Dunzhin

Welcome to RAS, a world entered only through Screenplay's new adventure series, the *Warriors of Ras*.™ This superb collection of graphic role-playing games promises to bring hours of fun to exercise your wit and reasoning skills. Each game is made up of randomly designed mazes, monsters and confrontations. Even beginning role-players can create strong warriors – and save them to play game after game! First level fighters stand a better chance of survival in the *Dunzhin*; each game in the series provides a greater challenge, a greater danger.

DUNZHIN

You leave the real world behind when you enter *Dunzhin*, the first of the *Warriors of Ras* series of role-playing games.

In quest of treasure you descend deeper and deeper into the dungeon. Each level of rooms contains precious items or dangerous traps. In one room, in the lowest depths, lies the ultimate treasure.

As you work your way toward the prize, you come face to face with increasingly hideous monsters. Do you stand and fight? Or should you withdraw? You can sneak around your foe, or run like crazy. Which?

Gather your wits and grab your weapons. During your journey through the dungeon you'll encounter pits, poisonous gases and trap wires. As you overcome the obstacles that lie in your way, you're rewarded with riches.

Suddenly your struggles pay off. You capture the treasure! But the game is not over. You must find your way out.

Even after your escape, the fun doesn't end. You can save your character to play *Dunzhin* over and over. And each time you play the game is different. There are thousands of possible dungeons!

Sound impossible? Just wait till you advance to the next game of the series, *Kaiu*.
