to be in the 10-20mg% range. A routine analysis for other common drugs was unproductive.

Findings were unremarkable except for massive liver damage consistent with overdose of Ebullion, and 10mg of Ebullion recovered from the stomach. Death occurred at 1 AM, plus or minus one hour.

The blood level of Ebullion and the massive liver damage consistent with Ebullion toxicity lead to the inevitable conclusion that the deceased died of an overdose of that drug.
